DEFENDANTS' EXHIBIT 2.

An agreement: Made and entered into this 1st day of April, 1903, between the New York Lubricating Oil Company of New York, N. Y., hereinafter to be known as party of the first part, and the Georgia Railroad of Augusta, Ga., hereinafter to be known as party of the second part.

1. The said party of the first part does hereby covenant and agree to furnish to the said party of the second part all lubricating oils and greases, in barrels, delivered at Augusta, Georgia, necessary to afford thorough and satisfactory lubrication of all locomotive engines, passenger coaches, and freight cars operated by the said party of the second part during a period of one year, next following the date upon which this agreement becomes effective, at the following prices, viz:

Valve oil, @ 45c. per gallon, less 20%, 36c. net.
Engine oil (for locomotives), @ 22½c. per gallon, less 20%, 18c. net.
Coach oil (for passenger cars), 20c. per gallon, less 20%, 16c. net.
Car oil (for freight cars), 15c. net.

2. The said party of the first part further agrees and guarantees that, under the above prices, *the total cost of lubrication*, in each class of service, respectively, shall be no more than stipulated as follows, viz:

For locomotives, general average (frt. & passgr.)------	$0.92	per 1,000 miles
For passenger coaches----------	.09	per 1,000 miles
For freight cars----------	.065	per 1,000 miles

And the said party of the first part does hereby agree, that if the total cost of lubrication, under the prices per gallon, above quoted, shall exceed the stipulated guaranty upon the basis of mileage performance during the period covered by this agreement, to refund to the said party of the second part any sum of money necessary to make good the said guaranty of the total cost of lubrication per one thousand (1,000) miles run in each class of service.

3. The said party of the second part agrees to furnish to the said party of the first part monthly statements of the total number of miles run in each class of service (locomotives, passenger coaches, and freight cars) during the month and the total amount of each kind of oil, or grease, consumed in such service.

4. It is mutually understood and agreed that the said party of the second part shall pay the said party of the first part, in quarterly payments, at the prices per gallon specified, for all oils and greases delivered during each respective quarter upon requisition of the said party of the second part, and any discrepancy between total invoiced value of lubricants consumed and the total cost of lubrication, upon basis of mileage performance guaranteed, shall be settled by refund of such difference by the said party of the first part.

5. It is mutually understood and agreed that the amounts of oil and greases to be furnished and consumed shall be at the discretion of the said party of the second part, as the good of their service may dictate. But the said party of the second part does agree to use all due care and diligence to ensure a proper and economical use of the lubricants furnished by the said party of the first part under the provisions of this agreement.

6. The said party of the first part agrees and promises that all oils and greases furnished by them under the provisions of this agreement shall be thoroughly efficient and reliable and shall afford service entirely satisfactory to the said party of the second part.

7. When and from the time that the said party of the first part shall be receiving, net, the stipulated prices per gallon for the several grades of oil, the said party of the first part agrees to allow to the said party of the second part fifty cents (50c.) each for all oil barrels in which the oils of the said party of the first part have been furnished, f. o. b. Augusta, provided such barrels are in good condition, but until such time all empty barrels shall be considered the property of said party of the first part.

8. It is mutually understood and agreed that the guaranties of mileage performances by each class of equipment as specified herein shall be considered separately and distinctly—the guaranty of each class of equipment (1, locomotives; 2, passenger coaches; 3, freight cars) being understood to apply separately and severally.

9. Further: It is provided and mutually agreed between the parties hereto that the said party of the second part shall have the option and privilege of cancelling this agreement at any time during the life of same upon ninety (90) days' notice, duly given to the said party of the first part.

In witness whereof we, the parties hereto, have hereunto set our respective signatures and seals this 1st day of April, 1903.

NEW YORK LUBRICATING OIL COMPANY,
By PHILIP HARRISON,
Manager, Sales Department.
GEORGIA RAILROAD,
By THOS. K. SCOTT, *General Manager.*

(Endorsed:) By mutual agreement this contract is hereby extended for one (1) year, from April 1st, 1904, to March 31st, 1905, inclusive.

Signed by the respective parties this first (1st) day of April, 1904.

DEFENDANTS' EXHIBIT 3.

This agreement, made and entered into this 2nd day of March, 1903, between the New York Lubricating Oil Company, of New York, N. Y., hereinafter known as the first party, and the Louisville & Nashville Railroad Company, of Louisville, Ky., hereinafter known as the second party.

1. The said first party does hereby covenant and agree to furnish to the said second party all lubricating oils and greases, in barrels, ten per cent to be delivered on tracks of second party in Cincinnati, Ohio, and about ninety per cent on its tracks in Louisville, Ky., except freight-car oil for consumption at Nashville, Tenn., and Mobile, Ala., which should be delivered on second party's tracks at those points in tank cars, the amount so to be delivered in tank cars being estimated at about ten per cent of the total requirements—necessary to afford thorough and satisfactory lubrication of all locomotive engines, passenger coaches, and freight cars operated by the said second party during a period of two years next following the date upon which this agreement becomes effective, at the following prices, viz:

Valve oil, at 45 cents per gallon, less 20%, 36c. net.
Engine oil (for locomotives), at 25 cents per gallon, less 20%, 20c. net.
Coach oil (for passenger cars), at 18 cents per gallon net.
Car oil (for freight cars), at 15 cents per gallon net.

2. The said first party further agrees and guarantees that, under the above prices, the *total cost of lubrication*, in each class of service, respectively, shall be no more than stipulated as follows, viz:

For locomotives, general average (frt. & pass'r)	$1.53	per 1,000 miles
For passenger coaches	.12	per 1,000 miles
For freight cars	.072	per 1,000 miles

And the said first party does hereby agree, that if the total cost of lubrication, under the prices per gallon above quoted, shall exceed the stipulated guaranty upon the basis of mileage performance during the period covered by this agreement, to refund to the said second party any sum of money necessary to make good the said guaranty of the total cost of lubrication per one thousand (1,000) miles run in each class of service.

3. The said second party agrees to furnish to the said first party monthly statements of the total number of miles run in each class of service (locomotive, passenger coaches, and freight cars) during the month, and the total amount of each kind of oil or grease consumed in each service.

4. It is mutually understood and agreed that the said second party shall pay the said first party, in quarterly payments, at the prices per gallon specified, for all oils and greases delivered during each respective quarter upon requisition of the said second party, and any discrepancy between total invoiced value of lubricants consumed and the total cost of lubrication, upon basis of mileage performance guaranteed, shall be settled by refund of such difference by the said first party.

5. It is mutually understood and agreed that the amounts of oils and greases to be furnished and consumed shall be at the discretion of the said second party, as the good of its service may dictate. But

the said second party does agree to use all due care and diligence to insure a proper and economical use of the lubricants furnished by the said first party under the provisions of this agreement.

6. The said first party agrees and promises that all oils and greases furnished by it under the provisions of this agreement shall be thoroughly efficient and reliable and shall afford service entirely satisfactory to the said second party.

7. When, and from the time that the said first party shall be receiving, net, the stipulated prices per gallon for the several grades of oil, the said first party agrees to allow to the said second party fifty cents (50 cents) each for all oil barrels in which the oils of the said first party have been furnished, f. o. b., Cincinnati, Ohio, provided such barrels are in good condition, but until such time all empty barrels shall be considered the property of the said first party.

8. It is mutually understood and agreed that the guaranties of mileage performances, by each class of equipment as specified herein, shall be considered separately and distinctly—the guaranty of each class of equipment (1, locomotives; 2, passenger coaches; 3, freight cars) being understood to apply separately and severally.

9. Further: It is provided and mutually agreed between the parties hereto that the said second party shall have the option and privilege of cancelling this agreement at any time during the life of same, upon ninety (90) days' notice duly given to the said first party.

In witness whereof, we, the parties hereto, have hereunto set our respective signatures and seals this 2nd day of March, 1903.

NOTE: Mail this *report monthly*, and address all communications regarding reports and settlements to

NEW YORK LUBRICATING OIL COMPANY,
35 Water St., New York, N. Y.

DEFENDANTS' EXHIBIT 4.

An agreement entered into this the first day of February, 1905 Between the New York Lubricating Oil Company of New York, N. Y., hereinafter to be known as the first party, and the Central of Georgia Railway Company, hereinafter to be known as the second party, witnesseth:

1. The said first party hereby covenants and agrees to furnish to the said second party, for a period of one year next following the date of this agreement, all lubricating oils and greases necessary for the lubrication of the locomotives, passenger coaches, and freight cars in the service of the said second party, to be delivered in carloads, in barrels, f. o. b., Savannah, Georgia, at the following prices:

Locomotive valve oil, at 36c. per gallon, net.
Locomotive engine oil, at 20c. per gallon, net.
Freight car oil, at 15c. per gallon, net.

All oils delivered in tank cars to be two cents (2c.) per gallon less than above prices.

And the said first party further agrees and guarantees that the total cost of lubrication in all classes of service (locomotive, passenger coaches, and freight cars), under the prices above specified, shall not exceed the following amounts, respectively set opposite, viz:

Locomotives (all service)	$0.85	per 1,000 miles run
Passenger coaches	.10	per 1,000 miles run
Freight cars	.065	per 1,000 miles run

It being further understood and agreed that, if the total cost of lubrication in above specified classes of service, under the prices specified, should exceed the amounts guaranteed as the maximum total cost of lubrication, the said first party agrees to accept payment for all lubricants consumed during each calendar month in all of the classes of service herein specified, in a sum equivalent to the gross amount of the maximum cost of lubrication in each and all of the classes of service herein specified, as guaranteed by the said first party under the terms of this agreement. If the cost of lubrication in one or more classes of service should come below the guaranteed maximum cost, the saving so effected shall apply against the cost of any class or classes of service in which the guarantee is not accomplished.

2. The said first party agrees and covenants that the quality of the lubricants to be furnished under the terms of this agreement shall be such as to afford thoroughly efficient lubrication of the equipment of the said second party and that the quantity of the lubricants so to be furnished shall be determined by the said second party, as they, in their discretion, may deem necessary for the proper and satisfactory lubrication of their equipment. But it is provided, and hereby mutually agreed upon, that the said second party shall exercise all, and every, due diligence and care to insure that the lubricants furnished by the said first party are used and applied in the manner, and by methods, that will afford the greatest possible economy in the use of such lubricants.

And the said second party agrees to furnish free transportation to such agents and employes of the said first party for purpose of

supervision and inspection of the methods employed by the said second party in the handling and use of the lubricants furnished by the said first party. And the said second party further agrees to assist and cooperate with such agents and employes of the said first party, in securing the most economical results possible in the use and handling of the lubricants furnished by the said first party.

It is especially stipulated and understood, however, that it shall not be within the province of any agent, or employe, of the said first party to give any *orders*, of any character whatever, to any official, or employe, of the said second party, or to change any methods, or practices, which may be in effect by orders of the officials of the said second party; it being distinctly understood and agreed that any apparent lack of care, or bad practice, that is not remedied by a simple suggestion from the agent, or employe, of the first party must be reported to the general manager of the said second party (or such of his officials as he may designate), and such report to be treated by the said general manager as he may deem fit and proper, under the terms and spirit of this agreement.

3. The said second party agrees to make requisition upon the said first party for such lubricants as they may deem necessary for the proper and efficient lubrication of their equipment, as herein specified, to accept same, as herein provided, and to properly care for and distribute same so as to insure the greatest practicable degree of economy.

And the said second party agrees to pay for all lubricants received from the said first party, as same may be consumed, under the mileage guaranties, during the month next following that in which the said lubricants are consumed in the classes of service herein specified (locomotives, passenger coaches, and freight cars), and also to pay the said first party, at the prices per gallon, herein specified for any and all lubricants that may be used for any other service than in the lubrication of locomotives, passenger coaches, and freight cars. It is also *understood* and agreed that the said second party shall pay to the said first party, at the prices per gallon herein specified, in addition to the amounts already stipulated as the maximum cost of lubricants of locomotives, passenger coaches, and freight cars in regular service, one-half ($\frac{1}{2}$) the value of all lubricants that may be used in packing the journal boxes of any and all new cars constructed by the said second party during the period covered by this agreement, or its extensions.

And the said second party agrees to furnish to the said first party a monthly statement, for each calendar month, showing the total number of miles run in each class of service (locomotives, passenger coaches, and freight cars), the number of gallons of each lubricant used in each class of service, the total (invoice) cost of lubrication in each class of service, and the cost per thousand miles run in each class of service.

4. When and after the guaranteed maximum total cost of lubrication in each and every class of service is made good, as herein stipulated and specified, the said first party agrees to allow the said second party one dollar ($1.00) each for all empty barrels returned to the said first party in good condition, in carload lots, f. o. b. Savannah, Ga., at the option of said second party; but it is understood and agreed that until such guaranties are made good all empty barrels

in which the oils of the said first party are shipped are the property of the said first party, and the said second party shall be responsible for the return of such empty barrels to the said first party, in carloads, f. o. b. Savannah, Georgia, or in the event of failure to return said empty barrels as stipulated, the said second party shall pay to the said first party one dollar ($1.00) each for such barrels, the property of the said first party, that are not returned to the said first party as above specified.

5. It is mutually understood and agreed that this agreement and all of its stipulations shall continue in effect indefinitely after the expiration of the period for which it is specifically drawn, unless either of the parties hereto, one or the other, shall give ninety (90) days' notice, in writing, to the other of a desire for the conclusion or expiration of the same, and the terms, conditions, and stipulations herein shall continue to apply for a period of ninety (90) days next following the date of such notice in writing.

6. In the event that either of the parties hereto should deem that the other is not carrying out the spirit as well as the letter of this agreement, this agreement may be canceled, at the option of either of the parties hereto, upon the giving of ninety (90) days' notice, in writing, of a desire for such cancellation.

In witness whereof we, the parties hereto, have set our hands this day of

NEW YORK LUBRICATING OIL COMPANY,

NEW YORK LUBRICATING OIL COMPANY,
35 Water St., New York, N. Y.

DEFENDANTS' EXHIBIT 5.

An agreement, made and entered into this the second (2nd) day of March, 1903, between the New York Lubricating Oil Company, of New York, N. Y., hereinafter to be known as the first party, and the Atlanta, Knoxville and Northern Railway Company, hereinafter to be known as the second party: Witnesseth:

1. The said first party hereby covenants and agrees to furnish to the said second party, for a period of two (2) years next following the date of this agreement all lubricating oils and greases necessary for the lubrication of the locomotives, passenger coaches, and freight cars in the service of the said second party, to be delivered in carloads, in barrels, f. o. b. Knoxville, Tennessee, at the following prices, viz:

Locomotive valve oil,	at 37.7c.	per	gallon	net.
Locomotive engine oil,	" 21.7c.	"	"	"
Passenger coach oil,	" 19.7c.	"	"	"
Freight car oil,	" 16.7c.	"	"	"

And the said first party further agrees and guarantees that the total cost of lubrication in each class of service (locomotives, passenger coaches, and freight cars), under the prices above specified, shall not exceed the following amounts, respectively, set opposite, viz:

Locomotives (all service)	$1.29	per	1,000	miles	run.
Freight cars	.065	"	"	"	"
Passenger coaches	.11	"	"	"	"

It being further understood and agreed that if the total cost of lubrication in any of the above specified classes of service, under the prices specified, should exceed the amounts guaranteed as the maximum total cost of lubrication, the said first party shall refund to the said second party such amount, or amounts, as may be necessary to cover the difference between the actual cost, under the price per gallon specified, and the guaranteed maximum total cost of lubrication, in each class of service, as above set forth.

2. The said first party agrees and covenants that the quality of the lubricants to be furnished under the terms of this agreement shall be such as to afford thoroughly efficient lubrication of the equipment of the said second party, and that the quantity of the lubricants so to be furnished shall be determined by the said second party as they, in their discretion, may deem necessary for the proper and satisfactory lubrication of their equipment. But it is provided, and hereby mutually agreed upon, that the said second party shall exercise all and every due diligence and care to insure that the lubricants furnished by the said first party are used and applied in the manner and by methods that will afford the greatest possible economy in the use of such lubricants.

And the said second party hereby agrees to furnish free transportation to such agents and employees of the said first party as may be designated by the said first party for purposes of supervision and inspection of the methods employed by the said second party in the handling and use of the lubricants furnished by the said first party. And the said second party further agrees to assist and cooperate with such agents and employees of the said first party in securing the most economical results possible in the use and handling of the lubricants furnished by the said first party.

It is especially stipulated and understood, however, that it shall not be within the province of any agent or employee of the said first party to give any *orders*, of any character whatever, to any official or employee of the said second party, or to change any methods or practices which may be in effect by orders of the officials of the said second party; it being distinctly understood and agreed that any apparent lack of care or bad practice that is not remedied by a simple suggestion from the agent or employee of the first party must be reported to the general manager of the said second party (or such of his officials as he may designate), and such report to be treated by the said general manager as he may deem fit and proper under the terms and spirit of this agreement.

3. The said second party agrees to make requisition upon the said first party for such lubricants as they may deem necessary for the proper and efficient lubrication of their equipment as herein specified, to accept same as herein provided, and to properly care for and distribute same so as to insure the greatest practicable degree of economy.

And the said second party agrees to pay for all lubricants received from the said first party, at the prices per gallon herein specified, at the end of each three (3) months, commencing with the date of this agreement, during which the respective shipments are received.

And the said second party agrees to furnish to the said first party a monthly statement, for each calendar month, showing the total number of miles run in each class of service (locomotives, passenger coaches, and freight cars), the number of gallons of each lubricant used in each class of service, the total (invoice) cost of lubrication in each class of service, and the cost per thousand miles run in each class of service.

4. When and after the guaranteed maximum total cost of lubrication in each class of service is made good as herein stipulated and specified, the said first party agrees to allow the said second party fifty cents (50 cts.) each for all empty barrels returned to the said first party in good condition, in carload lots, f. o. b. Knoxville, Tennessee, at the option of said second party; but it is understood and agreed that until such guaranties are made good all empty barrels in which the oils of the said first party are shipped are the property of the said first party, and the said second party shall be responsible for the return of such empty barrels to the said first party, in carloads, f. o. b. Knoxville, Tennessee.

5. In the event that either of the parties hereto should deem that the other is not carrying out the spirit as well as the letter of this agreement, this agreement may be cancelled at the option of either party hereto upon the giving of ninety (90) days' notice, in writing, of a desire for such cancellation.

In witness whereof we, the parties hereto, have set our hands this second (2nd) day of March, 1903.

NATIONAL PETROLEUM ASSOCIATION,
OFFICE OF
WILLIAM E. WALL, PRESIDENT.

CLEVELAND, OHIO, *March 2nd, 1908.*

DEAR SIRS: To show the practical effect of the reestablishment of prorating arrangements by the railroad companies to New England territory, the Western Trunk Line territory, and the reduction in rates to Pacific coast points, Mr. Kellog, counsel for the Government in the case of the United States vs. the Standard Oil Company, desires a statement made up showing the amount of increase to the individual refiners since their reduction. New England lines reestablished prorating rates about July, 1906, Western trunk lines July, 1907.

Wont you please make a statement showing the amount of increased barrel shipments to each of the territories over the preceding year of the dates given above, so that it can be shown in evidence that we are deriving benefit from these prorating arrangements? If it can not be shown that we have been benefited it's possible that the railroad companies may go back to the old arrangements. Try and have this statement in to Mr. Chamberlain, secretary, National Petroleum Association, Cleveland, by return mail.

Yours, very truly,

(Signed) W. E. WALL, *President.*

DEAR MADAM:

We want your attention for just three minutes. YOUR TIME IS WORTH SOMETHING, consequently WE PAY YOU FOR IT by enclosing our check, which can be presented to your dealer in your town and he will deliver to you FREE one-half gallon of NATIONAL LIGHT OIL OR WHITE ROSE GASOLINE. If your dealer does not keep either NATIONAL LIGHT OR WHITE ROSE GASOLINE, INSIST ON HIS KEEPING IT, as he can purchase it from us and we will redeem our checks from him.

Do you know why your lamp when burning emits an offensive odor? Why it smokes the chimney? Why it chars the wick? Because the oil you are using is low grade and made from poor crude oil. Besides in using low grade oil there is great danger from explosions.

NATIONAL LIGHT OIL and WHITE ROSE GASOLINE may cost a little more but they go further. As a comparison, say NATIONAL LIGHT OIL OR WHITE ROSE GASOLINE costs you 10c. per gallon more than the common, low grade oil or gasoline that are being offered, the average house does not consume to exceed 25 gallons of either oil or gasoline in a year and should you pay 10c. a gallon more for it it only amounts to $3.00 per year or about 20c. additional per month. Where is the housewife that will clean up dirty chimneys for 20c. a month, to say nothing about the light you are deprived of.

Is it not true that your gasoline stove is not working properly? It is not the stove, but the poor gasoline which is the cause of this trouble. It, like the low grade oil is made from cheap crude oil and contains sulphur, which clogs up the burners, makes a red flame, and gives very little heat.

WHITE ROSE GASOLINE is manufactured from Pennsylvania crude oil, is double refined and double deodorized.

We claim that WHITE ROSE GASOLINE is not only sweeter and better in every respect, but that it is more economical. One gallon of WHITE ROSE GASOLINE will produce the same amount of heat as one and one-quarter gallons of ordinary gasoline, which is sold at but a few cents per gallon less.

We should be pleased to have you correspond with us direct should your dealer not give you the proper goods.

Yours, respectfully,

THE NATIONAL REFINING COMPANY,
Wholesale Agent.

SAVE TROUBLE AND ANNOYANCE WITH YOUR GASOLINE STOVES BY USING WHITE ROSE GASOLINE.

NOTICE { In trying NATIONAL LIGHT OIL be sure and empty the lamp of the old oil, cleaning it thoroughly, put in a new, dry wick, and you will have the best of lights.
In trying WHITE ROSE GASOLINE, draw off all the old gasoline in the stove, then fill the reservoir with WHITE ROSE; it will burn with nice greenish flame of great heat; no odor.

Engine only.

DEFENDANTS' EXHIBIT 19.

ILLINOIS CENTRAL RAILROAD.

The average weight of all locomotives in service in 1906 was 130,507 lbs., and, in 1897, 100,656 lbs., an increase of 30 per cent. We have to-day in use 18 Pacific type passenger engines, each weighing 224,000 lbs., for engine alone.

DEFENDANTS' EXHIBIT 20.

The average tare weight of all freight cars in service in 1906 on the Illinois Central was 32,300 lbs., and in 1897, 27,000 lbs., an increase of 19.63 per cent. The tare weight of steel coal cars of 50 tons capacity to-day is 42,000 lbs., and with full load, with 10% above marked capacity, would be 152,000 lbs., against about 110,000 lbs. 15 years ago, or an increase of about 40%.

The average tonnage capacity of all freight cars in service in 1906 was 34.78 tons, and, in 1897, 24.42 tons, 42.51 per cent increase.

COST OF WASTE.

	Year ended Nov. 30/96	Year ended. June 30/07
On freight cars per 1000 tons hauled one mile	.0054	.0032
On locomotives per 1000 tons hauled one mile	.00112	.00071
On passenger cars per 1000 passenger car miles	.0950	.0721

LUBRICATION

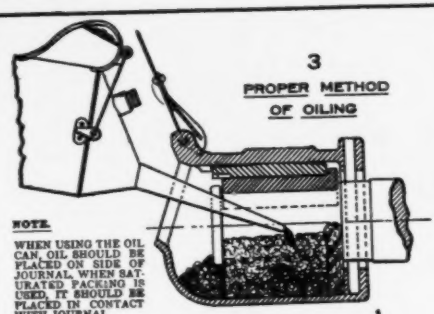

Instructions for the Preparation of Packing for Journal Boxes

1st. Submerge the waste in oil about 48 hours, then drain off surplus oil, allowing sufficient to remain to approximately equal four to five pints of oil per pound of dry waste, when the packing will be ready for use. This work should be performed in a room during cold weather, at a temperature of about 70 degrees.

2nd. The packing placed in journal box first should be in form of a roll pressed out moderately dry and packed tightly around back end of box, for the purpose not only of retaining the oil, but also to better exclude the dust, as shown on Diagram and Note Number 1.

3rd. Then proceed to pack the box, with loosely formed packing, as shown on Diagram and Note Number 2, sufficiently firm under the journal to avoid settling away, which is caused by shocks when car is in motion, packing it more lightly on each side of the journal, to avoid the wiping effect produced when waste is pressed too tightly between journal and side of box. Height of packing should not extend above center line of journal and not beyond inside of collar, as indicated on Diagram and Note Number 3, and thus avoid bad results caused by an excess of packing and boxes packed too tight.

4th. The portion of packing placed between end of journal and front end of box, being the last put in the box, (shown on Diagram No. 3), should have no thread connection with packing under or on side of journal, and should not extend more than one-half inch above lower edge of collar. This packing affords no means of lubrication to the journal, but prevents packing on sides and under journal from working forward out of normal position for satisfactory service.

3
PROPER METHOD OF OILING

NOTE.
WHEN USING THE OIL CAN, OIL SHOULD BE PLACED ON SIDE OF JOURNAL. WHEN SATURATED PACKING IS USED, IT SHOULD BE PLACED IN CONTACT WITH JOURNAL.

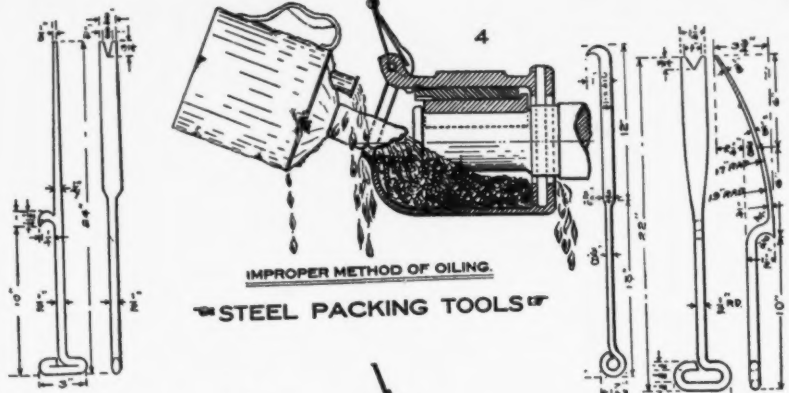

1

NOTE.
PACKING SHAPED THUS IN A TWISTED FORM TO BE PLACED IN BACK OF BOX, TO BETTER EXCLUDE DIRT, AND AVOID WASTE OF OIL.

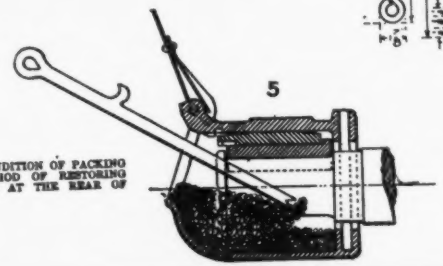

2

NOTE.
BALANCE OF BOX TO BE PACKED WITH LOOSELY FORMED PORTIONS THUS, PACKED FIRMLY UNDER, AND MORE LIGHTLY ON SIDES OF JOURNAL. THE PORTION IN FRONT OF BOX TO BE SEPARATE FROM THAT BACK OF COLLAR OF JOURNAL. THIS METHOD OF PACKING JOURNAL BOXES WILL PREVENT THE PACKING FROM BEING PULLED OUT OF POSITION ON THE SIDES AND BACK PORTION OF BOX.

4
IMPROPER METHOD OF OILING.

STEEL PACKING TOOLS

5

NOTE.
A BAD CONDITION OF PACKING AND METHOD OF RESTORING THE SAME AT THE REAR OF THE BOX.

Care of Packing in Journal Boxes

The most important part of the work for successful lubrication is, intelligent attention to the packing in boxes on equipment in service, and it briefly consists of lightly loosening up the packing on each side of journal to avoid the hardened and glazed condition, which is caused by the packing remaining too long in direct contact with journal. This work can be effectively accomplished by the use of a good steel tool, which should have a sharp V-shaped end, as shown on Diagrams, and thus secure a free flow of oil from packing to journal.

Attention should be given passenger equipment cars at intervals of one thousand miles run on the arrival at terminals, and on freight cars at such intervals as the condition of the packing will indicate that it is necessary, when examined at principal oiling stations. Oil should *not* be added to journal boxes until the condition of packing is ascertained to require oil, avoiding the excess use of same, as is evidenced by the accumulation on the wheels and outside of boxes.

When using the Oil Can, oil should be placed on side of journal, as shown by Diagram No. 3, and when Saturated Packing is used as a lubricant it should be placed in contact with journal.

Cars in shops for general repairs should have packing removed and boxes repacked with freshly saturated packing. Packing removed should be repicked and resaturated for future use. This work should not be done at closer intervals than twelve months, the object being to maintain an elastic condition of packing, and thus avoid the solid condition the packing assumes when allowed to remain in boxes for too long a time.

Brasses should not be transferred from one journal to another, and before applying suitable sized brasses the journal and the surface of the brass should be cleaned and oiled with Galena Car Oil or Centre Plate Grease.

All new and good second-hand journals should be protected from rust by the use of Centre Plate Grease.

A new close-fitting Dust Guard should be applied in all cases when removing wheels, and when practicable after a hot journal has occurred.

For the lubrication of journals by trainmen, Saturated Packing should be furnished; all packing removed should be returned to points where it is prepared for distribution.

Grit Publishing Co., Williamsport, Pa.

GALENA–SIGNAL OIL COMPANY.

QUESTIONS FOR DISCUSSION.

SEVENTEENTH ANNUAL CONVENTION

SALESMEN AND MECHANICAL EXPERTS

June, Nineteen Hundred and Eight

STREET RAILWAYS.

MACHINERY IN POWER HOUSES.

1. Would it not be well to have for use of experts simple models of power-house logs for small plants, where no systematic records are kept? Also, operating expense charts?
2. What are the advantages of filtering oil through oil rather than water in power stations?
3. In filtering engine, dynamo, and turbine oils, what benefits, if any, are derived from the use of water in the filters?
4. What is the best scheme for measuring the daily consumption of engine, dynamo, and turbine oils in power stations using filters, settling tanks, and a circulating system?
5. Best form of filters for gravity oiling system?
6. Has anyone found any device to save oil lost by filters overflowing, due to carelessness in operation?
7. Advisability of installing cooling apparatus between filters and storage tanks in gravity oiling system?
8. Which is the best way to make an efficient home-made oil filter?
9. What seems to be the matter with the Turner filter recommended by the G. E. Company for their Curtis turbines?
10. What is considered the best make of water trap?
11. What has been accomplished in the way of reclaiming valve oil in power plants?
12. Has any trouble been experienced from hot main bearings on large direct connected reciprocating units caused by generator?
13. Cylinder and valve lubrication of Corliss engines. What has proven to be in practice the best method under all conditions, the oil used being power house valve?
14. Has any difficulty been experienced in lubricating ends of exhaust valves on large Corliss engines?
15. Under favorable conditions, what per cent of the valve oil fed to high-pressure cylinder reaches the low-pressure cylinder of compound engines?
16. When a power house has been using high and low pressure valve oils, what success, not only as to mechanical conditions, but as

to cost, has been attained when Galena power house valve oil has been introduced?

17. Has any trouble been experienced by boiler compounds affecting cylinder lubrication?

18. When one cylinder in a pair of stationary engines requires more oil than the other, what is the cause?

19. What is the temperature of superheated steam for turbines? Are there any ill effects from high temperature?

20. Opinion of experts as to the advisability of using a special oil for the low pressure cylinders of compound condensing engines working under a high vacuum and low receiver pressure?

21. What progress has been made in removing hand oil pumps for cylinder lubrication on auxiliary engines?

22. When power-house engineers object to using engine oil to lubricate the piston-rod packing on account of the odor, what is the best way to meet that objection?

23. Is it necessary to use valve oil on piston rods of engines using metal packing?

24. What experience has there been with red metal piston packing?

25. Steam turbines. Parsons or Curtis. Oil used and results obtained.

26. What trouble has been encountered in turbine lubrication? What are the conditions and how remedied?

27. What experience and results obtained in the lubrication of a double flow (new) Westinghouse steam turbine?

28. Storage capacity and method of caring for oil used on turbine bearings.

29. What success has been obtained by the experts with Galena turbine oil; what troubles have been encountered; what remedies applied?

30. Relation and cost of lubrication for auxiliary machinery as to that of steam turbines.

31. As it is apparent that gas engines are being seriously considered as the coming engine, what are the requirements as to a suitable oil for lubrication of cylinders of same and best method of application?

32. What success and what has been the result in the lubrication of a Worthington convertible dry vacuum pump?

33. What kind of oil is adapted to lubricate a vertical high speed engine running in an oil bath so that emulsification will not take place?

34. Advisability of using cheap grade of oil on slow moving equipment, such as coal conveyors, ash hoists, etc.

35. What kind of oil is required to lubricate a gasoline engine?

ELECTRIC CAR LUBRICATION.

36. What is being done to overcome the necessity of oil cups in the old type motors?

37. Under average conditions, electric cars operated in city limits, what mileage can be made with wick feed cups before they require cleaning? What is the best method of cleaning?

38. Comparative cost per thousand miles run, four motor cars equipped with wick feed cups, with same type of car and motors, equipped with felt pads and waste?

39. For double truck cars with four motors, what is a fair average cost per thousand miles?

40. How often should felts be renewed that are used in slot in motor bearings?

41. What quality of lubrication is necessary for initial lubrication of a four-motor equipment?

42. What practices, if any, can motormen employ in handling of controllers that will cause generating of heat in armatures above normal running temperatures?

43. On G. E. 66 motor is it necessary to use any loose oil in the oil cellar designed to lubricate armature bearings?

44. Experience of experts with 50 C. armature bearings?

45. Should we use more strands of wicking in cups when used on a road running a low rate of speed than on high speed?

46. What should be done to keep water out of oil cups?

47. What experience have experts had with moisture gathering in armature boxes of new type motors? What remedy applied?

48. Have experts made any comparative mileage oiling tests on different kinds of packing for new type motor boxes and journal packing? How did Perfection packing show up in the tests?

49. Have any experiments been made on armature bearings with a very thin lining of babbit, so that in case of a hot bearing, armature will not go down?

50. Why does the Westinghouse Company recommend and use on their motors, bearings with a lead base formula, and the G. E. Company recommend a formula with a tin base.

51. Have any experiments been made with boring armature bearings eccentric?

52. What is the advantage and disadvantage of bottom feeds on old style motors?

53. Have experts had any trouble with loose fields on new type G. E. motors, so far as lubrication is concerned?

54. What material has been in competition on electric cars with Galena lubricants, and what were the results?

55. Are there any cases where the change from grease to oil in electric car lubrication has not been successful?

56. What is the best method to discover when a bearing is low and liable to let armature on pole piece?

57. What method have you found to be most economical for applying Galena oil to motor bearings designed for grease lubrication?

58. Is it not advisable that a proper hand oil can be adopted for filling cups and new type motors where oil is used in loose state? Would not an oil can similar to those used by locomotive engineers, with valve in end of spout, be helpful to produce saving and lessen cost?

59. What is the most economical method of lubricating G. E. 58 motor?

60. Has any trouble been experienced from Galena air compressor oil in gumming the engineer valves, triple and control valves on Westinghouse multiple unit control system?

61. Also, has any trouble been experienced with the oil freezing in winter?

62. What shall we recommend as a standard lubricant for brake rigging, that will not run or drop off? What is Marvin air brake compound?

63. What results have been obtained with Lumen bearings made by the Lumen Metal Company, Buffalo?

64. What experience have experts had with roller bearings for armatures and journals?

65. Are we paying as much attention to mechanical construction of axle bearings, collars, and their economical lubrication as we should?

66. What has been the experience of experts concerning dust guards for axle bearings and journals in sandy districts?

67. Of what benefit to the Galena-Signal Oil Company is the recommendation of the experts to street railways to square their trucks; what do the latter gain by it?

68. What has been the result of tests with side rod cars in Pittsburg? How does it affect the cost of power and lubrication?

69. When using gear lubricant, what is the proper amount for an initial lubrication, and at what mileage should an additional amount be added and what quantity? What, if any, is the increased mileage on a pound of gear lubricant as compared with a pound of gear grease? What, if any, is the saving in the consumption of power when using the gear lubricant as compared with the use of gear grease?

70. What results have been obtained with Galena gear lubricant as compared with Galena gear grease; also as compared with other gear lubricants?

71. How does extra heavy gear lubricant compare with Plomo as to service, adhesion to gear, and pinion? What conclusion have experts arrived at as result of tests, as to proper quantities, winter and summer gear lubricant, to be applied first application new gears, first application old gears, and period for next inspection and following applications? Does our new gear lubricant save and preserve pitch lines of gears and pinions? How does it affect costs per 1,000 miles?

72. Best method for applying gear grease to gear cases of electric cars, and what is a fair average cost per 1,000 miles run for city and interurban service?

73. Do any electric roads use car oil in the gear cases instead of gear grease, and do the results obtained warrant the change?

74. Where cars have a cement, concrete, or floor which will not permit of greasing gears from top, can we successfully apply extra heavy gear lubricant by using the old method of placing a large quantity in the gear pan, depending on gear to pick it up?

75. What is the result, generally, of gear lubrication (with any kind of gear grease) with the old method, so far as waste and bearing trouble are concerned?

76. Is a stiff fibrous gear grease to be preferred, or a granular one, and what difference is developed in the action of the gear upon either?

77. What method have you found to be most economical for applying track oil to curves?

78. Where trolley wheel and lubricated spindle is used, what attention is being given to this part of the equipment?

79. How many miles per hour should be allowed an electric locomotive for switching service, also construction cars in track department?

80. On heavy modern cars, when car journals, axle bearings, and motors are oiled on a mileage basis, what is the mileage schedule and the amount of oil used?

81. Highest mileage that has yet been obtained with one oiling, by journal bearings on high speed interurban cars?

82. Average mileage obtained on high speed interurban cars for armature bearings and motor axle bearings, with one oiling?

83. In large cities, would tank car or tank wagon (bulk delivery) be the more advantageous? Have we any such system in present practice? What is the saving to the railway and the Galena Company? How will such delivery affect costs?

84. Have any tests been made which are conclusive as to the best waste packing to use in street car truck journals?

LOCOMOTIVE LUBRICATIONS.

85. What improvements have been made on balanced compound engines whereby the service has been improved and the consumption of oil reduced?

86. What mileage to the pint of engine and valve oils on Mallett locomotives is considered economical, and what is the cost per 1,000 miles, including all lubrication of these double engines?

87. Lubrication of Malletts?

88. What has been the experience of experts with reference to the use of Galena valve oil for lubricating Skinner engines? If they have had any trouble with this type of engine, what has been the nature of the trouble?

89. Troubles and remedies of latest make cylinder lubricators?

90. Is a glossy appearance of cylinder surface an evidence of good lubrication?

91. The practice of using graphite for valve and cylinder lubrication?

92. With a 23 x 30 cylinder, what is a just amount of valve oil per 100 miles; good and bad water?

93. What results are obtained from the use of hemp for packing the cellars of drivers and engine trucks?

94. Economical results obtained by automatic compression cup as compared with screw.

95. What is the best method to prevent plugs and jam nuts from being lost off crank pin grease cups?

96. The proper location for oil cups on guides of locomotives equipped with what is known as the open or alligator guide.

97. Best way to refute statements frequently made, that economy of valve oil means a waste of fuel.

98. What comparative effect has miles per pint of valve oil upon miles per ton of coal?

99. What percentage of slide valves should be balanced?

100. Best method of applying piston valve cylinder bushings to get best results.

101. Is the Westinghouse air brake pump more economical to oil than the New York air brake pump?

102. To what extent has car oil been substituted for engine oil on locomotives for the year 1907 in comparison with the previous year?

103. The Franklin driving journal lubricator: The different types and for what type of locomotive each is best adapted. What improvements in connection with its use for better hub, shoe, and wedge lubrication?

104. What disposition or use can be made of the journal compound taken from the Franklin journal lubricators, which is unfit to remold and again use in the lubricator?

105. What is the best method of treating and disposing of grease removed from the cellars of locomotives undergoing repairs?

106. What methods are used for saving old grease?

107. Cause of driving journal compound charring and not feeding when under ordinary running temperature?

108. Hot box causing grease to melt out of cellar (Elvin lubricator); what is advisable to suggest to railway people to shorten time of failure?

109. Causes of hot driving boxes on heavy locomotives where grease cellars are used?

110. What results are obtained with engines equipped with Elvin grease cellars on long, continuous fast runs in passenger service?

111. Should bearings using either driving journal compound or rod cup grease be lined with white metal?

112. The necessity of investigating driving brasses that are removed on account of heating. This investigation should go far enough to prove up the faulty condition of the brasses as it exists.

113. What is best metal for hub liners for locomotive driving wheels?

114. Has the introduction of grease for driving boxes of locomotives brought about the expected increase in miles per pint of engine oil? If not, why?

115. What is the best method for shipping grease cakes for Franklin lubricators, from general stores to locomotive roundhouses to insure their being properly protected?

116. When locomotives are equipped with grease lubrication for journals and crank pins, what is a fair mileage to a pound of grease and driving-journal compound *combined?*

117. What reduction has been made in engine-oil allowances by the different experts where grease has been substituted for oil on crank pins or driving journals, and where grease has been substituted for oil on both crank pins and driving journals?

CARS.

118. Has the practice of hanging the brake on inside on four-wheel passenger trucks had a tendency to increase hot boxes?

119. What is the cause of more hot boxes during severe weather in winter, particularly passenger service, and what is the best method of obviating it?

120. What is the largest known mileage made to one packing of journal boxes in passenger-car service?

121. Does the relining of journal bearings have a tendency to cause hot boxes? To what extent is the practice of relining carried on?

122. Is it possible to reclaim wool waste taken out of journal boxes that have been through a flood of muddy water?

123. What system is used in your territory for the cleaning of old packing?

MISCELLANEOUS.

124. In past five years have not many hot bearings been due to poor brass, more particularly locomotive bearings where solid brasses have been used, and how can we detect this?

125. From which bearing metal on locomotive and car and motor equipment do we get the most economical cost and good service in lubrication?

126. What is considered the best method of bringing about economical results on the cost of locomotive lubrication, working among the enginemen alone or a fixed schedule enforced through cooperation of officials?

127. How can we best meet the question of lubrication where the hours in service are long and engine mileage short?

128. What has been the experience of experts where the organization has been changed from departmental to divisional?

129. Where the practice obtains of lubricating steam lines, is it done daily, weekly, or monthly, and what amount is used?

130. The conditions noticed after following cheap oils on roads, where Galena oils have been put in service.

131. Use of signal oil for lubrication of air cylinders of compressors. Is it advisable to recommend it for such purpose?

132. Other uses for Galena oils than for lubrication.

133. Why not use metal casks or barrels for shipment of oil to points west and south of Memphis, Tenn.?

PERFECTION SIGNAL OIL.

134. What results have been obtained by experts with Perfection Signal oil?

RAILWAY SAFETY OIL.

135. Are any roads using railway safety oil for lighting passenger cars, and what are the results as compared with Mineral Seal oil?

136. What results have been obtained by experts with railway safety oil?

DEFENDANTS' EXHIBIT 31.

SUGGESTIONS FOR CALCULATING WEIGHT ON JOURNAL BEARINGS.

Basis for calculating weight on journal bearings and the method of determining weight per square inch on crown of bearing when establishing limits of safety.

METHOD OF DETERMINING WEIGHT ON JOURNAL BEARINGS.

The method of calculating weight on journal bearings is generally well understood and scientifically established as clearly shown on diagram No. 1.

The object of this pamphlet is to definitely indicate that the projected area should be the established basis for the calculation.

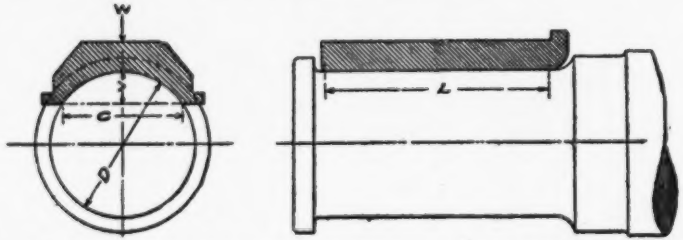

It is apparent as illustrated by diagram No. 2, that the maximum pressure is on crown of bearing and that this pressure decreases as we recede from the crown, owing to the increased surface occasioned by the curvature of the arc.

By referring to diagram No. 2, we find that the $\frac{1}{2}$ inch on crown is subtended by the arc of .501 of an inch, the second half inch by the same pressure is subtended by a larger arc, the third by a still larger arc, the pressure decreasing in proportion in consequence of the increase of the arc.

In order to establish the maximum weight on crown, which is a vital point in determining limits of safety, we can not resort to the arc in contact, because as illustrated the pressure is not uniform. It is therefore the projected area where pressure is uniform that forms the basis for consideration.

By reference to diagram No. 2, it will be found that while the pressure is 200 pounds on the projected area, it is only 199 pounds on the crown. This is shown and referred to to indicate that the curvature of the arc produces a greater surface and hence a slight decrease in weight. Therefore, when calculating weight on bearing, it is the chord and not the arc that must be taken as a basis for calculation.

METHOD OF CALCULATING PRESSURE PER SQUARE INCH ON JOURNALS.

L = LENGTH OF JOURNAL LESS RADII OF FILLETS, OR LENGTH OF CONTACT.
C = CHORD OF ARC IN CONTACT
V = VERSED-SINE, OR HEIGHT OF ARC IN CONTACT
D = DIAMETER OF JOURNAL.
$C = 2\sqrt{(D-V)V}$, OR LAY OUT FULL SIZE AND MEASURE IT.
A = PROJECTED AREA L X C
W = WEIGHT ON JOURNAL.
P = PRESSURE PER SQ. INCH ON JOURNAL = W ÷ A

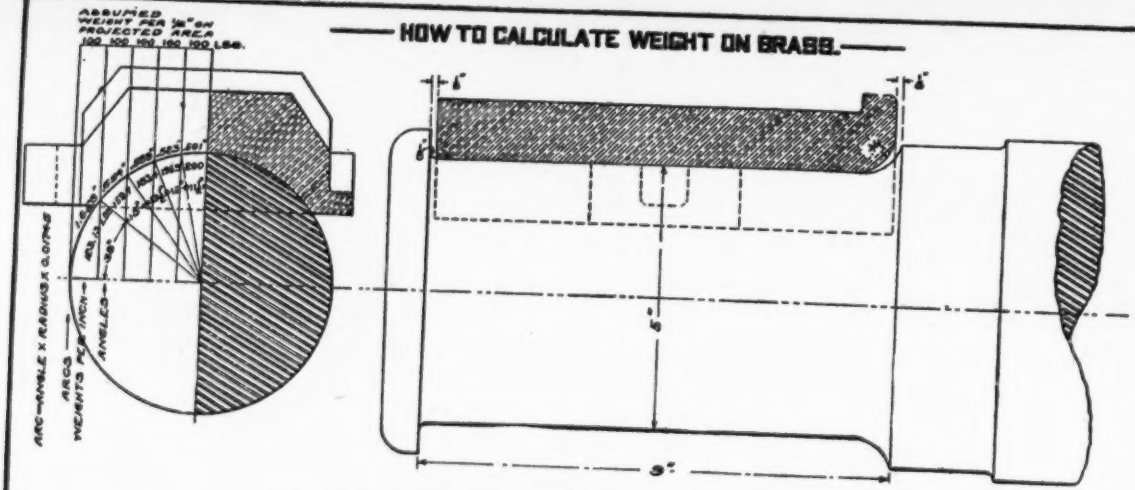

EXAMPLE. TAKE THE M.C.B. STD AXLE TO CARRY 30000 LBS. WITH NEW 5½"×10" JOURNALS, THEN W = 15000 #, D = 5½", V = ¼"; L = 8.875"; $C = \sqrt{(5\frac{1}{2}-\frac{1}{4})\frac{1}{4}} = 1.54$"; A = 8.875 × 4.64 = 40.350 IN. AND P = 15000 # ÷ 40.3 " = 372 LBS. PER SQ INCH OF PROJECTED AREA.
IN THE SAME MANNER IT CAN BE SHOWN THAT WITH A NEW 5"×9" AXLE, P = 465 LBS, & A NEW 4½"×8" AXLE P = 460 POUNDS.

THE ABOVE CALCULATIONS SHOW MAXIMUM CONDITIONS FOR NEW BEARINGS, AND AS ALL M.C.B. JOURNALS HAVE BEEN FOUND SATISFACTORY IN SERVICE, IT IS SAFE TO SAY THAT CAR JOURNALS CAN BE RUN UP TO 460 LBS. PER SQ. INCH WITHOUT HEATING WHEN PROPERLY LUBRICATED.

FOR ANY WEIGHT OF CAR THE PRESSURE ON JOURNALS CAN BE CALCULATED BY TAKING THE LIGHT WEIGHT OF CAR PLUS THE LOAD WITH 10% ADDED FROM WHICH DEDUCT THE WEIGHT OF WHEELS AND AXLES, THE REMAINDER DIVIDED BY THE NUMBER OF JOURNALS GIVES THE NET WEIGHT ON EACH JOURNAL.

NO. 1.

HOW TO CALCULATE WEIGHT ON BRASS.

ARC OF 114° BEARING AREA 5×9 INCH JOURNAL.

CIRCUM. OF JOURNAL = 5 × 3.1416 = 15.708; $\frac{114}{360}$ OR $\frac{19}{60}$ OF 15.708 = 4.975; LENGTH OF BEARING = $7\frac{5}{8}$ OR 7.675; AREA OF BEARING = 4.975 × 7.675 = 38.176 SQ. IN. 60,000 LBS. CAPACITY OF CAR ÷ 10 $\frac{5}{8}$ = 30,000 LBS. DEAD WEIGHT = 118,000 LBS. LESS 6600 LBS. THE WT. OF WHEELS AND AXLES = 111200 LBS. THE WEIGHT ON EACH JOURNAL = $\frac{1}{8}$TH OF 111200 LBS = 13900 LBS. THE WT. PER AVERAGE SQ. IN. ON EACH JOURNAL = 13900 LBS ÷ 38.176 = 364 LBS.

CHORD OF 114° BEARING AREA 5×9 INCH JOURNAL

CHORD OF ARC OF 114° = 4.19; LENGTH OF BEARING = 7.675; AREA = 4.19 × 7.675 = 32.67, WITH SAME CAR. WEIGHT PER SQ. IN. = 13900 ÷ 32.67 = 425 LBS. DIFFERENCE = 60 LBS PER SQ. IN.

CHORD-OF-BRASS-MULTIPLIED-BY-ITS-LENGTH-GIVES-ITS-PROJECTED AREA.

A.P.S.

NO. 2.

DEFENDANTS' EXHIBIT 32.

LIST OF QUESTIONS FOR USE IN THE EXAMINATION OF LOCOMOTIVE ENGINEERS FOR EMPLOYMENT AND OF FIREMEN FOR PROMOTION IN CONNECTION WITH THE GENERAL SUBJECT OF LUBRICATION.

1. Q. What is friction?—A. Two surfaces coming in contact with motion.
2. Q. What is the result of excessive friction?—A. High-running temperature and hot bearings.
3. Q. How can friction be reduced to the least possible degree?—A. By lubrication.
4. Q. What is lubrication?—A. Separating two surfaces and keeping them apart while in motion by a film of oil.
5. Q. What oil should be used for this purpose?—A. Engine oil for all parts of the locomotive excepting valves, cylinders, and air pumps.
6. Q. Why should we confine ourselves to the use of engine oil on machinery?—A. It has greater strength to hold up the load; is more limpid, and will reach the bearing quicker.
7. Q. What examination should be made by engineer to insure successful lubrication?—A. See that all oil holes are open, cups filled and in good working order, and packing in cellar and in contact with journal.
8. Q. Why is it necessary to keep packing in cellar in contact with journal?—A. On account of the large journals and bearings, it is found necessary to depend upon this system for successful lubrication and exclusion of dust.
9. Q. How should engine oil be used?—A. With a small opening in spout of oil can and in limited quantities to avoid overflow of oil, keeping in mind always that only a small amount can pass between the two surfaces and that all other is wasted, resulting in an accumulation of dust and dirt on machinery.
10. Q. When and at what intervals should engine oil be used?—A. As short a time as possible before leaving terminals and at such times upon examination as found necessary by the increasing temperature, which should be determined by placing hand upon bearing.
11. Q. How should feeders of all oil cups be adjusted?—A. To feed as small a quantity of oil as possible for perfect lubrication, to avoid the possibility of cups becoming empty with a "moderate increase in temperature," resulting in a hot bearing and cut journal.
12. Q. Why is it bad practice to keep engine oil close to boiler in warm weather?—A. The oil is thinned to such a degree that it runs off as soon as applied, and often a hot bearing is the result.
13. Q. How often should tank truck boxes be oiled?—A. Once every 1,500 miles will be sufficient, if packing is kept up and in contact with journal.
14. Q. In what manner would you care for hot bearings when discovered on road?—A. Use as much time as available in cooling the same, making sure that all moving parts are free and carefully lubricated before proceeding.
15. Q. What kind of oil should be used on hot bearings?—A. Engine oil, unless temperature of bearing consumes it, when small quantity of valve oil bay be used. The valve oil must be removed, however, as soon as the bearing cools, to prevent reheating.

16. Q. Why is it bad practice to use valve or solidified oil on journal bearings?—A. The consistency of these oils will clog fibers of the waste, and prevent the fluid oil from feeding to bearing.

17. Q. At completion of trip what is necessary?—A. Close all adjustable feeds, and examine all lubricated parts by contact with hand to determine that they are not above running temperature.

18. Q. How would you determine what boxes to report examined?—A. By placing the hand on driving box on hub of engine truck and on top of tender truck boxes, and would not report them examined unless the temperature of same was above running heat.

19. Q. Why not report all boxes examined?—A. All boxes do not give trouble at the same time, and if this was done it would appear that proper inspection had not been made; it also results in unnecessary work and waste of material.

20. Q. Why is it bad practice to disturb the packing on top of driving and engine truck boxes with spout of oil can when oiling engine?—A. This packing is put on top of boxes to assist in keeping dust and dirt out of oil holes; also to aid in gradual lubrication from the top; if disturbed it will permit the dust and dirt to work into oil holes and on to bearings, as well as feed the oil away too rapidly.

21. Q. When should this packing be disturbed?—A. It should not be disturbed in any case except when it is found that oil does not go through, in which case tops of boxes and oil holes, also journals, should be thoroughly cleaned by water or air under pressure before repacking.

22. Q. On what bearings should solidified oil be used?—A. Only on bearings equipped with pressure cups.

23. Q. How do you adjust these pressure cups as applied to rods?—A. Loosen jam nut, screw down plug with short wrench, until you feel slight resistance, then tighten jam nut. This should be sufficient over division.

24. Q. What effect does too much pressure produce?—A. Undue friction on bearing and liability of damage to cups or lubricators.

25. Q. Why should engine oil not be used on valves and cylinders?—A. Because the fire-test engine oil is less than the temperature of steam at working pressure.

26. Q. What is fire test?—A. The number of degrees of temperature at which oil is consumed.

27. Q. What is the fire test of engine oil? Of valve oil?—A. Engine oil, about 300 degrees; valve oil, about 600 degrees.

28. Q. What is the average running temperature of machinery other than valves and cylinders?—A. 80 degrees in slow service; 125 degrees in fast service.

29. Q. How and by what means are valves, cylinders, and air pumps lubricated?—A. By the use of valve oil, through a lubricator.

30. Q. How should lubricator be filled?—A. First, close all valves connected with lubricator, open drain cock and remove filling plug, allowing water to escape until oil appears; drain cock should then be closed. Apply oil in the usual way, being careful not to overflow lubricator. Filling plug should then be replaced.

31. Q. After filling lubricator what should be done?—A. Open steam throttle to lubricator, then carefully open water valve, but do not open feed until glasses are filled with water.

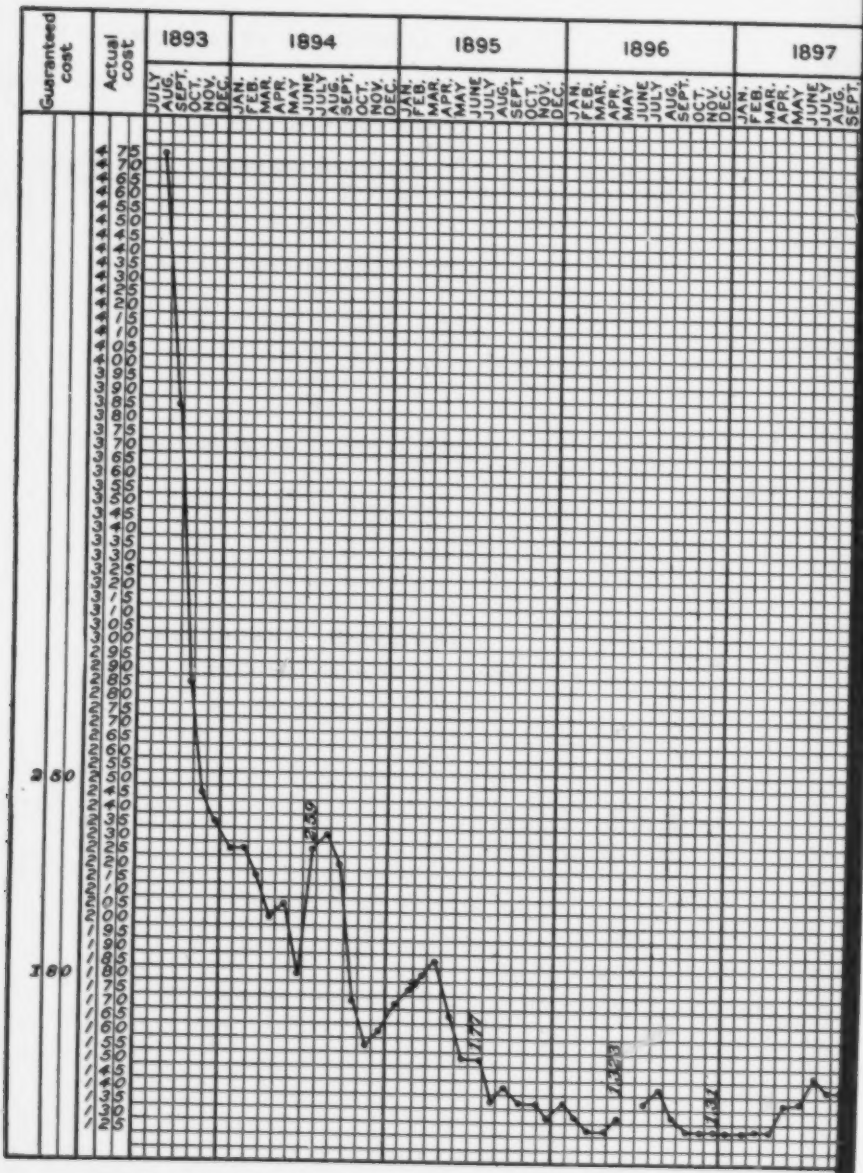

32. Q. How long before leaving terminal should feed valves be opened?—A. Fifteen to twenty minutes.

33. Q. How many drops of oil should be fed per minute?—A. One to seven, timed by watch, depending on the service the engine is in.

34. Q. Why is it bad practice to carry water too high in boiler?—A. Wet steam will wash oil from valve seats and walls of cylinders, necessitating excessive use of valve oil.

35. Q. When valves appear dry when using steam, and lubricator is working all right, what would you do to relieve condition?—A. Ease or shut off throttle for a few seconds, to allow oil that is in oil pipes to flow down.

CHICAGO, *May 4, 1905.*

Mr. W. E. HODGES, G. P. A.,
The Atchison, Topeka & Santa Fe Ry. Co.,
Chicago, Illinois.

DEAR SIR: The American Brake Shoe & Foundry Company proposes to furnish to the Atchison, Topeka & Santa Fe Railway Company shoes for its entire locomotive driver equipment on the following terms and conditions:

Style of shoe to be at our option. The Perfecto Shoe or the Streeter steel back shoe, either shoe to have a steel back and steel or wrought iron attaching lugs.

Price. Per net ton.
For Perefecto shoe $70.00
Delivery. For Streeter steel back shoe 70.00
Payment. f. o. b. your rails.
Sixty days net.

Shall be for three years from 1st day of January, 1905, and it shall continue thereafter with the 10% saving guarantee hereinafter mentioned, unless three months prior to the expiration of the third year of this contract, or three months prior to the expiration of any calendar year thereafter, a notice by other party shall be given to the other of an intention to cancel the same at the end of the then current calendar year.

Term of this contract.

The brake shoe company will carry in stock one month's supply of shoes to insure prompt delivery, which, upon the termination hereof for any cause, the railway company agrees to take from the brake shoe company at contract prices.

Stock of shoes.

The brake shoe company guarantees the railway company that the exclusive use of brake shoes above named upon its locomotive driver wheels shall not cost the railway company during the year 1905 for shoes actually put in service more per 1,000 engine miles than the shoes used during the year 1904 would have cost during this year, 1905, had they been used; that during the year 1906 the exclusive use of the shoes above named shall show a saving to the railway company per 1,000 engine miles of 5% on what it would have cost the railway company during said year to have used the shoes used by it during the year 1904; that during the year 1907, and thereafter, the exclusive use of the shoes above named shall show a saving to the railway company per 1,000 engine miles of 10% on what it would have cost the railway company during said year to have used the shoes used during the year 1904.

Guarantee.

In order to determine the mileage cost of brake shoes used during the year 1904, and also during the succeeding years, reference shall be had to the issuance record of the storekeeper of the railway and to the engine mileage record kept by the railway company and an annual statement shall be made up by the railway company showing the number, kind, tonnage, and cost of each kind of shoe actually issued by the storekeeper during the

Method of determining mileage cost of brake shoes used during the year 1904 and each y'r of this contract.

preceding year and also showing the number of engine miles run during said year, and a copy of this shall be furnished the brake shoe company. From these figures shall be ascertained the cost per 1,000 engine miles of the shoes issued.

In making up the statement of engine miles run during each year of this contract, so far as may be possible, the number of miles run by each class of locomotives shall be stated separately.

Method of ascertaining basis of guaranteed savings.

In determining whether the brake shoe company has performed its guarantee each year of this contract, the cost to which the railway company would have been put, had it used the Player shoe, which is the shoe that was used during the year 1904, shall be ascertained as follows:

The cost of the Player shoe for the year 1904 per 1,000 engine miles shall be the basis of estimate, and it is agreed that the cost of said shoe per 1,000 engine miles for the year 1904 shall be ascertained and agreed upon by the parties hereto, on or before November 1st, 1905, and when so agreed upon, shall become a part of this contract; it is also agreed that the average cost to the railway company per net ton of Player shoes issued by the storekeeper of said railway during the year 1904 shall be ascertained and agreed upon within a like period, and shall thereupon become a part of this contract; it is also agreed that the average cost of No. 2 local foundry pig iron at Chicago for the year 1904 was $14 per gross ton.

To ascertain what the cost per 1,000 miles to the railway company would have been had the Player shoe been used instead of the shoes mentioned in this contract during any calendar year thereof, the cost per 1,000 miles of the Player shoe for the year 1904 shall be increased or diminshed 66⅔% of the increase or decrease in the cost of said No. 2 local foundry pig iron at Chicago in the year under consideration over or under the cost of said pig iron in the year 1904. The cost of said pig iron in any calendar year of this contract shall be ascertained by taking the average of the quotations for No. 2 local foundry pig iron at Chicago as given in the first issue of the Iron Age each month in said year.

For example: If the average cost of No. 2 local foundry pig iron at Chicago for any calendar year of this contract should be $17 per gross ton, an increase of $3 over the price for 1904, the cost per 1,000 engine miles of using the Player shoes during the year under consideration shall be ascertained as follows:

To the price per net ton of Player shoes issued in the year 1904, as ascertained and agreed upon, shall be added $2, which is 66⅔% of the increase in No. 2 foundry pig, and from this increased ton cost of Player shoes over the ton cost in 1904, shall be ascertained what the cost per 1,000 engine miles in 1904 would have been, and that cost so ascertained shall be the cost per 1,000 engine miles for the year under consideration, with which cost comparison shall be made to ascertain whether the brake shoe company has performed its guarantee.

Inspection.

The brake shoe company shall have the right to send a representative at such time or times as it may deem best during the continuance of this contract, to the various division points of the railway company, for the purpose of instructing the railway company's employees in the use of the

steel back shoe, and examining and inspecting the brake shoes in service, in stock and in scrap piles, and the railway company shall furnish free transportation to such inspector when so engaged. The inspector shall furnish duplicate reports to the superintendent of motive power, and be subject to such reasonable regulations and restrictions in the performance of his duties as the superintendent of motive power may prescribe.

The brake shoe company agrees to protect and indemnify the railway company against any and all suits for infringement of letters patent of the United States on account of the use of said brake shoes, and from any final judgment rendered by any court having jurisdiction of the subject matter.

Infringement of patents.

An acceptance of this proposition shall constitute a contract between us.

Yours truly,

AMERICAN BRAKE SHOE & FOUNDRY COMPANY,
By JOS. B. TERRELL, *2nd Vice-Prest.*

Accepted:
By W. E. HODGES,
General Purchasing Agent.

DEFENDANTS' EXHIBIT 40.

[Duplicate.]

Contract between the Galena-Signal Oil Company, of Franklin, Pa., party of the first part, and the Philadelphia Rapid Transit Company, of Philadelphia, Pa., party of the second part; witnesseth:

FIRST PARTY.

Section 1. Prices and delivery. The first party agrees to sell to the second party, on orders of its authorized agent, a full supply of ~~Signal oil and~~ the following named lubricants, which the second party may require for the lubrication of its rolling equipment, during the period of this contract, upon terms as follows:

Galena electric car oil, for car and motor journals	20c.	per gallon
Galena air compressor oil	25c.	per gallon
Galena motor grease, for motor bearings where oil can not be introduced	7½c.	per pound
Galena gear grease	4c.	per pound
~~Perfection Signal Oil~~		

Above prices are for the oils and greases named delivered in barrels, f. o. b., at Philadelphia, Pa.

Section 2. Cost guaranty. The first party hereby guarantees that in the exclusive use of these lubricants for the respective purposes for which they are intended, the average cost to the second party for lubricating its rolling equipment shall not exceed $0.1206 per thousand passenger car miles run of such equipment.

Section 3. Refund of excess over guaranty. The first party agrees to refund to the second party the excess upon proper bill being rendered, if at the expiration of each yearly term, the second party's reports (provided for in section 6) verified by the first party, show the cost of lubricants consumed in the lubrication of its rolling equipment to have exceeded the guaranteed cost. Should the cost of lubricants so used fall below the guaranteed cost, the saving thus effected shall accrue to the second party.

Section 4. Allowance and deductions for empty barrels. ~~The first party agrees to pay the second party for empty barrels in which it shall have shipped oil or grease to the second party, returned in good order, f. o. b., at _____ at, $_____ each for oil barrels, and $_____ each for grease barrels, with proper deductions for imperfect barrels.~~ Empty packages to be sold in Philadelphia, and credit given lubrication account.

SECOND PARTY.

Section 5. Purchase of signal oil and lubricants and payment of invoices. The second party agrees to purchase, during the term hereof, its entire supply of ~~Signal oil, and~~ lubricants for its rolling equipment from the first party, and to pay the invoices of the first party covering such ~~Signal oil and~~ lubricants delivered in accordance with section 1, within sixty days of date of invoice, without discount for earlier payment, provided, however, that the second party may withhold until final settlement payment of invoice cover-

ing delivery of lubricants sufficient to protect it against any excess cost over the guaranteed cost, as may be shown by monthly statements to be rendered the first party (as provided for in section 6).

Section 6. Reports and inventories to be furnished the first party.

The second party agrees to render the first party monthly statements, upon blanks supplied by the first party, showing the total miles run by the rolling equipment, and the quantity and cost of each kind of lubricant consumed thereon; also, a correct and complete inventory of each kind of lubricant on hand at the date of the beginning and ending of each yearly term hereof.

MUTUAL OBLIGATIONS.

Section 7. Expert service and co-operation to be rendered.

The first party will furnish as many inspectors or experts as it may deem necessary to look after the economical use and give instructions in the proper application of these oils and lubricants; such service to be free of charge excepting that the second party is to furnish them free transportation over its railway and render necessary co-operation to the end that the best results may be obtained, and the cost of lubrication be reduced as low as possible consistent with good service.

Section 8. Basis of computing cost.

In computing the cost of lubricants consumed, during the term hereof, to compare with the guaranteed cost, as per section 2, the lubricants shall be charged in at the invoice prices named in section 1 (excepting such other lubricants as may be on hand at beginning of contract which shall be charged in at prices paid for same), less the value of all lubricating barrels at prices as per section 4. Lubricants used for initial lubrication of new equipment installed during the period of this contract shall not be included in the cost per thousand miles run.

Section 9. Increase or alteration in equipment — allowance to be made.

Should the second party, during the term hereof, increase or alter its equipment, as compared with the equipment at the time of making this contract, thus causing an increase in the cost of lubrication per thousand miles run, allowance shall be made for such changes when final settlement is made under this contract.

Section 10. Consolidation with other lines.

Should the second party, during the term hereof, acquire control of other lines, this contract is to be extended to cover such lines on a similar guaranty based upon the operations for the twelve months prior to its acquisition; should, however, such lines at the time of the acquisition, have a similar guaranteed contract with the first party, such contract is to be continued until its expiration.

Section 11. Oil cups.

The first party will lease to the second party, at the latter's option, oil cups at the rate of 35 cents and 25 cents each, respectively, as per list attached hereto, under conditions as follows: The second party to pay the first party for cups within sixty days of date of delivery, and shall retain the use of said cups so long as it shall continue to use exclusively lubricants to be furnished by the first party. Said cups shall be applied to the equipment by and at the expense of the second party. If at any time the second party shall discontinue the use of

lubricants furnished by the first party, the first party will, on return of said cups in good condition, refund the amount paid by the second party for same; if, however, the second party elects to retain the cups or fails to return them in good condition, it shall pay to the first party 75 cents additional for each cup not so returned. The said cups shall be removed from the equipment by and at the expense of the second party, and shall be returned free of charge to the first party.

Section 12. Settlement. Final settlement to be made at the expiration of this contract.

Section 13. Term. This contract, signed in duplicate, shall be binding upon the parties hereto, their respective successors and assigns, and remain in full force and effect for one year, from June 1, 1907, to June 1, 1908.

In witness whereof, the parties hereto have caused this contract to be signed in their respective corporate name, by their duty authorized officer or agent, this 31st day of May, 1907.

DEFENDANTS' EXHIBIT 41.

DUPLICATE.

Contract between the Galena-Signal Oil Company, of Franklin, Pa., party of the first part, and the Pittsburg Railways Company, of Pittsburg, Pa., party of the second part, witnesseth:

FIRST PARTY.

Section 1. Prices and delivery. The first party agrees to sell to the second party, on orders of its authorized agent, a full supply of signal oil and the following named lubricants, which the second party may require during the period of this contract, upon terms as follows:

Galena electric car oil, for car and motor journals	20c.	per gallon
Galena power house valve oil	50c.	" "
Galena power house engine oil	30c.	" "
Galena dynamo oil	40c.	" "
Galena air compressor oil	25c.	" "
Galena crank case oil	25c.	" "
Galena track oil, for curves and switches	10c.	" "
Galena motor grease, for motor bearings where oil can not be introduced	7½c.	" pound
Galena gear grease	4c.	" "
Perfection signal oil	36c.	" gallon
Galena turbine oil	35c.	" "
Galena gear lubricant	12c.	" pound

Above prices are for the oils and greases named delivered in barrels, f. o. b., at power stations and car barns at Pittsburg and Allegheny, Penn'a.

Section 2. Cost guaranty. The first party hereby guarantees that in the exclusive use of the lubricants furnished by it for the respective purposes for which they are intended, the average cost to the second party for the lubrication of its rolling equipment shall not exceed $.30 per thousand miles run of such equipment, and for lubricating machinery in power plants and sub-stations, shall not exceed $.15 per ~~engine-hour run or~~ thousand kilowatt hours output by such plants.

Section 3. Refund of excess over guaranty. If the total cost of lubricants consumed in the services above mentioned combined at the end of the year, as may be shown by monthly reports (provided for in section 6) verified by the first party, should exceed the guaranteed costs combined, based on the units of work performed, then the first party is to refund to the second party an amount equal to such excess. Should, however, the total cost of lubricants so used fall below the combined guaranteed costs the saving thus effected shall accrue to the second party.

Section 4. Allowance and deductions for empty barrels. The first party agrees to pay the second party for empty barrels in which it shall have shipped oil or grease to the second party, returned in good order, f. o. b., at Pittsburg, Pa., at $1.00 each for oil barrels, and $.65 each for grease barrels, with proper deductions for imperfect barrels.

SECOND PARTY.

Section 5. Purchase of signal oil and lubricants and payment of invoices.

The second party agrees to purchase, during the term hereof, its entire supply of signal oil and lubricants for use on track curves, rolling equipment, machinery, and power plants from the first party, and to pay the invoices of the first party covering same, delivered in accordance with section 1, within sixty days of date of invoice, without discount for earlier payment, provided, however, that the second party may withhold until final settlement payment of invoices covering deliveries sufficient to protect it against any excess cost over the guaranteed cost, as may be shown by monthly reports to be rendered by the second party (provided for in section 6).

Section 6. Reports and inventories to be furnished the first party.

The second party agrees to render the first party monthly statements, upon blanks supplied by the first party, showing the total miles run by the rolling equipment, the engine hours run or kilowatt hours output in power plants and substations, and the quantities of each kind of lubricants consumed; also, a correct and complete inventory of each kind of lubricant on hand at the date of the beginning and ending of each yearly term hereof.

MUTUAL OBLIGATIONS.

Section 7. Expert service and cooperation to be rendered.

The first party will furnish as many inspectors, or experts, as it may deem necessary to look after the economical use and give instructions in the proper application of these oils and lubricants; such service to be free of charge excepting that the second party is to furnish them free transportation over its railway and render necessary cooperation to the end that the best results may be obtained, and the cost of lubrication be reduced as low as possible consistent with good service.

Section 8. Basis of computing cost.

In computing the cost of lubricants consumed, during the term hereof, to compare with the guaranteed cost, as per section 2, the lubricants shall be charged in at the invoice prices named in section 1 (excepting such other lubricants as may be on hand at beginning of contract, which shall be charged in at prices paid for same), less the value of all barrels at prices as per section 4. Lubricants used for initial lubrication of new equipment installed during the period of this contract shall not be included in the cost per thousand miles run, or engine-hour run, or kilowatt-hours output.

Section 9. Increase or alteration in equipment — allowance to be made.

~~Should the second party, during the term hereof, alter its car equipment or make any additions to its power plants or other machinery, causing an increase in the cost of lubrication per thousand miles run of cars or per engine hour run or kilowatt hours output as against the comparative period or as obtained at the time of making this contract, proper allowance shall be made for such changes when final settlement is made under this contract.~~

Should the second party, during the term hereof, acquire control of other lines, this contract is to be extended to cover such lines on a similar guaranty based upon the operations for the twelve months prior to its acquisition; should, however, such lines at the time of the acquisition have a similar guaranteed contract with the first party, such contract is to be continued until its expiration.

Section 10. Consolidation with other lines.

~~The first party will lease to the second party, at the latter's option, oil cups at the rate of 35 cents and 25 cents each respectively as per list attached hereto, under conditions as follows: The second party to pay the first party for cups within sixty days of date of delivery, and shall retain the use of said cups so long as it shall continue to use exclusively lubricants to be furnished by the first party. Said cups shall be applied to the equipment by and at the expense of the second party. If at any time the second party shall discontinue the use of lubricants furnished by the first party, the first party will, on return of said cups in good condition, refund the amount paid by the second party for same; if, however, the second party elects to retain the cups, or fails to return them in good condition, it shall pay to the first party 75 cents additional for each cup not so returned. The said cups shall be removed from the equipment by and at the expense of the second party, and shall be returned free of charge to the first party.~~

Section 11. Oil cups.

Final settlement to be made at the expiration of this contract.

Section 12. Settlement.

This contract, signed in duplicate, shall be binding upon the parties hereto, their respective successors and assigns, and remain in full force and effect for one year, from January 1, 1908, to January 1, 1909.

Section 13. Term.

In witness whereof, the parties hereto have caused this contract to be signed in their respective corporate name, by their duly authorized officer or agent, this 15th day of January, 1908.

THE GALENA-SIGNAL OIL COMPANY,
By GEO. A. VARNES, *Asst. Mgr.*
THE PITTSBURG RAILWAYS COMPANY,
By JAMES D. CALLERY, *President.*

DEFENDANTS' EXHIBIT 42.

[Duplicate.]

Contract between the Galena-Signal Oil Company, of Franklin, Pa., party of the first part, and the Metropolitan Street Railway Company, of Kansas City, Mo., party of the second part, witnesseth:

FIRST PARTY.

Section 1. Prices and delivery.

The first party agrees to sell to the second party, on orders of its authorized agent, a full supply of signal oil and the following named lubricants, which the second party may require during the period of this contract, upon terms as follows:

Galena electric car oil, for car and motor journals	22c.	per gallon
Galena power house valve oil	52c.	" "
Galena power house engine oil	32c.	" "
Galena dynamo oil	42c.	" "
Galena air compressor oil	27c.	" "
Galena crank case oil	27c.	" "
Galena track oil, for curves and switches	12c.	" "
Galena motor grease, for motor bearings where oil can not be introduced	7¾c.	" pound
Galena gear grease	4¼c.	" "
Perfection signal oil	38c.	" gallon
Galena turbine oil	37c.	" "
Galena gear lubricant	12¼c.	" "

Above prices are for the oils and greases named delivered in barrels, f. o. b., at car barns and power houses of the second party in Kansas City, Mo., and Kansas City, Kans.

Section 2. Cost guaranty.

The first party hereby guarantees that in the exclusive use of the lubricants furnished by it for the respective purposes for which they are intended, the average cost to the second party for the lubrication of its rolling equipment shall not exceed $.20 per thousand miles run of such equipment, and for lubricating machinery in power plants and sub-stations, shall not exceed $.12 per engine hour run or thousand kilowatt hours output by such plants.

Section 3. Refund of excess over guaranty.

If the total cost of lubricants consumed in the services above mentioned combined at the end of the year, as may be shown by monthly reports (provided for in section 6) verified by the first party, should exceed the guaranteed costs combined, based on the units of work performed, then the first party is to refund to the second party an amount equal to such excess. Should, however, the total cost of lubricants so used fall below the combined guaranteed costs the saving thus effected shall accrue to the second party.

Section 4. Allowance and deductions for empty barrels.

The first party agrees to pay the second party for empty barrels in which it shall have shipped oil or grease to the second party, returned in good order, f. o. b., at Franklin, Pa., at $1.00 each for oil barrels, and $.65 each for grease barrels, with proper deductions for imperfect barrels.

SECOND PARTY.

The second party agrees to purchase, during the term hereof, its entire supply of signal oil, and lubricants for use on track curves, rolling equipment, machinery and power plants from the first party, and to pay the invoices of the first party covering same, delivered in accordance with section 1, within sixty days of date of invoice, without discount for earlier payment, provided, however, that the second party may withhold until final settlement payment of invoices covering deliveries sufficient to protect it against any excess cost over the guaranteed cost, as may be shown by monthly reports to be rendered by the second party (provided for in section 6).

Section 5. Purchase of signal oil and lubricants and payment of invoices.

The second party agrees to render the first party monthly statements, upon blanks supplied by the first party, showing the total miles run by the rolling equipment, the engine hours run or kilowatt hours output in power plants and substations, and the quantities of each kind of lubricants consumed; also, a correct and complete inventory of each kind of lubricant on hand at the date of the beginning and ending of each yearly term hereof.

Section 6. Reports and inventories to be furnished the first party.

MUTUAL OBLIGATIONS.

The first party will furnish as many inspectors, or experts, as it may deem necessary to look after the economical use and give instructions in the proper application of these oils and lubricants; such service to be free of charge excepting that the second party is to furnish them free transportation over its railway and render necessary cooperation to the end that the best results may be obtained, and the cost of lubrication be reduced as low as possible consistent with good service.

Section 7. Expert service and cooperation to be rendered.

In computing the cost of lubricants consumed, during the term hereof, to compare with the guaranteed cost, as per section 2, the lubricants shall be charged in at the invoice prices named in section 1 (excepting such other lubricants as may be on hand at beginning of contract which shall be charged in at prices paid for same), less the value of all barrels at prices as per section 4. Lubricants used for initial lubrication of new equipment installed during the period of this contract shall not be included in the cost per thousand miles run, or engine hour run, or kilowatt hours output.

Section 8. Basis of computing cost.

Should the second party, during the term hereof, alter its car equipment or make any additions to its power plants or other machinery, causing an increase in the cost of lubrication per thousand miles run of cars or per engine hour run or kilowatt hours output as against the comparative period or as obtained at the time of making this contract, proper allowance shall be made for such changes when final settlement is made under this contract.

Section 9. Increase or alteration in equipment — allowance to be made.

Should the second party, during the term hereof, acquire control of other lines, this contract is to be extended to cover such lines on a similar guaranty based upon the operations for the twelve months prior to its acquisition; should, however, such lines at the time of the acqui-

Section 10. Consolidation with other lines.

sition, have a similar guaranteed contract with the first party, such contract is to be continued until its expiration.

The first party will lease to the second party, at the latter's option, oil cups at the rate of 35 cents and 25 cents each respectively as per list attached hereto, under conditions as follows:

Section 11. Oil cups. The second party to pay the first party for cups within sixty days of date of delivery, and shall retain the use of said cups so long as it shall continue to use exclusively lubricants to be furnished by the first party. Said cups shall be applied to the equipment by and at the expense of the second party. If at any time the second party shall discontinue the use of lubricants furnished by the first party, the first party will, on return of said cups in good condition, refund the amount paid by the second party for same; if, however, the second party elects to retain the cups or fails to return them in good condition, it shall pay to the first party 75 cents additional for each cup not so returned. The said cups shall be removed from the equipment by and at the expense of the second party, and shall be returned free of charge to the first party.

Section 12. Settlement. Final settlement to be made at the expiration of this contract.

This contract, signed in duplicate, shall be binding upon the parties hereto, their respective successors and assigns, and

Section 13. Term. remain in full force and effect for one year, from April 1, 1908, to April 1, 1909.

In witness whereof, the parties hereto have caused this contract to be signed in their respective corporate name, by their duly authorized officer or agent, this 11th day of March, 1908.

DEFENDANTS' EXHIBIT 47.

EXHIBIT A.

ISTHMIAN CANAL COMMISSION,
OFFICE OF GENERAL PURCHASING OFFICER,
Washington, D. C., April 11, 1908.

GALENA-SIGNAL OIL COMPANY,
26 Broadway, New York.

SIRS: You are requested to supply the Isthmian Canal Commission with the following articles, billed as ordered, and itemized at net prices:

	Unit prices.	Total price.
5,000 gallons, car oil "Galena Perfection," per gal	.22	$1,100.00
4,000 gallons, engine oil, "Galena Perfection," per gal	.32	1,280.00
Total		$2,380.00

All of the above oils are to be put up in 5-gallon cans, tins to be packed two in each case, made of $\frac{5}{8}$" boards, all around, securely packed for ocean shipment.

The above to be properly packed and secured for ocean shipment and delivered free of all charges in Isthmian Canal Commission terminal store No. 21, West 27th street, near 13th avenue, New York, in accordance with your letter of proposal dated March 26th, 1908, at the total cost of $2,380.00.

Notify inspecting engineer, Isthmian Canal Commission, Washington, D. C., when the material is ready for inspection, sending the notification a sufficient time in advance to insure against delay for inspection.

Delivery at New York is to be made as soon as possible after advice from the inspecting engineer that the material has passed inspection. Shipment to be made within twenty (20) days from April 13, 1908.

It is requested that you acknowledge receipt of this order promptly and at the same time advise this office earliest dates deliveries can be made.

Purchased in open market without advertising, it being impracticable to secure competition because Galena Perfection oils are certified by the officials on the Isthmus as the only oils that will meet the requirements of the service, and manufactured only by the Galena-Signal Oil Company.

By the authority of the general purchasing officer:

(Signed) F. C. BOGGS,
Captain Corps of Engineers, U. S. A.,
Assistant General Purchasing Officer.

EXHIBIT B.

ISTHMIAN CANAL COMMISSION.

The United States to Galena-Signal Oil Co., dr.

1908.	Apr. 30 08.			Total.
May 1.	To 3,903.0955 gals. Galena engine oil,	.32		$1,248.99
	5,020.3527 " " car "	.22		1,104.48
	Total amount claimed			2,353.47

I certify that the above bill is correct and just and that payment therefor has not been received.

GALENA-SIGNAL OIL COMPANY,
(Signed) By E. H. SIBLEY, *Treasurer.*

$2,353.47. Designation ———.

I certify that the above account is correct and just; that the articles have been received by the Isthmian Canal Commission in good condition; that they were necessary for the public service; that they were procured in accordance with No. 5 of the methods of competition stated on the back hereof, and under the character of agreement lettered C on the back hereof, and that the prices are just, reasonable, and in accordance with agreement.

(Signed) C. E. COLE,
Chief Clerk, Purchasing Department.

Amount submitted for: $2,353.47.
Differences as follows:
Approved and payment authorized, $2,353.47.
By direction of the chairman:

(Signed) H. F. HODGES,
Lieut. Col., Corps of Engineers, U. S. A.,
General Purchasing Officer.

METHODS OF PURCHASE OF SUPPLIES AND ENGAGEMENT OF SERVICE.

1. After advertising in newspapers.
2. After advertising by means of circular letters sent to ——— dealers, and by posting notices in public places.
3. Without advertising and at rates fixed by law (either federal State, or municipal) or by competent regulation.
4. Without advertising, and upon non-competitive quotations, under an exigency of the service, existing prior to the order, which would not admit of delay incident to advertising.
5. Without advertising, and upon non-competitive quotations, it being impracticable to secure competition because Galena oils are certified by the officials on the Isthmus as the only oils that will meet the requirements of the service, and manufactured only by the Galena-Signal Oil Co.

CHARACTER OF AGREEMENT.

A. Under formal contract dated 1908.
B. By proposal filed , and acceptance filed.
C. By oral or other informal agreement.
Quotation and acceptance herewith.
No. 13133.

DEFENDANTS' EXHIBIT 48.

DANVILLE & WESTERN RAILWAY CO.

From an examination of vouchers and papers on file, it appears that the Railway Co. purchased in the year ending May 31, 1900, as follows:

466 gals. valve oil at 50c		$233.00
622½ gals. cylinder oil at 50c		311.25
1,083½ gals. car oil at 20c		216.70
		$760.95
On June 1, 1900, the Railway Co. had on hand 154 gals. of oil at 50c	$77.	
75 " " " " 20c	15.	
		92.00
The above indicates that the cost of oil purchased and used during the year ending May 31, 1900, was		$668.95

In addition to the oil that was on hand June 1, 1899, of which there is no record.

WORLD'S COLUMBIAN EXPOSITION.

Bronze medal, accompanied by the following certificate:

THE UNITED STATES OF AMERICA,

By act of their Congress, have authorized the World's Columbian Commission, at the International Exhibition, held in the city of Chicago, State of Illinois, in the year 1893, to decree a medal for specific merit, which is set forth below over the name of an individual judge acting as an examiner, upon the finding of a board of international judges, to

GALENA OIL WORKS, LIMITED,

Franklin, Penna.

EXHIBIT: Galena engine, coach, and car oils.

Award.

For a series of patented, blended petroleum oils, known as Galena engine oil, Galena coach oil, and Galena car oil, constituting a higher class of railroad lubricants than the cheap black oils. They contain a metallic base in perfect solution, whose function is the same as that of the mineral ingredients in the greases known as cooling compounds; that is, the bearing surfaces are polished or ground by the action of these metallic ingredients, to a condition which insures the most perfect lubricating action of the fluid elements of the oil.

For a series of patented, blended petroleum oils for railroad lubrication that contain mineral ingredients which polish or grind the bearing surfaces automatically; that are free from all substances which can corrode metals; that do not gum on the bearing surfaces; that are uniform in quality; that have been well nigh universally adopted in the United States as high class lubricants for railway machinery, and whose use has resulted in great economies in the consumption of oil for such service.

Bronze medal, accompanied by the following certificate:

THE UNITED STATES OF AMERICA

By act of their Congress, have authorized the World's Columbian Commission, at the International Exhibition, held in the city of Chicago, State of Illinois, in the year 1893, to decree a medal for specific merit, which is set forth below, over the name of an individual judge, acting as an examiner, upon the finding of a board of international judges, to

SIGNAL OIL WORKS, LIMITED,

Franklin, Penna.

EXHIBIT: Perfection signal oil.

Award.

For blended petroleum illuminating oil for signal purposes, having a petroleum base, of high fire test, especially made so as to afford a great tenacity between the wick and flame, in order to prevent the latter from being extinguished when, in transmitting signals, a railroad lantern is swung rapidly, or with quick up-and-down movement. This oil is capable of burning for fifteen hours without drop of flame or incrustation of the wick, a property of no little importance in railroad signaling. This oil is sold at about one-half the price of animal and vegetable oils formerly sold for these purposes.

FORM No. 514–B Disbursing officer.
Washington Order No. *13333*
Canal Zone Req. No. *995–C*

ISTHMIAN CANAL COMMISSION,
OFFICE GENERAL PURCHASING OFFICER,
Washington, D. C., *April 30, 1908.*

Galena-Signal Oil Company,
26 Broadway,
New York.

Sirs: You are requested to supply the Isthmian Canal Commission with the following articles, billed as ordered, and itemized at net prices.

	Unit price.	Total price.
5,000 gallons car oil, "Galena Perfection"	.22	$1,100.00
3,000 gallons engine oil, "Galena Perfection"	.32	2,560.00
8,000 gallons valve oil, "Galena Perfection"	.52	4,160.00
Total		$7,820.00

Above oils to be put up in 5-gallon tins, tins to be packed two in each case made of 5/8" boards all around, packed for ocean shipment.

Purchased in open market without advertising, it being impracticable to secure competition, because Galena Perfection Oils are certified by the officials on the Isthmus as the only oils that will meet the requirements of the service, and manufactured only by the Galena Signal Oil Company.

The above to be properly packed and secured for ocean shipment and delivered free of all charges in Isthmian Canal Commission terminal store, No. 21 West 27th *street, near 13th avenue, New York, in accordance with your letter of proposal dated April 29, 1908, at a total cost of $7,820.00.*

Notify inspecting engineer, Isthmian Canal Commission, Washington, D. C., when the material is ready for inspection, sending the notification a sufficient time in advance to insure against delay for inspection.

Delivery at New York is to be made as soon as possible after advice from the inspecting engineer that the material has passed inspection.

Shipment to be made within twenty (20) days from May 1, 1908.

IT IS REQUESTED THAT YOU ACKNOWLEDGE RECEIPT OF THIS ORDER PROMPTLY and at the same time advise this office earliest dates deliveries can be made.

RECEIVED

FORM No. 514 A.

SHIPPING INSTRUCTIONS COVERING MATERIAL PURCHASED TO BE DELIVERED FREE OF ALL CHARGES IN ISTHMIAN CANAL WAREHOUSE, TERMINAL STORE NO. 21, WEST 27TH STREET, NEAR 13TH AVENUE, NEW YORK CITY.

(Strict compliance with the following instructions is necessary for prompt settlement of accounts.)

All material to be securely packed for ocean shipment and delivered, freight and cartage prepaid, in Isthmian Canal Commission Warehouse, Terminal Store No. 21, West 27th street, near 13th avenue, New York City. When shipments include a number of packages, the packages will be numbered serially.

Mark all packages: I. C. C. COLON W. O. *#13333* *DIV. M. & BS.* *TUBBY* *995–C*

and in addition show name of shipper and contents.

Material will be received at the Commission's warehouse daily, Sundays and holidays excepted, between the hours of 8 a. m. and 5 p. m.

Shippers are requested to prepare delivery receipts in duplicate, one copy of which will be signed and returned to the truckman and the other retained by the Commission.

Please send to the assistant purchasing agent, Isthmian Canal Commission, 24 State street, New York City, six (6) typewritten packing lists showing weight, contents, and value of each package, and six (6) typewritten invoices covering material enumerated in said packing lists.

ALL PACKING LISTS AND INVOICES MUST BE LEGIBLE.

All packing lists and invoices must bear notation to the effect that they cover material ordered under

Washington Order No. *13333*
Canal Zone Req. No. *995–C*

If shipment originates at any point other than New York City, send one copy of bill of lading or shipping receipt of transportation line, showing shipment at point of origin, to the assistant purchasing agent, Isthmian Canal Commission, 24 State street, New York City, and also one copy thereof, with copy of invoice and packing list at-

tached, to general purchasing officer, Isthmian Canal Commission, Washington, D. C.

IF, FOR ANY REASON, ALL OF THE MATERIAL COVERED BY THIS ORDER CAN NOT BE FORWARDED IN ONE SHIPMENT, THE INSTRUCTIONS GIVEN HEREIN WILL GOVERN IN EACH SHIPMENT.

If shipment will be made by party (parties other than your firm, please so advise the assistant purchas g agent, 24 State street, New York City, before shipment is made, and at the same time furnish shippers with a copy of these instructions.

When the material above ordered, marked as above indicated, has been received and inspected by the Isthmian Canal Commission, at its warehouse in New York City, and invoices and packing lists have been delivered to the assistant purchasing agent, 24 State street, New York City, he will certify on the packing lists and invoices to his receipt of the material enumerated therein, and forward same to the disbursing officer, Isthmian Canal Commission, Washington, D. C.

CHARACTER OF AGREEMENT.

A. Under formal contract dated———190 .
B. By proposal filed———and acceptance filed———
C. By oral or other informal agreement.
Quotation and No. 13333 herewith

* Among the reasons which may be assigned as making competition impracticable are the following:

(a) Under a formal contract for construction there arises a necessity for additional work practicable of performance only by the contractor.
(b) The articles wanted are patented or copyrighted and not on sale by dealers but by the owners of the patent or copyright or their agents or assigns alone at a fixed and uniform price.
(c) There is only one dealer within a practicable distance from whom the articles can be obtained.
(d) Previous advertising for the identical purchase has been followed by the receipt of no proposals or only of such as were unreasonable, and under circumstances indicating that further advertising would not alter results.

DEFENDANTS' EXHIBIT 61.

ATCHISON, TOPEKA & SANTA FE RAILROAD COMPANY.

Memorandum of agreement entered into by and between Speare, Gregory & Co., of Boston, Mass., party of the first part, and the Atchison, Topeka & Santa Fe Railroad Company, for itself and leased lines, party of the second part, witnesseth:

In consideration of the party of the second part buying all its lubricating oil from the party of the first part during the life of this agreement, the said party of the first part agree and bind themselves to furnish the party of the second part with engine and car oils manufactured by the Galena Oil Works (Limited) of Franklin, Pennsylvania, at the following prices, delivered in tank cars at Kansas City, Mo.:

Galena Engine Oil twenty-nine (29) cents per gallon;
Galena Car Oil twenty-one (21) cents per gallon.

Shipments to be made only upon the written order of the purchasing agent of the party of the second part.

All oils to be twenty-eight (28) or twenty-nine (29) deg. gravity and not below two hundred and fifty (250) deg. fire test. Cold test of winter oil to run from zero to ten (10) deg. below zero.

The party of the first part guarantee to the party of the second part a saving of ten (10) per cent in the cost of lubricating its equipment of locomotives and cars during the year ending May 1st, 1885; this guarantee to be based upon the cost of the reduced oils that have been used by the party of the second part during the twelve months ending May 1st, 1884.

The party of the first part agree and bind themselves to supervise the use of the Galena oils hereby contracted for, for which purpose the party of the second part agree to furnish transportation over the road for the necessary men and to furnish such letters to employes as may be needed to give effect to suggestions they may make with regard to the best and most economical method of oiling engines and cars. It is agreed and mutually understood that this supervision shall not be withdrawn nor discontinued without the consent of the party of the second part.

Such reports shall be rendered by the party of the second part unto the party of the first part as may be necessary to show the quantity of oil being consumed monthly.

It is distinctly understood and agreed between the parties hereto that if any lower prices than those named herein are made on Galena oils to any railroad company or other oil consumer in the United States by any party or parties whomsoever, then and in that event the party of the second part shall have the benefit of such reduced prices, and the party of the first part binds itself to notify the said second party on the day such lower prices are made.

If the party of the second part desire at any time during the life of this agreement to use the Galena Coach Oil on their passenger equipment they are to have the privilege of buying the same at thirty-four (34) cents per gallon in tank cars or thirty-six (36) cents per gallon in barrels f. o. b. cars Kansas City, Mo.

This agreement to take effect May 1st, 1884, and to run for one year, the party of the second part reserving the right to renew the

contract for one year from May 1st, 1885, on precisely the same terms and conditions as those contained herein.

Done at Topeka, Kansas, this sixteenth day of April, 1884.

DEFENDANTS' EXHIBIT 62.—SHEET NO. 1.

Statement covering a synopsis of contracts made by Galena Signal Oil Company with railroads.

[Many of the railroads in this statement had been using Galena Signal Oil Company's oils for a number of years prior to the term shown herein, and were taken on guarantees 10 to 20 per cent discount of previous costs when other oils were used which were much higher than initial figures herein shown, and when locomotive and car equipment was much lighter in weight and capacity. This is especially true with such roads where percentage of discount is not shown, as the guaranteed rates were established in the original contract and reduced from time to time to the first figures shown in this statement. One cent decrease in freight-car guaranty is equivalent to 11 to 15 cents increase in locomotive guaranty; one cent change in passenger-car guaranty is equivalent to 1½ cents in locomotive service; one mill on tonnage basis is equivalent to 1¼ cents on mileage basis.]

ATLANTIC COAST LINE.

Mos.	From—	Guaranteed rates per 1,000 miles.			History of contracts.
		Locos.	Pass. C.	Frt. C.	
12	11/1/95	$2.25	$.225	$.125	These guarantees 90% previous cost.

		*1.90	.12	.07	G., C. & S. F.
					* Maximum guarantees, sliding scale downwards. These guarantees based on discount of cost for 12 months' period ended 6/30/05, $2.81, $3.37, and $1.935, respectively, and are to be reduced in proportion as the cost is reduced below these figures. The reduction in car guaranty resulted in further saving of $12,661.00 per year to R. R. Co. The increase in loco. guarantees were due to R. R. assuming control of several other roads and substituting very much larger engines for old-type small engines.

ANN ARBOR.

60	1/1/03	1.35	.20	.055	Increase in locomotive guaranty allowed account increased size of locomotives.

CHICAGO, ST. PAUL, MINNEAPOLIS & OMAHA.

[First contract with this road from 6/1/84 to 6/1/85 at 90% of cost for previous 12 months. Then no record of contract until 2 years from 1/1/94 at guaranty of $.22 per 1,000 miles for pass. cars. The road, however, was using Galena oils in all services between these dates apparently without guaranty.]

36	1/1/96	1.505	.20	.125	90% cost for previous 12 months.
60	1/1/99	1.505	.20	.125	
24	1/1/04	1.86	.16	.1135	Increase in loco. guaranty account larger engines, partially offset by decrease in pass. and frt. car guarantees.
36	1/1/06	1.80	.16	.09	Guarantees sliding scale downward. Bonus allowed for reducing cost below guaranty.

DEFENDANTS' EXHIBIT 62—SHEET NO. 3.

Statement covering a synopsis of contracts made by Galena-Signal Oil Company with railroads—Continued.

[Many of the railroads in this statement had been using Galena-Signal Oil Company's oils for a number of years prior to the term shown herein and were taken on guarantees 10 to 20% discount of previous costs when other oils were used and which were much higher than initial figures herein shown, and when locomotive and car equipment was much lighter in weight and capacity. This is especially true with such roads where percentage of discount is not shown, as the guaranteed rates were established in the original contract and reduced from time to time to the first figures shown in this statement. One cent decrease in freight-car guaranty is equivalent to 11 to 15 cents increase in locomotive guaranty; one cent change in passenger-car guaranty is equivalent to 1½ cents in locomotive service; one mill on tonnage basis is equivalent to 1½ cents on mileage basis.]

CHICAGO, BURLINGTON & QUINCY.

[Earliest record shows contract with this line made for lubrication of passenger and freight cars beginning 1/1/90 on basis 100% of cost for 1889, making guaranteed rates for both services $.1816 per 1,000 miles. This continued until 1/1/91, then renewed for 3 years at 95%, or $.17252 per 1,000, then renewed for 1 year at 90%, or $.16344 per 1,000, when the road acquired control of other lines, viz, B. & M. of Neb., with which we had contract at locos., $2.25; pass. c., $.42677; and frt. c., $.25573, beginning 1/1/00. At the same time they acquired the H. & St. J., K. C., St. J. & C. B., St. L., K. & N. W., C. B. & K. C., and C. B. & N. Contract then made for years 1894 and 1895 for lubrication of pass. and frt. cars on following basis:]

Mos.	From—	Guaranteed rates per thousand miles. Locos.	Pass. c.	Frt. c.	History of contracts.
		$2.00	$.3841	$.2211	B. & M. Div.
			.1764	.0954	H. & St. J. div.
			.2925	.2034	K. C., St. J., & C. B.
			.2520	.1362	St. L., K. & N. W.
			.1898	.0954	C. B. & K. C.
			.5620	.1737	C. B. & N.
			.3528	.1018	C., B. & Q. proper.
					These pass. & frt. car guarantees represented 90% of cost for 1889. Commencing 1/1/96 a new contract was made for 3 years on basis of actual cost with Galena oils on locos. for B. & M. Div. and on passenger and freight cars for balance of system, all excepting B. & M. using up to this time other low-priced oils on locomotives. The guarantees under this contract for the system averaging as follows:
36	1/1/96	1.1255	.1236	.1236	
36	1/1/99	1.1255	.10	.10	
60	1/1/02	1.55	.10	.06	These guarantees taken together less than next previous figures.

CHICAGO, ROCK ISLAND & PACIFIC.

[First guaranteed contract taken with this line in 1880. No record kept. First record of contract one year from 1/1/89. Next contracts one year from 1/1/91 and 1/1/92 without guaranty. No record of contract for 1894, 1895, and 1896.]

24	1/1/97	.....	.....	.....	No guaranty.
60	1/1/99	1.33	.17	.085	These guarantees not to exceed cost for previous year. Up to this time we were able to meet these guarantees, but during year 1904 this line used our oils without contract, the line having been consolidated with Choctaw, Oklahoma & Gulf R. R. and several other roads and changed management and new and larger equipment being put into service, thus causing cost to increase very materially, especially in locomotive service. Contract was then made based upon 90% of operations for year 1904.
60	1/1/05	*2.50	*.12	*.065	*Sliding scale downwards. Increase in locomotive guaranty offset to a large extent by decrease in car guaranty. Difference allowed account increase in size of locomotives and consolidation with other lines having much higher cost.

CHICAGO & NORTHWESTERN.

[First guaranteed contract made with this line in 1875. No record kept. First guaranteed contract of which we have record is for passenger cars from 1/1/91 at $.22 per 1,000 miles.]

36	1/1/96	†1.50	.20	†.085	†Locomotive and freight-car guaranty 90% previous cost.
60	1/1/99	1.50	.20	.085	
Indef.	7/1/04	1.70	.20	.08	Increase in loco. guaranty allowed account large engines, partially offset by decrease in frt. car guaranty. Sliding scale downwards, and bonus offered for falling below guaranty, which has been accomplished.

CHICAGO, LAKE SHORE & EASTERN.

12	7/1/97	1.64	.272	.272	95% of previous cost.

DEFENDANTS' EXHIBIT 62—SHEET NO. 4—Continued.

Statement covering a synopsis of contracts made by Galena Signal Oil Company with railroads—Continued.

ERIE.

[Contract made with predecessors of Erie R. R. 5/1/91, guarantees locos., $3.00; pass. cars, $.25, and frt. cars, $.10. These lines had used Galena oils previously, but no record of contract can be found previous to this date.]

Mos.	From—	Guaranteed rates per thousand miles.			History of contracts.
		Locos.	Pass. c.	Frt. c.	
24	5/1/93	3.00	.25	.10	Covers N. Y., L. E. & W., N. Y. P. & O., and C. & E. Railways. This contract extended to 1/1/97.
36	1/1/97	2.25	.20	.09	
60	1/1/00	2.25	.20	.09	
60	1/1/05	2.50	.20	.07	These guarantees equivalent to figures in previous contract, but reduction of $31,000.00 per year compared with first contract above.

ERIE & WYOMING VALLEY.

24	11/1/98	1.5372	.04554	.04554	90% of previous cost.
60	11/1/00	2.00	.07	.07	Guarantees raised account consolidation with Erie R. R. and heavier locomotives and cars. Contract cancelled and covered in Erie contract with Erie R. R. for 5 years from 1/1/05.

ELGIN, JOLIET & EASTERN.

24	7/1/98	2.64	.0787	.0787	100% previous cost.
36	7/1/00	2,64	.0787	.0787	
36	7/1/03	2.42	.12	.0787	Increase in pass. car guaranty more than offset by decrease in locomotive guaranty. This line part of C., L. S. & E.

GREAT NORTHERN.

[This line's earliest contract of which we have record was with St. Paul, Minneapolis & Manitoba Ry. for freight-car service with guaranty of $.25 per 1,000 miles, 1 year from 6/1/83. 2nd contract with same line for 1 year from 6/1/84, same guaranty on freight cars and guaranty of 90% of previous cost for locomotives. No records from this time until 7/1/87, when contract was made for perfection valve oil on gallonage basis. No further records until 1890. During this year and up to 6/30/01 our records show they used Galena oils without guaranty. This line then became part of Great Northern system, and records show as follows:]

Indef.	10/1/92	2.20	.18	.18	
14	4/1/95	1.80	.25	.11	
12	6/1/96	1.65	.20	.09	
25	6/1/97	1.65	.20	.085	
36	7/1/99	1.60	.20	.085	
36	7/1/02	2.35	.20	.085	Loco. guaranty increased account increased size of engines.
60	7/1/05	2.15	.13	.08	Contract provides for sliding scale downwards.

GULF & SHIP ISLAND.

12	6/1/01	2.577	.257	.0853	90% previous 12 months' cost.
60	6/1/02	2.55	.255	.0835	99% previous guaranty.

HOCKING VALLEY.

12	1/1/96	1.65	.07968	.07968	100% previous cost.
12	1/1/97	1.65	.07968	.07968	
12	1/1/98	1.65	.07968	.07968	
12	3/1/99	1.65	.07968	.07968	
12	3/1/00	1.65	.07968	.07968	
24	4/1/01	1.75	.10	.10	These guarantees increased account consolidation of other roads.
24	4/1/03	1.75	.10	.10	
60	4/1/05	2.15	.10	.10	Guaranty on locomotives increased account increase in size of engines.

ILLINOIS CENTRAL.

72	8/1/91	1.8067	.3546	.1036	100% previous cost.
36	8/1/97	1.8067	.25	.1036	
60	8/1/00	1.6722	.25	.1036	
60	8/1/05	2.20	.15	.09	Increase in locomotive guaranty allowed account increase in size of locomotives, partly offset by reduction in passenger and freight car guaranty.

IOWA CENTRAL.

12	11/1/94	1.92	.0516	.0516	100% cost for previous 12 months.
12	11/1/95	1.94	.075	.075	
14	11/1/96	1.90	.075	.075	
36	1/1/98	1.90	.075	.075	
36	1/1/01	2.20	.10	.10	Increase in guarantees allowed account larger engines and cars put into service.
36	1/1/04	2.20	.10	.10	

KANSAS CITY SOUTHERN.

36	6/1/96	2.00	.15	.15	This contract taken not to exceed 90% previous cost, with guarantees reduced each year as shown.
	6/1/97	1.95	.14	.14	This contract covers Kansas City, Pittsburg & Gulf, Kansas City Suburban Air Line, and Kansas City Suburban Belt.
	6/1/98	1.90	.13	.13	
24	6/1/99	1.90	.11	.11	
18	7/1/01	1.90	.11	.11	
24	1/1/03	2.25	.08	.08	Increase in locomotive guaranty offset by decrease in passenger and freight guarantees.
24	1/1/05	1.75	.13	.08	

DEFENDANTS' EXHIBIT 62—SHEET NO. 5.

Statement covering a synopsis of contracts made by Galena Signal Oil Company with railroads—Continued.

[Many of the railroads in this statement had been using Galena Signal Oil Company's oils for a number of years prior to the term shown herein, and were taken on guarantees 10 to 20% discount of previous costs when other oils were used and which were much higher than initial figures herein shown; and when locomotive and car equipment were much lighter in weight and capacity. This is especially true with such roads where percentage of discount is not shown, as the guaranteed rates were established in the original contract and reduced from time to time to the first figures shown in this statement. One cent decrease in freight car guaranty is equivalent to 11 to 15 cents increase in locomotive guaranty; one cent change in passenger car guaranty is equivalent to 1½ cents in locomotive service; one mill on tonnage basis is equivalent to 1½ cents on mileage basis.]

LEHIGH VALLEY.

Mos.	From—	Guaranteed rates per thousand miles.			History of contracts.
		Locos.	Pas. cars.	Frt. cars.	
36	5/1/97	$1.3986	$.24786	*$.00644	These figures 90% previous cost. *Freight cars tonnage basis.
60	5/1/00	1.50	.25	.075	Guaranty for freight cars changed to mileage basis and reduced sufficiently to more than offset increase in locomotive guaranty. This contract abrogated 5/1/04.
60	5/1/04	2.25	.30	.075	These guarantees restored to cost prior to first contract account change in size of locos. and frt. cars and 12 wheel passenger cars put in place of 8 wheel cars; also change in keeping record of mileage.

LAKE SHORE & MICHIGAN SOUTHERN.

First record of guaranteed contract from 2/1/92 on pass. and frt. cars only, pass. cars, $.218; frt. cars, $.069, being 100% previous cost. No guaranty on locos., and it does not appear that this line used Galena oils on locos. until 2/1/95. No guarantees from 2/1/95 to 1/1/99.]

12	1/1/99	1.25	.30	.075	
12	7/1/00	1.50	.36	.09	Guarantees increased account increased size of rolling equipment.
60	7/1/01	2.00	.24	.08	Last year of this contract pass. car guaranty reduced to $.20.
Indef.	7/1/06	2.50	.17	.07	Increase in loco. guaranty allowed account accumulation large engines; same partially offset by decrease in passenger and freight car guarantees.

LAKE ERIE & WESTERN.

36	1/1/96	.....	.....	.....	No guaranty. Covers C., A. & C. from 1/1/97
36	1/1/99	.....	.....	.....	" " Also covers C., A. & C.
24	1/1/02	1.75	.24	.08	
36	1/1/04	2.00	.24	.08	
Indef.	1/1/07	*2.50	.17	.07	Increase in guaranty account consolidation of L. S. & M. S. and increase in size locos. and cars. *Sliding scale downwards.

LOUISVILLE & NASHVILLE.

36	1/1/97	1.69533	.329985	.09477	These guarantees 90% previous cost.
38	1/1/00	1.69533	.16	.09	
60	3/1/05	1.69533	.16	.09	Decrease in pass. and frt. guarantees resulted in further saving to R. R. of $8,300.00 per year compared with first contract.

LONG ISLAND.

23	8/1/95	1.9113	.0783	.0783	These guarantees 90% previous cost.
72	7/1/97	1.80	.0782	.0782	
36	7/1/03	2.00	.0882	.0882	Increase in guarantees allowed account introduction of electrical power and cars.

DEFENDANT'S EXHIBIT 62.—SHEET NO. 7.

Statement covering a synopsis of contracts made by Galena Signal Oil Company with railroads—Continued.

[Many of the railroads in this statement had been using Galena-Signal Oil Company's oils for a number of years prior to the term shown herein, and were taken on guarantees 10 to 20 % discount of former costs when other oils were used and which were much higher than initial figures herein shown, and when locomotive and car equipment was much lighter in weight and capacity. This is especially true with such roads where percentage of discount is not shown, as the guaranteed rates were established in the original contract and reduced from time to time to the first figures shown in this statement. One cent decrease in freight car guaranty is equivalent to 11 to 15 cents increase in locomotive guaranty; one cent change in passenger car guaranty is equivalent to 1½ cents in locomotive service; one mill on tonnage basis is equivalent to 1½ cents on mileage basis.]

UNION PACIFIC.

[This road used Galena oils several years prior to first contract of which we have record. Books indicate a guaranteed contract in effect from 1/1/89, locos., $3.00; pass. cars, $.20; and frt. cars $.20 per 1,000 miles.]

DEFENDANTS' EXHIBIT 63.

FRANKLIN, PA., *November 10th, 1891.*

To the C., N. O. & T. P. Ry.

GENTLEMEN: We submit for your kind consideration the following proposition:

We will furnish the C., N. O. & T. P. Ry., the A., G. & S. Ry., the N. O. & N. E. Ry., the V., S. & P. Ry., the A. & V. Ry., and the L. S. Ry., including the entire present mileage of all the roads, and any additional mileage that the company operating said roads may construct, lease, or in any manner operate or control, a full supply of lubricating oils for one year from October first, 1891, at the following prices and upon the following terms and conditions:

Prices to be charged are as follows:

Galena car oil, for the lubrication of passenger and freight cars and locomotive machinery, 20 cents per gallon.

Sibley's Perfection valve oil, 50 cents per gallon.

These prices are for the oils in barrels, carloads of various oils, f. o. b. Cincinnati, Ohio. Should you order oils in tank cars, the prices of these oils when so ordered are to be two cents per gallon less than the prices above named. We guarantee these prices to your company for the term of one year from October first, 1891.

Inasmuch as these prices are based upon Franklin crude oil at $3.90 per barrel of 42 gallons, f. o. b. at our works, we hereby agree that in case said crude oil declines to a price 25 cents per barrel below $3.90 f. o. b. we will for every 25 cents per barrel decline in the price of Franklin crude oil, reduce our prices to your company one-half cent per gallon.

We hereby guarantee that these prices are as low as we make for the same quality of oils to any railway in America, and agree that in case we reduce our prices to any railway anywhere, we will give your company the benefit of a like reduction.

The oils furnished your company are to be of as good quality as the oils furnished you in the past, and such as we furnish other railways under like or similar conditions. The Galena oil is to be made in accordance with what is known as "The Galena process" of oxide of lead, whale oil, and petroleum, and the valve oil is to be Sibley's Perfection valve oil. The oils are to be adapted to the service for which they are respectively intended, and each oil is to be used only for the purpose for which it is especially intended.

We will furnish experts free of charge to your company—other than that you are to furnish them free transportation—to look after the use of our oils with a view of reducing the cost of lubrication to the lowest possible point consistent with perfect service. Our expert is to have the hearty cooperation of the officials of your road, to whom he will report and with whom he will confer from time to time.

We will, if you wish to sell them to us, buy the empty barrels in which we shall have shipped our oils, and allow you one dollar each for same, f. o. b. Cincinnati.

In the exclusive use of the oils herein named—including such of our oils as you may have on hand at the beginning of this contract year—we hereby guarantee that the aggregate cost per thousand miles run of the lubrication of your locomotives and passenger and freight cars

for the twelve months included in this contract, shall be ten per cent less than for the twelve months from October first, 1889, to October first, 1890, when other oils than ours were used.

It is understood that we guarantee a saving of ten per cent of the aggregate cost per thousand miles in both locomotive and car service. Therefore should there be a saving over and above our guarantee in one service and a loss in another service, the service in which the cost exceeds our guarantee is to be credited with the saving over and above our guarantee in the other service, or a sufficient amount of the same to make good our loss in the other service. For instance, should the cost for the year in the car service fall below our guarantee $3,000 and the cost in the locomotive service exceed our guarantee $2,000, the locomotive service shall be credited with $2,000 of the saving over and above our guarantee in the car service. Or should the cost in the locomotive service fall below our guarantee $3,000 and the cost in the car service exceed our guarantee $5,000, the car service is to be credited with the $3,000 saved over and above our guarantee in the locomotive service. Should, however, the cost in both the car and locomotive service fall below our guarantee, we are not on that account to receive any more for our oils than the prices herein named.

If it is shown at the end of the contract year that your company has not saved ten per cent of the aggregate cost per thousand miles in the lubrication of your locomotives and passenger and freight cars, as herein guaranteed, you are to make a bill against our company for the amount of the excess cost, and we are to remit promptly in payment of the same.

If settlement is made on a basis of our guarantee as regards cost of lubrication, lubrication is to have credit with all barrels that we shall have shipped your company during the contract year at the price herein offered you for said barrels, as per former contract.

You are to furnish us a copy of an inventory showing number of gallons of lubricating oils on hand at the beginning of this contract year, and also copy of inventory showing number of gallons of lubricating oils on hand at the end of this contract year.

You are to furnish us monthly statements upon blanks furnished by us free of charge, showing locomotive and car mileage and number of gallons of oils consumed during the month and the cost per thousand miles run in both car and locomotive service.

You can, if you desire to do so, withhold payment of a sufficient number of our invoices to cover from time to time any loss that said reports may indicate that we have sustained by reason of our guarantee as regards cost of lubrication. If the cost for the year exceeds our guarantee, settlement upon the basis of said guarantee to be made at the close of the contract year.

Accepted by Galena Oil Works Limited, this 16th day of November, 1891, by

CHAS. MILLER, *Pres.*

Attest, ———

To October 1, 1892.
Mail inventory and monthly reports to auditing department Galena Oil Company, Franklin, Penna."

DEFENDANTS' EXHIBIT 64.

FRANKLIN, PA., *July 1st, 1891.*

J. H. GARAGHTY, Esq.,
Gen'l P. A., C. C. C. & St. L. Ry. Co., Indianapolis, Indiana.

DEAR SIR:—Inasmuch as we desire to secure the patronage of your company for our various oils, we respectfully submit for your kind consideration the following proposition:

I. We will guarantee to your company the prices hereinafter named for our oils for one year from the date of this proposition. It is understood that your acceptance of this proposition implies an agreement on the part of your company to use our oils exclusively for one year, upon the terms and conditions herein set forth.

II. The prices to be charged your company are as follows:

Galena engine oil, for the lubrication of your locomotives, 30 cents per gallon.

Sibley's perfection valve oil, for the lubrication of valves and cylinders, 50 cents per gallon.

Galena car oil, for the lubrication of your passenger and freight cars, 20 cents per gallon.

These prices are for the oils named, in barrels, delivered as you may direct.

III. Should you order the oils delivered in tank cars, the prices to be two cents per gallon less than the prices herein named.

IV. Inasmuch as these prices are based upon Franklin crude oil at $3.90 per barrel of 42 gallons, f. o. b. at our works, we hereby agree that in case the price of Franklin crude oil should decline 25 cents per barrel below $3.90 per barrel during the term of this contract, we will for every 25 cents per barrel decline in the price of said crude oil reduce our prices to your company one-half cent per gallon.

V. We hereby guarantee that these prices are as low as we make for the same quality of oils to any railway in America; and that in case we reduce our prices for the same quality of oils to any railway anywhere we will give your company the benefit of a like reduction.

VI. The oils furnished your company are to be made in accordance with what is known as the Galena process of oxide of lead, whale oil, and petroleum—except the valve oil, which is to be what is known as Sibley's Perfection valve oil. In other words, the oils are to be such as we furnish other railways under like or similar conditions. We are to furnish oils especially adapted to the service for which each is intended, and each kind of oil is to be used exclusively for the service for which it is intended.

VII. We will furnish experts free of charge to your company—other than that you are to furnish them free transportation while upon your road to look after the consumption of our oils with a view of reducing the cost to the lowest possible point consistent with perfect service. Said experts are to have the hearty cooperation of the officials of your road, to whom they will report from time to time and make such suggestions as will tend to effect the object of their service.

VIII. In the exclusive use of the oils herein named—including all of our oils that you may have on hand at the beginning of the contract year—we will hereby guarantee that the aggregate cost per thousand miles run of the lubrication of your locomotives and passenger and freight cars, for the twelve months of this contract, shall

be fifteen per cent less than the aggregate cost per thousand miles run for the same service from July, 1889, to July, 1890, when other oils were used.

IX. If at the end of the contract year it is shown that your company has not saved fifteen per cent of the aggregate cost per thousand miles run of the lubrication of locomotives and passenger and freight cars by reason of the use of our oils, as against the cost of the same service as against the year above specified, as herein guaranteed, we hereby agree to reimburse your company a sufficient amount of money to make good our guarantee. If in case, however, it is shown that by reason of the use of our oils, the saving to your company has been more than fifteen per cent of the aggregate cost for the year above specified, we are not on that or any other account to receive more than the prices herein named for our oils.

X. We will take back, if you wish to sell them to us, the empty barrels in which we shall have shipped oils to your company, and allow you one dollar each for same, f. o. b. Cleveland. In computing the cost of lubrication of your equipment at the end of the year, if it is found that the aggregate cost has exceeded our guarantee, and settlement is therefore made on the basis of our guarantee, we are to have credit for all barrels shipped you during the year, at the price which we herein offer you for the same, inasmuch as the amount that you receive for said barrels will reduce the cost of lubricating your equipment—as computed from our invoices—in proportion to the amount of the same.

XI. The oils that you have on hand are to be consumed as nearly as possible before the beginning of this contract year and an inventory of such as are still on hand at the beginning of the contract year is to be taken and a copy of said inventory is to be furnished us. The statement of locomotive and car mileage and various kinds of lubricants used and the number of pounds or gallons of each and the price per pound or gallon that you paid for same and the cost per thousand miles run in the locomotive and passenger and freight-car service for the year commencing July first, 1889, and ending July first, 1890, upon which settlement is made for the contract year ending July first, 1891, is to be taken as the basis upon which our guarantee as regards cost of lubrication is made this year.

XII. At the end of the contract year a second inventory of oils on hand is to be taken and a copy of same furnished us.

XIII. You are to furnish us monthly statements upon blanks supplied by us free of charge to your company, showing us the locomotive and passenger and freight-car mileage for the month; the number of gallons of each kind of oil used during the month, and the cost per thousand miles run in the locomotive and passenger and freight-car service. This will enable both you and us to keep track of what is being done.

XIV. Should you desire to do so, you can withold payment until the end of the contract year, when final settlement shall be made, of a sufficient number of our invoices for oils furnished to make good our guarantee to save your company fifteen per cent of the aggregate cost per thousand miles run for the year above specified. You can withold payment of one, two, three, or four months' invoices until we have fulfilled our agreement to save your company fifteen per cent, or until you are satisfied that we intend to do just what we agree

to do. In this way it is impossible for you to pay more than you ought to pay according to this contract, inasmuch as you have the matter entirely in your hands, and when you have paid 85 per cent of the aggregate cost for the year commencing July first, 1889, and ending July first, 1890, all you have to do is to stop further payment.

FRANKLIN, PA., *June 1st, 1884.*

W. H. S. WRIGHT, Esq.,
Purch. Agent, C., St. P., M. & O. Ry. Co.,
St Paul, Minn.

DEAR SIR: We propose to furnish your co. with your full supply of Galena engine and Galena car oils—the same to be delivered in tank cars at Chicago for one year from date at the following prices:

Galena engine oil, 28 cents per gallon.

Galena car oil, 18 cents per gallon.

Should you at any time desire to purchase the oil in barrels, the price to be two (2) cents per gallon more than the above prices.

The prices above named are the same as given to the Chicago & North Western Ry. Co., and we hereby agree that you shall during the year have the same prices for the same oils that we charge the Chicago & North Western Ry. Co.

In the use of these oils we guarantee to effect a saving of 10 per cent to your co. based upon the cost of lubricating your equipment the previous year, that is to say from June 1st, 1883, to June 1st, 1884, so that the cost of lubricating your equipment from June 1st, 1884, to June 1st, 1885, shall be 10 per cent less than from June 1st, 1883, to June 1st, 1884.

Of course it is understood that should we be able, by reason of the care which we propose to give to the lubricating of your equipment, to effect a saving greater than 10 per cent, your co. to have the full benefit, and should the average saving for the year not amount to 10 per cent we agree to reimburse your co. with the difference.

We also agree to furnish men free of cost to your co. other than that you are to furnish the men free transportation over your road and with such letters from the heads of your departments to the employes of the road that will enable us to suggest how the oil shall be used.

The system of reports to be the same as are now being used by the Chicago & Alton, and Chicago, Milwaukee & St. Paul Ry. companies; or should it be desirable on your part to have a different system of reports which will give the same results, you to have the privilege of arranging such a system.

The oil furnished for winter months, both engine and car, shall stand a cold test of 5 to 10 degrees below zero.

Yours, truly,

CHAS. MILLER,
Prest. Galena Oil Works, Limited.

This proposition is accepted.

OFFICE OF THE FOURTH VICE-PRESIDENT,
Louisville, Ky., January 5th, 1908.

G. E. EVANS,
Fourth Vice-President.

Mr. T. H. CURTIS,
Supt. Machinery.

DEAR SIR: Following is a copy of the President's letter to me dated the 4th inst:

"Have the results of lubrication under our present contract with the Galena Signal Oil Company been satisfactory?

"Is it feasible to furnish a comparative statement of the number of hot boxes and aggregate time of delays and comparative cost of waste, with allowance for additional mileage, for the periods June 1, 1904, to June 1, 1905, and June 1, 1906, to June 1, 1907?"

I assume that, perhaps, you will not be able to give all the information in detail, but give it as far as practicable. Let me have it as promptly as possible.

Yours, truly, (Signed) G. E. EVANS,
B
Fourth Vice-President.

LOUISVILLE & NASHVILLE RAILROAD COMPANY,
OFFICE OF THE SUPERINTENDENT OF MACHINERY,
Louisville, Ky., Jan. 14, 1908.

THEODORE H. CURTIS,
Superintendent of Machinery.

Mr. G. E. EVANS,
Fourth Vice-President.

DEAR SIR: Replying to your letter of the 5th inst.

I enclose herewith a statement showing the cost of waste for lubrication of locomotives and cars during the fiscal year 1904–05 and 1906–07, as we were verbally advised that the cost during these two periods would be satisfactory.

I am also enclosing statements showing delays to passenger trains account of hot boxes on locomotives and passenger cars for eleven months of July, 1904, to May, 1905, as compared with eleven months July, 1906, to May, 1907. Our record on delays to passenger trains is short for the month of June, 1905, and as we could not give this information for June in the year 1904–05 we omitted the same month for the year 1906–07.

We are unable to give any information from record as to delays which occurred to freight trains during these periods.

The results of lubrication under our present contract with the Galena Signal Oil Company have been very satisfactory, and the record indicates that the service has been superior to that furnished under the New York Lubricating Oil Company's contract.

Yours, truly,

THEO. H. CURTIS.

Form 12-13-1907. 150.

THE NEW YORK STEAM COMPANY,

140 Cedar street, New York.

We propose to furnish steam to

.....

.....

For the heating season of 1907–1908 { The heating season being understood to be that portion of the year during which the consumer may need heat,

but not earlier than Oct. 1st nor later than June 1st.

For the following purposes:

Heating the premises
~~Heating water for domestic purposes~~
~~Operating.....elevator~~
~~Operating house pump~~

SUBJECT TO THE FOLLOWING RULES AND REGULATIONS:

That the engineers, inspectors, and other employees of the steam company upon showing authority shall, according to law, be at all times permitted to inspect the engines, pumps, traps, and other steam apparatus in use by the consumer and to take indicator cards, or by other means get records of the steam used.

The consumer is required to use the traps manufactured by this company on the discharge pipe and provide a suitable cooling coil to cool the water of condensation to 100 degrees Fahrenheit before entering the sewer, as provided in revised city ordinances of 1891.

That a steam meter may be placed on the premises at any time for recording the quantity of steam used.

That the engines, pumps, traps, and other machinery and apparatus shall be kept in first-class condition, as it is understood that the supply is furnished under these conditions, and that the consumer, upon receiving notice, will promptly make all needed repairs.

That the company assumes the care of only the service valve, service trap, and meter, and whenever any portion of the apparatus of the consumer may be cleaned or repaired by the company a charge will be made for the labor and materials.

That all steam pipe inside of service valve or meter in any way connected with the consumer's piping and not required for radiation will be properly insulated by the consumer; that all proposed new connections to be made with the pipes of the consumer or the apparatus of the said company on said premises are to be reported to said company beforehand, or this contract will become void; that provision for taking care of the return water and all condensation is to be made by the consumer of steam; that all bills are to be paid monthly within five days after presentation unless otherwise specified; that the

company reserves the right to shut off steam on the failure to pay bills for steam, or for work done and material furnished, five days after presentation, or upon failure of the consumer or his employees to carry out in good faith the provisions of this contract with the company. That the consumer will immediately notify the company in writing of any changes in conditions of service or hours of operation.

That when a deposit has been made to secure payment for a supply of steam, steam may be shut off when the amount of said supply equals the amount of said deposit without further notice to the consumer.

That the company does not guarantee an uninterrupted supply of steam, but confidently expects to maintain a steady pressure, except when interruptions may occur through strikes, casualties, or other conditions beyond its control, and except during the time required for occasional necessary repairs.

That the consumer will grant full facilities to the company to remove all of its apparatus, pipes, and appliances, as above specified, when the supply of steam is discontinued.

That in consideration of the price named the consumer will exercise the same care and economy which he would if the steam were made on the premises and that steam will be shut off from rooms and apparatus not in use.

Price: Three hundred ($300.00) dollars.

Payable: $150.00 December 1st, 1907, and $150.00 February 1st, 1908.

Form 12—0—1907. 500 (Copy.)

THE NEW YORK STEAM COMPANY,

140 Cedar street, New York.

October 15, 1907.

We propose to furnish steam to New York Clearing House, #77-79 Cedar street, New York City, for the year beginning November 15, 1907, and terminating November 15, 1908.

FOR THE FOLLOWING PURPOSES:

Heating the premises #77-83 Cedar street by exhaust steam as far as possible, supplemented by live steam when absolutely necessary.

~~Heating water for domestic purposes.~~

Operating elevator, Ball and Wood (electric) 11 x 12, 10 hrs. per day.

Operating house pump, Worthington duplex, 10 x 15 x 10, 24 hrs. per day.

Operating Worthington duplex pump, 6 x 4 x 6 on returns of heating system; Worthington duplex pump 6 x 4 x 6 on the returns; Worthington duplex pump, 6 x 4 x 6; Ball & Wood electric light engine 12 x 12, 10 hrs. per day; Porter Mfg. Co. blower engine, 10 x 11, 10 hrs.; and ejector ¾" outlet on hot well.

SUBJECT TO THE FOLLOWING RULES AND REGULATIONS:

That the engineers, inspectors, and other employees of the steam company, upon showing authority, shall, according to law, be at all times permitted to inspect the engines, pumps, traps, and other steam apparatus in use by the consumer, and to take indicator cards, or by other means get records of the steam used.

That the traps manufactured by the company are to be used on all discharge lines, and these traps are to be sold to the consumer at cost.

That a steam meter may be placed on the premises at any time for recording the quantity of steam used.

That the engines, pumps, traps, and other machinery and apparatus shall be kept in first class condition, as it is understood that the supply is furnished under these conditions, and that the consumer, upon receiving notice, will promptly make all needed repairs.

That the company assumes the care of only the service valve, service trap, and meter, and whenever any portion of the apparatus of the consumer may be cleaned or repaired by the company a charge will be made for the labor and materials.

That all steam pipe inside of service valve or meter in any way connected with the consumer's piping and not required for radiation will be properly insulated by the consumer; that all new connections to be made with the pipes of the consumer or the apparatus of the said company on said premises are to be reported to said company beforehand, or this contract will become void; that provision for taking care of the return water and all condensation is to be made by the consumer of steam; that all bills are to be paid monthly within five days after presentation, unless otherwise specified; that the company reserves the right to shut off steam on the failure to pay bills for steam, or for work done and material furnished five days after presentation or upon failure of the consumer or his employees to carry out in good faith the provisions of this contract with the com-

pany. That the consumer will immediately notify the company in writing of any changes in conditions of service or hours of operation.

That when a deposit has been made to secure payment for a supply of steam, steam may be shut off when the amount of said supply equals the amount of said deposit without further notice to the consumer.

That the company does not guarantee an uninterrupted supply of steam, but having unusual facilities therefor confidently expects to maintain a steady pressure at all times except during the time required for occasional necessary repairs; that the consumer will grant full facilities to the company to remove all of its apparatus, pipes, and appliances as above specified when the supply of steam is discontinued in accordance with the proposition and acceptance.

That in consideration of the price named the consumer will exercise the same care and economy which he would if the steam were made on the premises, and that steam will be shut off from rooms and apparatus not in use.

Price: Forty-three hundred and eighty-three ($4,383.00) dollars.

Payable: October 15th to April 15th, $430.50 per month, and April 15th to October 15th, $300.00 per month.

This proposal is made on an estimated annual consumption of steam as shown by the meter of 11,780,000 lbs. and a rebate will be made at the termination of the contract at the rate of 30 cents per 1,000 lbs. of steam saved, as shown by the meter records.

It is understood and agreed that this contract may be terminated at any time by either party on thirty days' written notice.

DEFENDANTS' EXHIBIT 90.

THE BEST LIGHT

can be secured by giving attention to the following points, as a good oil carelessly or ignorantly used will not give a satisfactory light.

An important requisite of a good light is a

GOOD LAMP,

one with a wide, shallow bowl, so that the oil need not rise far to reach the flame. There are many that will suit your fancy. Buy a good one. Its care is just as essential. It should be completely emptied and cleaned at least once a month, and filled every day.

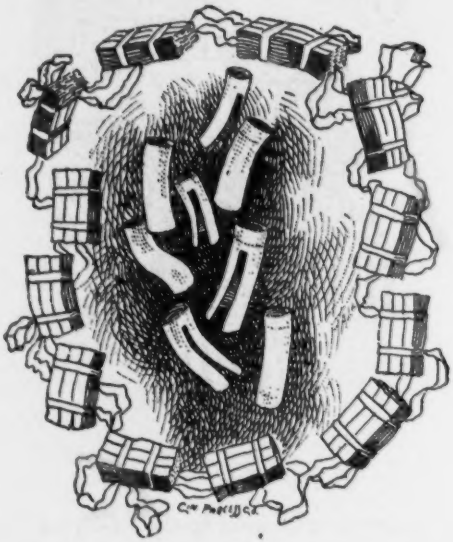

THE WICK.

A wick is a pump to carry the oil from the lamp bowl to the flame. The wick acts as a syphon pump. It will in time become dirty and clogged and unable to perform its work. Unless a proper quantity of oil is delivered by the wick to the top of the wick tube, an unsatisfactory or poor light results and this even from the very best grade of oil in the market. Put in a new wick once every month; use the

best wick you can get, one soft and loosely woven. Wicks are so cheap that the expense will be trifling. Wicking sold by the yard never gives good results. It is an inferior quality.

HOW TO TRIM A WICK.

Do not scrape it; this fills the burner with dirt. Cut it evenly across the top and slightly round the corners. Trim it every day. Never splice or piece a wick. A short piece of wick pinned or even sewed to another piece of wick or flannel has never secured good results in the way of light.

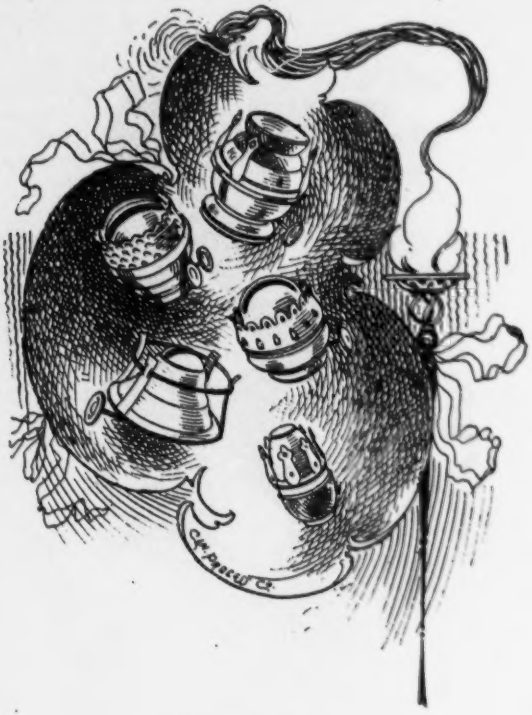

THE BURNERS

must be of good make. Cheap ones will only annoy.

The wick tube should be large enough to permit an easy movement of the wick up and down; if the wick is too large for its tube the pressure on it decreases its lifting power, and checks the flow of oil to the flame, thus diminishing the light.

Boil your burners once a month in a solution of hot water and washing soda, to clean out the air vents.

Dry thoroughly before using.

CHIMNEYS

should fit the burners and be smooth and even on the bottom. Then no draught can get under the edge of the chimney and cause the flame to smoke. Select the proper one for your lamps.

This is important.

HOW TO LIGHT AND PUT OUT A LAMP.

The flame should not be turned up to its full height when a lamp is first lighted; allow it to remain low until the burner and chimney are warm, then turn the light to the desired height.

Do not blow out a light. Turn the wick down until the light goes out, and leave wick in that position until the lamp is needed again. This prevents oil from gathering upon the outside of a burner. The presence of oil on the outside of a burner is sure to produce an unpleasant odor, particularly when relighted.

Have ever you been in a

LIGHT-HOUSE

and observed the scrupulous care taken of the lights? The lamps and lenses are cleaned and polished daily, and the results are shown at night in the clear, strong light flashed o'er many a mile of sea.

Emulate the light-house keeper, and clean your lamps daily.

THEN:

With the right lamp—a wide, shallow bowl;
The correct wick—smooth and soft, and one that fits;
A good burner—not the cheap kind;
A clear chimney—made for the burners you use;
and cleanliness—the final requisite to a perfect light for home use is

FIREPROOF OIL,

in your lamp.

FIRE PROOF OIL,

Made from the best crude petroleum Refined by modern scientific methods by skilled chemists at our own works. Tested by a rigid formula that allows no deviation from a fixed standard. Distributed with care in tank cars, by tank wagons, and in barrels.

The entire process from the wells through us to you denotes an extreme care, resulting in a complete product satisfactory wherever used.

Manufactured only by

Standard Oil Company.

Incorporated.

DEFENDANTS' EXHIBIT 91.

POINTS ON LAMPS.

HOW TO SECURE THE BEST LIGHT.

TAKING CARE OF LAMPS.

Fill daily, so that the reservoir may be nearly full when the lamp is lighted.

Do not fill too full; allow a little room for expansion when the oil begins to warm up, and so prevent it from running over the top or creeping up on the burner.

BURNERS.

Keep them clean.

The common cause of odor from lamps, is the clogging of the tiny air holes at the base of the burner under the cap and the crust which forms at the top of the wick tube.

These openings must be kept free because they supply the air without which there cannot be proper combustion.

If the air passages become clogged and greasy, the flame will fall and emit an unpleasant odor.

Gummed and clogged burners can be easily cleaned by boiling a few minutes in sal soda and water.

WICKS.

Have a good wick and be sure it fits. It should just fill the tube without crowding and be long enough to reach the bottom of the lamp.

The "American" wick is the best.

If the wick needs to be trimmed, *do not scrape it off*, as is commonly recommended. This injures the wick, fills the burner with soot, clogs the air passages, and causes a disagreeable odor.

Trim the wick daily, cutting off the burned portion evenly across the top with sharp scissors and also slightly at the corners.

Wicks should be replaced once a month, or as soon as they become dirty.

It is not economy to use long wicks, or buy wick by the yard.

To light the lamp do not turn the wick above opening in the cone.

When first lighted, do not turn up the flame to its full height.

In extinguishing the lamp, blow sharply across the chimney.

See that the wick of the lamp not in use is below the level of the wick tube. This prevents oil from creeping up over the burner.

With the above precautions, a lamp can be kept clean and free from odor, and by using FIRE-PROOF OIL you will always secure a perfect light.

Pleas before the Hon. T. N. Green, one of the judges of the Tenth Judicial Circuit of the State of Illinois and sole presiding judge in and for the county of Tazewell in the State aforesaid, at a term thereof begun and held at the court-house in the city of Pekin in said county and State on the 2nd Monday (being the 11th day) of the month of September, A. D. 1905.

Present: { Hon. T. N. Green, judge, Robert Clay, sheriff, Charles Schaefer, State's attorney, Wm. A. Potts, master in chancery.

Attest: R. V. Howe, Clerk.

Court met pursuant to law at 10 o'clock a. m., when the following, among other proceedings, were had and entered of record as follows, to wit:

And afterwards, to-wit: On October 14th, A. D. 1905, the same being one of the days of the regular September term of said court, the following order was entered in said court in said cause as follows, to-wit:

THE PEOPLE
vs.
GUY B. TAYLOR AND
Crittenden T. Collings. } Subornation of perjury.

And now on this day upon motion made herein by Charles Schaefer, State's attorney, it is ordered by the court that this cause be and the same is hereby nolle prossed, and the same is hereby stricken from the docket.

And afterwards, to wit: on December 2nd court adjourned until court in course.

CERTIFICATE.

STATE OF ILLINOIS, *Tazewell County, ss.*

I, R. V. Howe, clerk of the Circuit Court, in and for the county of Tazewell and State aforesaid and keeper of the seals, records and files of said office, do hereby certify that the above and foregoing is a true copy of the last order rendered in a certain cause wherein The People of the State of Illinois was plaintiff, and Guy B. Taylor and Crittenden T. Collings were defendants.

In witness whereof I have hereunto set my hand and seal of said court at Pekin, Illinois, the 18th day of January, A. D. 1906.

R. V. HOWE,
Circuit Clerk.

Circuit Court of Tazewell County. SEAL Illinois.

"HILL TOP,"
New Albany, Ind., Apr. 4, 1908.

Capt. P. S. MORRIS,
New Orleans, La.

MY DEAR SIR: I guess you will be surprised to hear from me. Yesterday I received the enclosed paper from a friend in Mobile, and I naturally feel very much wrought up over it. Above all things I hate newspaper notoriety, and think this is the limit.

Somehow I feel that we ought to know the author of all this mess and make the Register Co. print a denial of same. I feel that it would only be justice to both myself as former owner of the People's Oil Co. and to the Standard Oil folks as well.

You have always advised me for the best, and I'm writing you now for your candid opinion as to what would be best to do in this matter.

Would you mind writing the paper a denial that I was indebted to the Standard and forced out of business—and if you think that I ought to say anything would you please word it for me.

Kindly return the clipping and tell me if you have any idea who the former Standard man was. I suspect E. S. Moore. If we both make a denial I would like for them to appear in the same copy. I hate for all my friends to think I'm "busted," for I was never better off financially than when I sold, and owed no man a penny either.

I'm sending you this to your address as I last knew it in N. O.

Trusting to hear from you soon, I remain as ever, yours sincerely.

SUDIE P. WILSON.

CLEVELAND, O., *Sept. 4th, 1902.*

Mr. S. T. CURTIS, *City Office.*

DEAR SIR: I give you below a list of dealers who have been offered cut prices by the Columbia since Aug. 28th, 1902.

M. Grossman, 917 Payne. Columbia offered W. W. oil for 6½c. and gaso 9. J. Knizek, 813 Quincy. Columbia offered oil at 6½ and gaso at 9c. Stores at No. 6 & 30 Herman St. Columbia offered oil and gasoline at ½c. off of our market.

The store at corner of Luverne & Chestnutdale offered goods by the Brooks at ½c. off our market for both oil and gasoline.

Very truly yours,

C. G. CAYMOD.

The G. W. sold D. C. Petty 300 gal. W. W. on the 27th ultimo at 6½c. per gallon.

CLEVELAND, OHIO, *January 5, 1903.*

CLEVELAND STATION.
S. T. CURTIS.

Mr. C. G. TAPLIN: We have report on December 22nd that the following oil was received from Columbia Oil Co., Cleveland: A. N. Testa, Hudson, Ohio, 4 barrels Water White, 8c. per gallon; P. B. Seacy, Hudson, Ohio, one barrel Water White, 8c. per gallon; on December 29th, Fisch Bros., Vigil, Ohio, 5 barrels Water White; December 26th, Howe & Clement, Strongsville, 5 Water White. You will note this oil was sold at 8c. per gallon, while we have been selling the same grade at 11c. per gallon. The cut in price is the reason we lost these customers.

Yours, respectfully,

S. T. CURTIS.

DEFENDANTS' EXHIBIT 101-C.

[Form 460.]

Memorandum.

JAN. 21, 1903.

Mr. C. G. TAPLIN: We find the Columbia Oil Co. of this city has been to Ashland and quoted our cutomers there 11½ c. for White Rose oil in barrels delivered. They allowed $1.00 for the barrels when returned, and hence this nets the trade 9½c. per gallon, while our market for same grade is 10½c. per gallon.

Yours, respectfully, S. T. CURTIS.

CLEVELAND, OHIO, *April 16, 1906.*

Mr. C. G. TAPLIN, *Building.*

DEAR SIR: We wish to call your attention to the fact that Langshaw & Hickman, Perry, Ohio, who are our customers, recently discontinued purchasing our goods. Upon investigating reasons why we lost the business they stated they could buy cheaper than our price; that they were buying of Columbia Oil Co., of Cleveland, 74° gasoline for 11½c. and 86° gasoline for 15c. net bulk. We had been selling them 74–76° gasoline at 13½c., so they claim they saved 2c. per gallon on that grade, and they claim they saved 3c. a gallon on 86° gasoline. We investigated, with their consent, to find out why this cut was made by our competitors, as we knew that such prices could not be made on goods that were full gravity. What they purchase from our competitors, the Columbia Oil Co., for 86° gasoline tested 81½°, and the 76° gasoline they purchase tested 71°. They were very much surprised to know how our competitors were swindling them, and I think in future we will have no trouble in holding their trade.

We write you this to show you the methods our competitors take to take away our customers.

Yours, respectfully,

S. T. CURTIS.

SEPT. 27, 1904.

Reductions to meet cut prices.

Mr. C. G. TAPLIN, *Building.*

DEAR SIR: Confirming my brief talk with you this morning, and emphasizing the policy which we have pursued in the past in relation to our cut file record.

I desire to reinforce what has been done in the past, and request that you call your people's attention to the fact that it is the policy of the company not to change any particular local market without having positive evidence that the competitor has cut prices; and whenever such cases occur they are to pass through the regular channels this evidence, so that when the question is considered for final action there will be no question as to the fact of the competitor having cut the market, it being our desire not to reduce prices unless we are forced to do it in order to regain lost business which has been taken from us by cut prices made by competitors.

It goes without saying that general advances or declines which we may make will be governed by conditions, such as changes in the price of crude or changes in the price of products which would affect refined oils, or changes in freight rates or the cost of the package. All such questions have a bearing, and when different conditions exist naturally they will affect the general situation and necessitate changes. But these subjects are all of a general character, whereas my remarks on cut prices have particular reference to local markets.

Trusting that I have made myself clear, and that you will understand the same and see that your file is carefully kept here, so that at any future time should we desire to verify our position it could be done without question, I remain,

Yours, truly,

F. B. SQUIRE,
Vice Prest.

DEFENDANTS' EXHIBIT 113.

THE IMPORTANCE OF ENFORCING THE PROVISIONS OF THE INTERSTATE COMMERCE LAW IN RESPECT TO MAKING AND PUBLISHING SCHEDULES OF RATES.

The legal opinion of Messrs. Davis, Kellogg & Severance is published as an appendix.

By A. B. STICKNEY,
President, Chicago Great Western Railway Company.

The provisions of the interstate commerce law which relate to the construction and the contents of the schedule of rates must be regarded before the law can become effective in preventing discriminations.

In every department of railway operation, except the schedule making department, order, method, and system prevails. In schedule making there is neither order, method or system.

It is not the penalties of the law, but method, order, and system which keep the trains upon the track.

The time cards and rules for running trains must be exact and specific, printed in English in such form that men of ordinary understanding can comprehend; not in Greek or in a mysterious cipher which only one expert on each line can translate, which makes travel upon railways safe.

Time cards cannot be safely changed by publishing amendment after amendment and rule after rule until the trainmen, in order to know the time and rules, would have to examine one original card and thousands of conflicting amendments and rules.

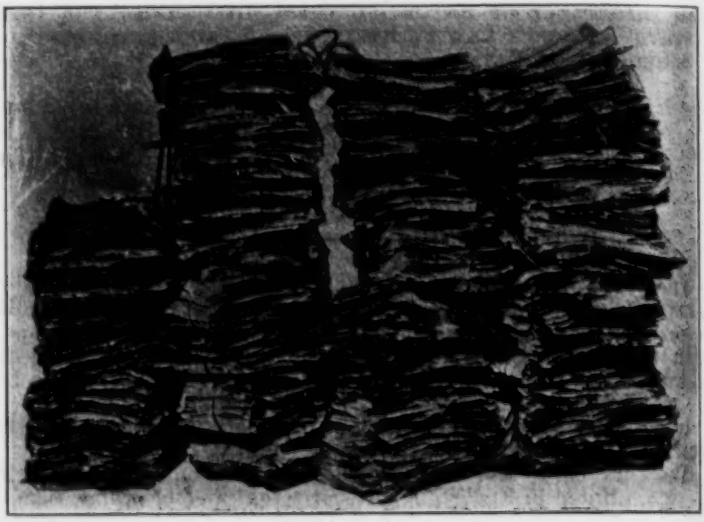

When a time card is changed, the whole card is reprinted and the old card taken up, so that engineers and conductors and the public are never compelled to examine more than one card.

No such order and system pertains to the schedule of rates. No railway company has ever published all its rates in one schedule in such a manner that railway agents who collect the rates, or the public who pay the rates, can tell with certainty the legal rates.

On the contrary, they have been published on detached leaves and booklets of a few pages, some leaves and some booklets containing a few specific rates, many containing no specific rates, but instead of specific rates, they contain rules for combining rates to produce specific rates which are incomprehensible to both the shipper and to the railway agents who collect the rates. This results in a great many mistakes in regard to rates which must be corrected by an overcharge claim.

The vast number of such mistakes due to the incomprehensible schedules will be best comprehended by inspecting the following photograph of the overcharge claims of a single average month by one of the smaller lines—the Chicago Great Western Company. In this connection it should be said that only a part of the mistakes are thus corrected, because the small shippers either do not discover the mistakes, or, if discovered, not knowing how to get them corrected, they pocket their loss and "cuss" the railway companies as swindlers.

Photograph of one average month's overcharge claims.

The pile is 6 feet long by 4 feet high.

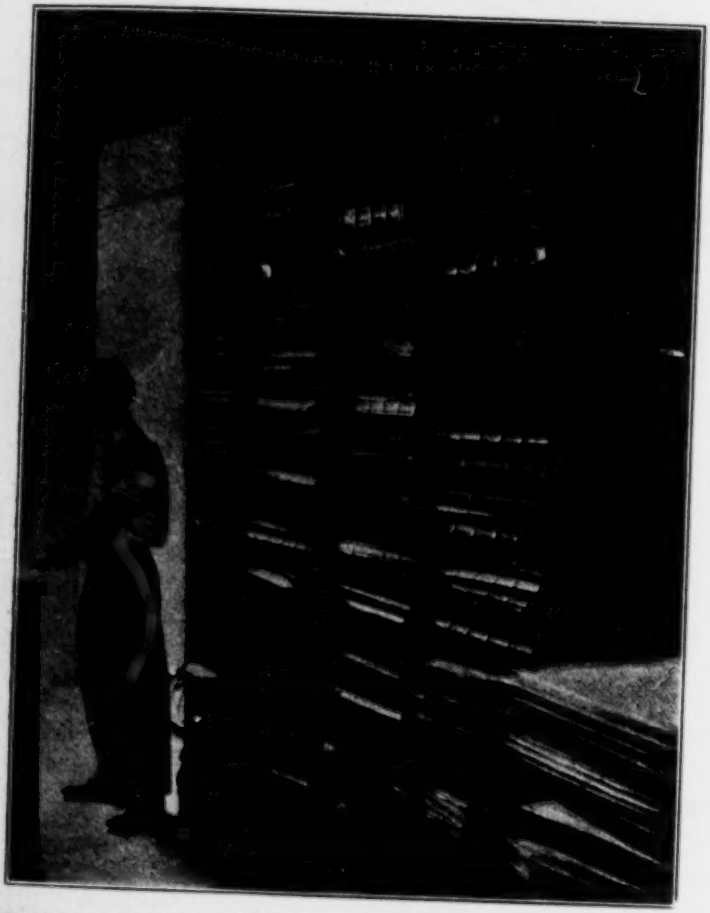

When changes have been made in the schedules, the companies have not republished their schedules, but they have published other leaves and booklets containing other specific rates, incomprehensible rules, and percentages as amendments to the original schedules, to such an extent that the complete schedules of each road, to-day, consist of thousands of separate leaves and booklets which name possibly, one-quarter of the specific rates, leaving three-quarters of the rates to be ascertained by combinations and percentages according to rules and unwritten customs which no layman can possibly understand.

It is impossible to convey by general language, any adequate understanding of the utterly hopeless conditions of the present schedules. Every railway has a special schedule room in charge of a schedule clerk where the schedules issued by itself and joint schedules issued by itself and connecting lines are filed, indexed and kept in order for reference. As soon as one schedule is entirely superseded by other schedules, it is taken out of the working or live files so that only schedules, which are still in force remain among the "working or live files."

I have had the schedules in the working files of the Chicago Great Western counted, and by actual count on the 9th of August, 1906, these working and live files contained 8,561 separate and disconnected schedules, some of them consisting of a single leaf, but most of them containing from 4 to 130 pages.

Over leaf is a photograph of the files, which conveys to the mind, perhaps better than words, the enormous bulk of schedules, amendments, and rules, printed in a cipher which no layman can understand, which, under present conditions, must be critically examined in order to ascertain the legal rates.

Photograph of the working files of schedules of the Chicago Great Western Railway containing, August 9, 1906, by actual count, 8,561 separate schedules filed in portfolio as seen.

The young man seen in the photograph is the schedule clerk constituting the supreme court of the traffic department. No other traffic official can find the rates and his answer as to a legal rate is final and conclusive.

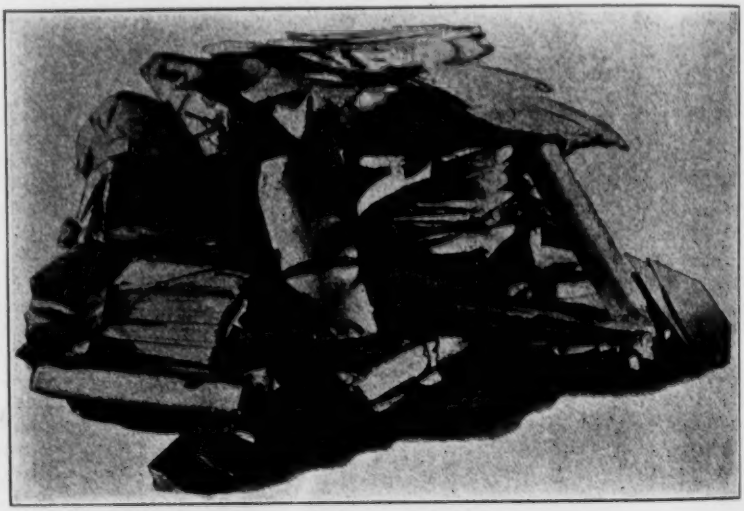

These schedules repeat the same rates over and over again to such an extent that all the rates the 8,561 separate schedules contain could be compiled into one volume about the size of Webster's unabridged dictionary containing less than 2,000 pages while each of the schedules as published has a title page making in all 8,561 title pages containing no rates whatever.

If the rates were thus compiled and as systematically arranged as the words in the dictionary any rate could be as easily found even by the laymen as any word in the dictionary can be found and such a schedule could be posted in each station for the information of the public as the law requires.

But it is impossible to keep these 8,561 separate schedules posted in every station on the line in such "form that they shall be accessible to the public and can be conveniently inspected" which is the exact language of the law.

Besides this is not the whole story. Every daily mail brings literally bushels of schedules issued by other lines which in some respects, affect the traffic of the line.

Photograph of one average day's receipt of schedules by the traffic department of the Chicago Great Western Ry.

Pile 3x2x2 feet equal to 14 bushels.

These bushels of schedules compel the issuing of an average of four schedules per day to keep our rates in line with new rates that the bushels of schedules disclose. The traffic department sends to the freight auditor, to be used in checking rates on the way-bills, an average of about 300 new schedules per week.

Twice a week there is a "send-out" of schedules to the station agents, which fill an ordinary express wagon in taking them to the train.

In compliance with the law, all of these schedules have been filed in depots, etc. Do they inform the public.

No layman, and but few station agents, can understand them. This is the boasted "science" of rate making.

It is my contention, that when the same method, order, and system is introduced into the schedule of rates and the rates between

all points are specifically named so that at all times freight agents, station agents and shippers can, by inspection of, not 8,000 schedules, but one complete schedule, determine for themselves the legal rates; then, and not till then, can the present discriminating practices be prevented.

SPECIFIC REQUIREMENTS OF THE LAW.

The law makes two specific requirements which are essential to every legal schedule:

First: The law requires that each schedule shall contain the classification of freight in force.

Second: The law requires that the schedule must state "all the rates, fares, and charges for transportation between different points on its own route and between points on its own route and points on the route of any other carrier when a through route and joint rates have been established," and if no joint rates have been established, that the several carriers comprising a through route "shall file, print and keep open to public inspection, the separately established rates, fares, and charges which shall be applied to the thorough transportation."

A schedule which does not contain these two specified requirements cannot be regarded as a legal schedule.

The law also provides that when schedules are changed, the whole schedule shall be reprinted, just as time cards are reprinted, or that changes shall be plainly indicated on the existing schedules which are posted in the depots and stations. As it is impracticable to make such changes plainly appear on the existing schedules, the law in effect, requires that when rates are changed, the old schedules shall be canceled and new schedules printed containing the classification and all the rates, fares, and charges.

Such are the provisions of the law. The evident intention is that the schedules shall be made and continuously kept in such form that persons of ordinary intelligence can, by inspection of, not thousands of schedules, but substantially one schedule, determine for themselves the legal rates which they may desire to use.

This can be accomplished in no other way than by compiling and publishing all of the rates in connection with the classification in substantially one bound book. It would be substantially one book if published in two numbered volumes—Volume 1 containing all the local interstate rates of the company issuing it and Volume 2 containing all the joint rates to which such company is a party. In no other way is it possible for the layman to know that he has inspected all of the schedules. Besides the publication of more than 8,000 separate schedules affords the opportunity for the same dexterous manipulation of schedules which is practiced by the "three card monte gang" with cards.

If the names of the places were arranged systematically and alphabetically in the manner of the dictionary, there could be no duplication of rates, the highest to be paid by the small shippers and the lowest by the large shippers, and any desired rates would be found as quickly and as certainly as any equal number of words in the dictionary.

When changes are made, the law requires this whole book to be reprinted just the same as when changes are made in the time cards of passenger trains, the well-known publication known as the Official Railway Guide is entirely reprinted. This practice would confine all the rates at all times to one book, so that at all times it would be necessary for a shipper in order to ascertain a desired rate, to examine only one book.

SPECIFIC REQUIREMENTS OF THE LAW DISREGARDED.

No railway company ever attempted to comply with the law. The companies have never compiled all their rates into one schedule or book of schedules so that they could be posted in all of their stations in such a manner as to be convenient for inspection by the public.

The classification is the foundation of the schedule of rates and the law specifically requires it to be a part and parcel of each schedule. This requirement of the law has always been disregarded.

The classification consists of grouping different forms of property, according to the rates each should bear, based on the cost of carriage.

At present, there are two general classifications used by the railways; one is called the Western Classification, containing ten classes, used by the railways west of Chicago, and one is called the Official Classification, containing only six classes, used by the railways east of Chicago, so that a shipment from the Atlantic Seaboard to a point west of Chicago takes the rate of one class to Chicago and the rate of another class west of Chicago, which introduces into the schedules another unfathomable difficulty.

But even this practice is not uniform. The Eastern Classification extends through to certain destinations west of Chicago and not to others. Still other destinations west of Chicago, by an unwritten custom, not shown in any schedule, are entitled to take the lowest classification which is contained in either the Eastern or the Western Classification.

And, as if the facts which have been stated were not sufficient confusion to confound the minds of shippers, each carrier, paradoxical as it may appear, changes the classification without changing it, by leaving certain commodities in the classification, while making lower rates on such commodities by issuing separate schedules with lower rates, called "commodity rates" as distinguished from classified rates.

The method of ascertaining a rate by the inspection of a schedule, like, say a rate on brick from Boston to Chicago, is to first look in the classification and find the class to which it belongs, then find the rate for that class in the schedule of rates.

Pursuing this method, the layman would find brick, in carloads, in the 6th class, and turning to the schedule the rate would be found to be 25 cents per cwt. There are no notes or marks on either the classification or the schedule which would indicate that there was any other rate.

But the layman who might have the patience and industry to examine critically the more than eight thousand schedules on file in the depot would find a special commodity schedule for brick naming 22 cents per cwt., and I am not prepared to say how many more rates

he might find if he continued his search to the end of the more than eight thousand schedules.

One man, who is now a traffic manager, told me that when he was station agent, by diligent search of his schedules he found eleven different rates on the same commodity between his station and Boston. By the haphazard method of schedule making three or four different schedule rates are not unusual on the same commodity between distant points, many of them the result of mistakes, but some of them are intentional, for the purpose of discrimination under the forms of the law.

It goes without saying that the small shippers pay the highest of such scheduled rates, and that the large shippers, who employ expert traffic managers who devote their whole time to the study of schedules, pay the lowest rates.

MANIPULATION OF SCHEDULES.

I have said that the publication of thousands of separate schedules repeating the same rates over and over again affords the opportunity of manipulating schedules in such a manner as to produce all the evils of the secret rebate under the color of a compliance with the law.

I will now illustrate the present practices in respect to such manipulation of schedules by concrete examples.

EXAMPLE NO. 1.

The Western Traffic Association published joint schedules of rates on flour from Minneapolis to Cincinnati and other points in that territory which are public and understood by all the station agents at Minneapolis who do the way-billing of flour. The rate under this schedule is 19½ cents.

While I was preparing this paper a new schedule, issued by one of the companies which was a party to the joint schedule, was brought to my attention.

To all appearances it was not a flour schedule, but a wheat, barley, and flaxseed schedule. Its title-page had in large black-face type "Wheat, rye, barley, corn, and flaxseed," but no flour. The table of rates which it contained covered the whole page and were rates on wheat, rye, barley, corn, and flaxseed in bold type. The page was surrounded by a bold black border. On the narrow margin below this black border was printed in letters so fine that they could scarcely be read the following words:

"Grain products, carloads, when destined to southeastern territory, 15 cents per 100 lbs."

After this schedule the road issuing it would claim that 15 cents was a schedule rate, and consequently it had two rates for flour—which is called grain products—between Minneapolis and the Cincinnati territory; one a rate of 19½ cents, which all the millers knew. The other rate was 15 cents, which only one large miller knew.

All the country millers would pay the 19½-cent rate and get nothing back. The large miller who had the understanding would pay the 19½ rate, then put in a claim for an "overcharge," not "a rebate," and in due time the overcharge would be paid.

As this is a common form of swindling, I have had this identical schedule photographed, as a curiosity to the layman.

Photograph of the swindling schedule.

GRAIN PRODUCTS, carloads, as described in Exceptions to Official Classification, Joint Through Freight Tariff W. T. L. No. 88, C. C. No. 787 G. F. D. No. 1309, amendments or subsequent issues, when destined to South-Eastern Territory, will cross at 100 lbs.
*Per Kennedy.
†Applies only when destined to South Eastern Territory. Local rates are on wheat 15 cents.
‡Minimum weight 35,000 pounds.
||Minimum weight 40,000 lbs.

Examine this schedule with a microscope and find the 15 cent flour rate or any other flour rate if you can.

This schedule also illustrates the enormous amount of dead wood embraced in the schedules filed with the Commission.

The schedule is a reprint of an existing schedule, reprinted for the sole purpose of printing the 15 cent flour rate in such an unexpected

place and in such an obscure manner that it would not be seen by any shipper or competing line, except the particular miller for whom the rate was made. It came to my notice because the miller "gave the snap away."

This schedule is not exceptional, but such schedules are a recognized practice. Hundreds of thousands of such schedules have been filed with the Commission, and nobody but the Commission can prevent the filing of such swindling schedules.

Now it is beyond question that if schedules were made in conformity to the law, in one book systematically arranged, there would be but one place where a rate from Minneapolis to Cincinnati could be named, and it would be impossible to have two schedule rates.

EXAMPLE No. 2.

While I was preparing this paper, the assistant United States district attorney brought to my attention a schedule of rates without date, naming 7½ cents as the rate on wheat and flour from Minneapolis to Duluth and Superior, which is understood to be the rate by all competitive lines.

At the same time he showed me another schedule issued by the same line, also without date, naming 5 cents as the rate.

This is another case of two rates which could not possibly exist if schedules conformed to the law.

EXAMPLE No. 3.

For a long time the schedule rates by all lines between Missouri River points and Chicago were 12 cents on wheat and 11 cents on coarse grains. Examine that schedule with a microscope, and nobody can discover that those were not the rates. But if one hunts through the 8,500 schedules on file at the stations, on some other schedule on each line—perhaps on a schedule naming dry goods rates between Chicago and St. Paul or between Chicago and St. Louis—will be found a rule in fine type in unintelligible language, which means that the line will pay back to the shippers of grain from the Missouri River points to Chicago 1¼ cents per cwt. upon a claim being made for an "overcharge." Of course no one would make a claim for "overcharge" who had not discovered the rule.

Such manipulation of schedules could not be accomplished if schedules were made in conformity to the law.

EXAMPLE No. 4.

Soliciting freight agents will come to an understanding with a shipper to haul a specific amount of traffic at a rate less than the schedule rates, which other shippers pay. Then a so-called schedule will be made and filed with the Interstate Commerce Commission naming the contract rate covering the specific shipments "to expire when shipment is completed."

The following is an exact copy of one of such schedules, except the names of the lines are left blank:

I. C. C. No. 521.

Export Contract 33992.

Steamship Contract. Read 324.

The ..... Railway.

..... Transit Co.

.....Line.

APPLYING ON

1000–140 Bags flour.

C Via Chicago, care.....Co.

Effective JULY 17, 1906.

Expires with shipment Sept. 17, 1906.

From—	To—	Rates in cents per 100 lbs.
Kansas City, Mo. Orig. byd.....	Glasgow, Scotland.....	25-4

Issued by.....

G. F. A.....Ry.

The division of the rates gave the railways 18–4 cents from Kansas City to the Atlantic port of export, and 7 cents to the steamship company. The domestic rate from Kansas City to said port of export was 30½ cents. So if this flour was not in fact exported, and there are reasons to suppose it was not, the shippers, by this device, got in effect a rebate of 12 cents per cwt.

This schedule is not exceptional, but such schedules are a recognized practice. Hundreds of thousands of such schedules have been filed with the commission, and nobody but the commission can prevent the filing of such swindling schedules.

"Read 324" means that this schedule is the three hundred and twenty-fourth special contract which the company issuing this tariff had made with one Read, who is a broker for a lot of county mills, and it is a suspicious circumstance that the most of their output seems to be exported.

If schedules conformed to the law, this class of discriminations could not be practiced.

EXAMPLE No. 5.

When the schedule rate on some commodity largely controlled by a great corporation is, say, $3.00 per ton, Chicago to the Missouri River, the sales agent, in the month of July, will come to an understanding with some or all of the railways that he will ship a big tonnage in October if he can be assured of a "schedule rate"—no rebates taken—of $2.00 per ton in the coming October.

Armed with this understanding, he contracts with all the principal dealers on and west of the Missouri River to deliver after October 1st their winter's supply at a price based on the $2.00 rate.

At the proper time, the new law requiring thirty days' notice, each line issues a single-leaf schedule naming the $2.00 rate. It is filed among 3,000,000 schedules in the office of the Interstate Commerce Commission and buried in the thousands of schedules at the stations. Nobody but the party with whom the understanding was had knows about it. But if a small producer, by any chance, finds it out, it is useless to him because the market has already been supplied before the schedule was made.

Such discriminations could not be worked if schedules were made in accordance with the law.

EXAMPLE No. 6.

Another method is to build up a long schedule of apparently specific rates, and then print a rule on another schedule that a certain rate like the St. Louis rate shall be the maximum rate of the schedule, and on still another schedule, a rule that the Memphis rate, which is lower than the St. Louis rate, shall be the maximum.

By this device two, three, or more schedule rates can be maintained at the same time—the small shippers and the unsophisticated always paying the highest rates.

Such a practice could not exist if the schedules were constructed in accordance with the law.

My space will not permit of further multiplying examples of gross discriminations under a color of law produced by "manipulation" of schedules. Their names are legions.

It is my deliberate conviction that if the making of such illegal schedules as are designed to secure temporary tonnage to the railway by the grossest discriminations in respect to rates were stopped by enforcing the law, in regard to schedule making, more than 99% of the present schedule-making would be stopped.

The railways unsupported by the enforcement of the law are powerless to prevent such manipulations of schedules, because under competitive conditions the railways can take no corrective action without the unanimous and continuous concurrence in good faith of all the railways.

The most conclusive evidence of such inability on the part of the companies, is the fact that some years ago a committee prepared a uniform classification for the whole country to take the place of one classification east of Chicago and a different classification west of Chicago.

Every railway company in the United States, except two companies, agreed to the uniform classification, and because two companies refused, the uniform classification failed.

WHO CAN ENFORCE THE LAW?

The law gives the commission ample and effective power to compel the making and publication of the schedules in accordance with the law, which would prevent and render physically impossible the discriminations as now practiced by manipulating schedules.

The law provides three methods of enforcement:

1st. It provides that no railway shall engage in interstate traffic until it has made, filed, and published legal schedules of rates. This provision is enforceable by injunction of the court upon motion of the commission only.

2nd. It provides a fine of not less than $1,000 or more than $20,000 for each offense for failure to make, file, and publish legal schedules. This provision is enforceable by indictment on motion of the commission only.

3rd. It provides that the commission may prescribe the form of the schedules.

It may be well doubted that the enforcement of the penalties would produce legal schedules.

The enforcement of the penalties of the law is necessary, but the impositions of penalties are, like strokes of lightning, effective when they hit, but both hits by lightning and hits by penalties are so infrequent that human life is reasonably safe from lightning, and rate discriminations are reasonably safe from penalties. And as long as mankind knows no safeguard against lightning, and as long as rate makers are unable to safeguard against discriminations, little attention will be paid to the dangers of being hit by lightning or by the penalties of the interstate commerce law. As a matter of fact, during the first fifteen years of the law lightning has hit oftener than penalties. In the first fifteen years of the law it is estimated that more than a billion dollars were paid in rebates, and the records of the Attorney-General's office show, as a matter of fact, that only $15,000 were paid in fines.

This therefore may be regarded as the net result of fifteen years of the penalties of the law:

$15,000 of fines against $1,000,000,000 of rebates.

But there are other provisions of the law which give a power and impose a duty upon the Interstate Commission which, if exercised, and enforced by calling attention to the penalties, would be effective in producing legal schedules.

The law provides that all schedules shall be filed with the commission before they become effective.

Under these provisions it is the duty of the commission to accept and file all *legal* schedules, but it is clearly a breach of duty on the part of the commission to accept or file *illegal* schedules.

In support of this proposition of law, I cite the opinion of the well-known lawyers, Messrs. Davis, Kellogg & Severance, which is printed as an appendix hereto, which opinion concludes as follows:

"If the Interstate Commerce Commission are desirous of obeying the law they expect carriers to obey, it is clearly their duty to prevent the filing of illegal schedules, supplements, and amendments."

The duty of the commission to obey the law which created the commission for the purpose of enforcing the law seems doubly obligating from the fact that the law provides no method by which the individual can protect himself.

Under the law as it stands the individual knowing that his business is being ruined by unlawful rates given to his competitor has no rem-

edy except to appeal to the commission. Nobody but the commission can put the law in motion to produce legal schedules or to protect the rights of the individual in respect to equality of rates.

Heretofore it has been the practice of the commission when an individual appealed for such protection to summons the parties complained of and require them to testify as to the facts. Having thus given the guilty parties an "immunity bath" against the penalties of the law in the course of months or years, it has filed an opinion that the practice was illegal, but the penalties of the law are unenforceable because the parties having testified are immune from prosecution.

This is not enforcing the law, but defeating the law, and the practice should be discontinued.

Of what use to the individual after his business is destroyed is an opinion of the commission that a practice is illegal which everybody knew was illegal without the opinion of the commission?

The new law provides ample means for ascertaining the facts without that kind of investigation, and the commission should understand that in respect to the enforcement of the law its duties are executive and not judicial, and that instead of holding public investigations and writing impotent opinions they should do something which is effective, and that it is more useful to prevent discriminations than to punish discriminations.

Now, it seems to be beyond doubt that if the Interstate Commission should prescribe a uniform form for schedules and should give the companies notice that it would hereafter neither accept nor file illegal schedules, and should give the companies ample time to compile and publish their rates in a legal form, and should couple such notice with a further notice that if legal schedules were not filed within the specified time the commission would apply to the courts for injunctions against the companies in default, restraining such companies from engaging in interstate traffic until they had filed legal schedules, and in addition the commission would take steps to enforce the penalties against such defaulting companies, the legal schedule would be brought into existence.

The commission should refuse to file illegal schedules pending the compilation of the legal schedules, because such a compilation could not, in the nature of things, be made while new schedules changing existing rates were being made, as now, at the average rate of more than 400 schedules per day.

In making such a rule, the commission need not fear that the business of the country will suffer for the want of schedules. With more than 2,500,000 separate schedules on file in the office of the commission and with from 8,000 to 10,000 schedules in the working files of each company, there are evidently schedules enough to carry the traffic of the country for years.

Besides, I am confident that, except for the purpose of giving a special rate to some important shipper which the law forbids, no more such illegal schedules as now exist need be made, and further, that, if debarred from making a new schedule to give a special rate to an important shipper, there is no freight agent so unresourceful that he can not "cough up" some existing rule which will "justify" the desired rate.

WHY ARE ILLEGAL SCHEDULES FILED BY THE COMMISSION?

It may seem so incredible that the commission has disregarded its duty in respect to filing illegal schedules for so many years that many readers may conclude that the commission does not regard most of the 2,500,000 schedules which it has filed in its office at Washington as illegal schedules.

On the contrary, in the case of *Suffern, Hunt & Co.* vs. *Indiana D. & W. R. R. Co.*, 7 I. C. C. reports, 258, and several cases therein cited, the commission has held that the schedules were illegal, inasmuch as they were not printed in such a manner that people of ordinary understanding, by inspection of the schedules, could determine for themselves the legal rates, and that schedules cannot legally be changed by amendments and rules.

But in each case the commission has been satisfied with writing and publishing an opinion to the effect that they were illegal.

The fact seems to be that the commission, like a great many of the people, have been hypnotized by the constantly repeated, absurd, and untruthful assertions on the part of the traffic managers, that it is impossible to make and publish schedules in the manner that the law requires schedules to be made and published.

Against these assertions by the traffic managers I make the most positive assertion that schedules meeting all the requirements of the law can be made, because schedules of the classified rates of the Western lines from such commercial centers as Chicago and Milwaukee, St. Paul and Minneapolis, Omaha and Council Bluffs to all western stations, alphabetically arranged in one book in such a form that merchants can, by inspection, determine the rates, have already been compiled, not by the railway companies, but by Mr. Wm. F. Stebbins, of Des Moines, Iowa, as an independent occupation.

Mr. Stebbins commenced these compilations about five years ago, and they have now become so popular with the merchants, and the demand for them has become so large, that the publication has become Mr. Stebbins's sole occupation.

Each of the books have only 64 pages, 10 inches by 5½ inches in size, but so convenient and useful are they that merchants, rather than to accept, without cost, the incomprehensible schedules printed by the railroads, readily pay $3.00 per volume for Stebbins' compilation.

The Stebbins compilation, without change of form, has only to be enlarged so as to embrace all the rates and the classification to make such a schedule as the law requires.

For the information of the public, and to support my statement with incontrovertible evidence, I print herewith a copy of a single page of Mr. Stebbins' compilation.

With such conclusive evidence as this, of both the feasibility of making and the demand on the part of the public for such schedules, what possible excuse can the commission give for not at once adopting a form for the schedule and enforcing the publication of all the schedules in such form?

A PROVISION OF THE LAW TO PREVENT PRACTICAL FRAUDS.

To prevent practical frauds being committed by the unscrupulous by secretly making unjustifiable rates in reprinting schedules, that provision of the law which says "no change shall be made in rates * * * except after thirty days' notice to the commission and the public published as aforesaid which shall plainly state the changes proposed to be made," must be strictly enforced.

This notice is preliminary to the actual reprinting of the schedules, and a company having given this notice is debarred from making any other changes in the reprinting of the schedules. Thus completely has this law provided for a square deal between the railways and the railways, as well as between the railways and the public.

ADVANTAGES OF LEGAL SCHEDULES.

Besides preventing unjust discriminations by manipulating schedules, the advent of legal schedules would be of inestimable advantage to both the railways and the public.

Without attempting to enumerate all, I will mention the most important advantage which would inure to the companies.

The publication of legal schedules will introduce the principles of publicity, which are of recognized importance in all dealings with the public. The public being able, by inspection of the schedules, to determine for themselves the legal rate, will prevent suspicions that they are being "jockeyed" in respect to rates. Mutual confidences instead of increasing distrust will be fostered. And in process of time, just as distrusts were abolished and confidences established between the merchant and his customers, when the merchant adopted the practice of marking the price of his wares in plain figures instead of a private cipher, so will this publicity of rates replace distrusts with confidences and thereby establish the most effectual barrier against that increasing popular resentment which sometimes almost threatens confiscation of railway property.

The vast majority of the middle classes—in respect to wealth—of American citizens, who now and always will control legislation, are lovers of the "square deal," and when the railways are prepared to deal fairly with them they will deal fairly with the railways.

The advantages to the public will be manifold. Next to preventing discriminations, the most conspicuous will be the establishment of reasonably stable rates, with sufficient elasticity to meet all the natural conditions of trade. Such reasonable stability of rates will enable all classes of productive industries to plan their business in advance, with assurance that the rates of to-day will be the rates some months later. It will enable such industries to take advantage of the markets in purchases and to contract with safety for future deliveries.

It will be a special matter of justice to all shippers who, under the new law, are under most extraordinary penalties to pay the full schedule rates. Under legal schedule each shipper can determine for himself such legal rates, while under present conditions he must risk his fortune and his personal liberty upon the word of a freight agent whose zealous desire to secure traffic for his company frequently leads him to take most unwarranted chances in construing the meaning of rules and schedules and in quoting rates.

The new law is now in effect. The railway companies desire to obey it. But owing to the impossibility of so many companies coming to a unanimous agreement upon the details of schedule making, the companies without the aid of the commission are unable to adopt a form which will prevent manipulation of schedules.

The responsibility rests with the Interstate Commerce Commission.

The law deprives the individual of his natural right to protect his equal privileges upon the nation's great highways and confers the power and duty of thus protecting individual rights upon the commission alone. No longer can the commission plead want of power as a justification for inaction, as the amended law gives ample means and power to enforce the law, which, if exercised with intelligence and courage, will confer the expected benefits upon the people. If the commission performs its duty, its members will be rewarded by the respect of their fellow-citizens. If it fails they will merit and receive the contempt of their fellow-citizens, and the law, instead of doing justice, will become an instrumentality of injustice.

APPENDIX.

THE LEGAL OPINION OF MESSRS. DAVIS, KELLOGG & SEVERANCE:

FRANK B. KELLOGG
CORDENIO A. SEVERANCE
ROBERT E. OLDS

Davis, Kellogg & Severance
ATTORNEYS AT LAW
St. Paul, Minn.

JULY 28, 1906.

Mr. A. B. STICKNEY,
Pres., Chicago, Great Western Railway Co.,
St. Paul, Minn.

DEAR SIR: You ask our opinion as to whether under the interstate commerce act it is the duty of the Interstate Commerce Commission to receive and file circulars or sheets purporting to amend or change the rates shown upon schedules already filed pursuant to law, or whether, on the contrary, the law contemplates the printing of new schedules or the placing upon existing schedules whatever amendments may be made from time to time.

We are of opinion that it is the duty of carriers to print new schedules or to place upon the existing schedules the proposed changes. The interstate commerce act in this particular seems clear and unam-

biguous. The portions of sections 6 of the act as amended which are material to the question under discussion read as follows:

"No change shall be made in the rates, fares and charges or joint rates, fares, and charges, which have been filed and published by any common carrier in compliance with the requirements of this section, except after thirty days notice to the commission and to the public, published as aforesaid, which shall plainly state the changes proposed to be made in the schedule then in force and the time when the changed rates, fares, or charges will go into effect; *and the proposed changes shall be shown by printing new schedules, or shall be plainly indicated upon the schedules in force at the time, and kept open to public inspection.* * * *

The commission may determine and prescribe the form in which the schedules required by this section to be kept open to public inspection shall be prepared and arranged, and may change the form from time to time, as shall be found expedient."

The purpose of printing and posting tariffs is to give information to the public so that any person of average intelligence can, by an examination of the tariff posted in local stations ascertain the charges imposed for the transportation service. It is certainly within the power of the commission and it is their duty to require the original schedules to be compiled and printed with such method and system that the rates can readily be found. While the amended act extends to the commission power to "modify the requirements of this section in respect to publishing, posting, and filing of tariffs, either in particular instances or by a general order applicable to special or peculiar circumstances or conditions," it was clearly not intended to authorize the commission to annul a provision of the law so important to the public, and the commission has not in any of its opinions shown any disposition to relieve carriers from the obligations of the law in this respect.

In the case of *Rea* v. *Mobile & Ohio R. R. Co.*, 7 Interstate Commerce Rep., page 43, it was held that posting notices in a railway station that all rates are on file in the office of the station agent and may be examined upon application to such agent, does not constitute compliance with the requirements of the act in respect to the posting by a common carrier of printed schedules showing its rates, fares, and charges.

This rule was reaffirmed in the case of *Johnson* v. *C., St. P., M. & O. Ry. Co.*, 9 Interstate Commerce Rep., 221. In that case it appeared that the printed schedules were not publicly posted in the station house of the railway company, but a printed notice was posted on the wall inside the station, reciting, "The agent is supplied with a complete file of freight tariffs and rates of fare applying to and from this station, and that he is instructed to submit these tariffs and rates of fare to the inspection of anyone desiring to make shipments or to travel, and to explain fully such tariffs and rates and the manner in which they are obtained." The reason given for posting this notice instead of posting the tariffs, was that the tariff sheets were constantly being defaced or torn from the walls. The commission held that that was not a sufficient excuse, and that the posting of the notice on the wall of the station stating where such tariff sheets may be found, was not a sufficient compliance with the requirements of the law.

The practice of depositing the schedules with the agent and posting a notice in the station that they can be seen upon application to him is again disapproved by the commission in the case of *Paxton Tie Co.* v. *Detroit Southern Railroad Co.*, 10 Interstate Commerce Rep., page 422.

In the case of *Pitts & Son* v. *St. Louis & San Francisco R. R. Co. and Texas & Pacific Ry. Co.*, 10 Interstate Commerce Rep., page 684, the commission decided that a notation upon the tariff sheets of the Texas & Pacific Co. to the effect that where a lower rate could be made by any combination than that by which the traffic actually moved such combination would be protected, could not be regarded as the legal publication of a rate by that company. We quote from the syllabus in this case:

"That it is the duty of railroad companies, under the act to regulate commerce, to print, publish, and file tariffs showing rates which are so simplified that persons of ordinary comprehension can understand them; and that a notation in the tariff of one carrier making reference to the tariff of some competing carrier does not meet the requirements of the law that the rate charged shall be published and filed."

In the case of *Suffern, Hunt & Co.* v. *Indiana, Decatur & Western Ry. Co.*, 7 Interstate Commerce Rep., 255, the commission, at page 278, in considering the question as to whether a circular fixing minimum weights was effective, although filed with the commission, when it did not appear upon the schedules themselves, said:

"The law requires that the minimu n weight rule or regulation itself shall be stated on the tariff or schedule of rates, if it is to be made effective and that changes in such minimum weight, thereby advancing or reducing the charge, shall be shown by printing new schedules or plainly indicating such changes upon the existing rate schedule. Where slight changes are made in an existing schedule showing numerous rates, the printing of a supplement or amendment to the schedule showing such changes has been regarded as substantial compliance with the statute, but we have in different cases called attention to the uncertainty and confusion caused by the issuance of a considerable number of supplements or amendments to a rate sheet, and have pointed out that such practice is not in conformity with the law. *Colorado Fuel & I. Co.* v. *Southern Pac. Co.*, 6 Inters. Com. Rep., 488; *Johnston-Larimer Dry Goods Co.* v. *Atchison, T. & S. F. R. Co.*, 6 Inters. Com. Rep., 568. * * * Shippers and consignees can not, therefore, depend for the lawful rate or charge upon what may be quoted by the carrier's agent, but they must be guided by the published rate sheets themselves. Such interpretation of the law emphasizes the legal duty of the carriers to make their schedules of rates comply precisely with the mandatory provisions in the statute concerning the contents and publication of such schedules, in order that shippers may, upon inspection, be enabled to readily and accurately determine what rates, and what transportation rules affecting rates, are actually in force for any particular service."

In the case of *Colorado Fuel & Iron Co.* v. *Southern Pacific Co.*, cited by the commission in the last-mentioned case, the following statement appears in the conclusions of law, at page 519:

"Another reprehensible practice is that of a carrier reissuing the tariff of another line and, by supplement concurrently issued, limiting

its use of the rates therein prescribed to such as are over a specified minimum. Some of the rates sheets, obscure in themselves, have been so changed by numerous amendments and supplements as to make it impracticable to determine with certainty what rates are in force over the roads to which they apply. The only satisfactory method of publishing rates is to definitely state the charges fixed between points clearly specified, without burdening and confusing the public with involved calculations, or with scrutinizing a series of supplements to determine whether a particular rate has been changed since the original tariff was issued. The carriers are expected to remedy the defective character of their rate schedules, both as to form and contents, without delay."

From these authorities it seems apparent that the commission has not at any time sanctioned any departure from the strict language of the act with reference to the making and posting of schedules, and while they have not prevented the filing of supplementary tariffs, they have ruled, as we have shown, that they do not comply with the law.

In the case of *Suffern, Hunt & Co.* v. *Indiana, D. & W. R. R. Co.*, from which we quoted above, the commission further said:

"The fact that these circulars have been filed by this defendant with the commission, and that others containing similar provisions have been filed by other roads, and that this commission has not heretofore expressed an opinion upon the legality thereof, does not, as apparently claimed in defendant's answer, raise any presumption of approval by this commission of the rules or regulations therein set forth or of the manner in which they have been established. (*San Bernardino Board of Trade* v. *Atchison, T. & S. F. R. Co.* 4 I. C. C. Rep. 114, 3 Inters. Com. Rep. 138)."

Under the decisions to which we have called attention, it seems clear that the commission has not at any time intended to approve of or permit any departure from the rule of conduct laid down in the act, and being of opinion that supplementary tariffs, so-called, are not authorized by law, it would seem that the commission should refuse to permit such supplements to be filed. By continuing to receive them it does one of two things: Either inferentially winks at a violation of law, or permits its files to be encumbered and confused by an enormous number of documents which have no place there. There is no specific statute prohibiting the filing of these papers except as such prohibition may be inferred from the failure to authorize such filing; but that we do not regard as material. The law of the state of Illinois authorizing the organization of corporations provided by section 2 that no license should be issued to two companies of the same name, and by section 4 that the secretary of state should receive and file in his office a certificate of the vote of stockholders changing corporate names. In *Illinois Watch Co.* v. *Pearson*, 140 Ill., 423, it was held that where the secretary of state had refused to file a certificate of a vote of the stockholders of a corporation changing its name for the reason that the proposed name had been previously assumed by another corporation, mandamus would not lie to compel him to file it. On page 433 the court said:

"If said section 4 be considered by itself, it would seem that the filing of the certificate of change of name was a mere ministerial act and that the secretary of state had no discretion in the matter of

allowing it to be filed. But we are inclined to the view that section 4 should be construed in connection with section 2 of the corporation act. By the latter the secretary of state is clothed with the discretionary power of refusing a license to two corporations of the same name. If after he had granted a license for the formation of a corporation by a certain name, he should suffer an existing corporation to file a certificate showing its adoption of that same name, he would thereby be consenting to the existence of two corporations in the State of the same name. This would be a violation of the spirit, if not the letter, of the statutes."

This decision we regard as especially significant in the connection in which we are quoting it, by reason of the fact that the law gives the Interstate Commerce Commission power to prescribe the form and contents of schedules. It seems clear that if the commission refuses to permit the filing of papers which they have specifically held do not comply with the statute, no carrier can, by mandamus, compel the acceptance of such papers. It is a familiar rule that to entitle a deed to record it must be executed in accordance with the statute, and if by chance a defective deed is spread upon the records, it does not give constructive notice, and hence merely cumbers the records without serving any purpose whatever. See Devlin on Deeds, Secs. 645, 646, 656, and 657.

That rule was applied by the commission in the case of *Suffern, Hunt & Co.* v. *Indiana, D. & W. R. R. Co.*, from which we have heretofore quoted, for while the circulars fixing minimum rates were on file with the commission, they were held ineffectual because not appearing upon the schedules, as required by law, and the commission ordered reparation.

There are two cases in the District of Columbia which indicate that the courts of the District, in case an application for mandamus should be sued out by any railroad company to compel the acceptance of schedules not made up in conformity with the law, would refuse to order them filed.

In the case of *Dancy* v. *Clark*, 24 Appeal Cases (D. C.) 487, a writ of mandamus was prayed against the recorder of deeds for the District of Columbia to require him to receive and record a certificate of incorporation which he had refused to receive and record, on the ground that it violated the provisions of the code for the District in that the certificate contemplated the carrying on by the proposed corporation of five several classes of business instead of one separate and independent business. He also objected to recording this certificate on the ground that the same was not executed by all of the proposed trustees, and further because it contemplated the use of funds of the corporation in the purchase of the stock of other companies, in contravention of law. The court held that while the recorder of deeds was a ministerial officer without jurisdiction to pass upon the validity of an instrument in writing presented to him for record, he was not wholly without discretion to determine whether a given instrument should be admitted to record, and that mandamus would be refused where an inspection of the instrument by the court showed that it was not executed in accordance with the statute.

In the case of *Allen* v. *United States*, 22 Appeal Cases (D. C.), 271, it was held that where the Commissioner of Patents denied

an application for registration of a label on the ground that it was not descriptive of the article for which it was used and therefore not entitled to registration under the act of Congress of June 18, 1874 (chapter 301, 18 Stat. at Large 78, and U. S. Compiled Stat. 1901, page 3411), the Court of Appeals for the District had no power to review the decision by mandamus, as his duty under the statute does not simply require the performance of a mere ministerial act, but also requires the determination by him of whether the thing presented for registration is or is not a label as defined by the statutes.

These decisions are important, because they are rendered in the courts that would naturally be applied to for relief by any railroad company seeking to enforce the filing of schedules or supplements.

We are of the opinion that a railroad company could not compel the commission to accept faulty schedules or amendments thereto, and therefore, as we must assume that the Interstate Commerce Commissioners are desirous of obeying the law which they expect the carriers to obey, it is clearly their duty to prevent the filing of illegal schedules, supplements, or amendments.

Respectfully, yours,

E DAVIS, KELLOGG & SEVERANCE.

DEFENDANTS' EXHIBIT 115.

TARIFF CIRCULAR NO. 4–A.

INTERSTATE COMMERCE COMMISSION,
Washington, September 29, 1906.

To ———

The Interstate Commerce Commission, in answer to numerous inquiries from railroad officials and other interested persons and for the purpose of giving administrative construction to certain provisions of the amended act to regulate commerce which became effective on the 28th day of August, 1906, announces the following rulings:

Notice of changes in rates.—Where a joint rate is in effect by a given route which is higher between any points than the sum of the locals between the same pionts, by the same route, such higher joint rate may, *until December 31, 1906*, be changed by reducing the same to the sum of such locals, but not otherwise, upon posting one day in advance a tariff of such reduced rate and mailing a copy thereof to the Commission.

Desire to meet the rates of a competing road or line which has given the full statutory notice of change in rates will not of itself be regarded as good cause for allowing changes in rates on a notice of less than thirty days.

Party rate tickets.—The tariffs and regulations governing the issuance and use of party rate tickets, together with the rules relating to the allowance of free baggage to persons using such tickets, must be regularly filed and published. The privileges so extended must not be limited to any particular class or classes of persons, but must be open to all. Regulations governing the issuance and use of party rate tickets must not be such as will operate to evade or nullify any provisions of the law. The commission suggests that the rules should provide that the party shall travel on one ticket and consist of not less than ten persons.

In special or emergency cases prompt consideration will be given to requests to change tariff rates governing party rate tickets on less than thirty days' notice, when such requests are accompanied with full information as to the conditions and necessities upon which they are based.

Filing intrastate rates.—All intrastate or other rates which are used in combination with interstate rates for interstate shipments must be posted and filed with the Commission, and can only be changed, as to such traffic, in accordance with the act.

EDW. A. MOSELEY,
Secretary.

PENNSYLVANIA RAILROAD.

Tariff of commodity rates

from

PHILADELPHIA, PA.,

to

POINTS NOTED WITHIN.

IMPORTANT.

On shipments other than iron ore, beauxite ore, and iron pyrites reaching Philadelphia by vessel, either from foreign or domestic ports, and docking at railroad terminals and reshipped to points shown within when the rate from Philadelphia is less than 3¾ cents per 100 pounds, or 75 cents per net or gross ton, agents will add ½ cent per 100 pounds or 10 cents per net or gross ton to the published rate. If, however, the addition of ½ cent per 100 pounds or 10 cents per net or gross ton exceeds 3¾ cents per 100 pounds or 75 cents per net or gross ton, 3¾ cents per 100 pounds or 75 cents per net or gross ton must be charged.

Subject to Rules and Regulations of Official Classification or exceptions thereto as per F. D. No. 5 (I. C. C.—G. No. 2242) or subsequent issue.

These rates must not be exceeded to intermediate points.

Under this tariff when freight is to be loaded by consignor or unloaded by consignee, one dollar ($1.00) per car per day or fraction thereof for delay beyond forty-eight hours in loading or unloading, will be added to the rates named herein and constitute a part of the total charges to be collected by the carrier on the property; except, however, when in conflict with Car Service Association or local regulations at shipping point or destination, in which case such Car Service Association or local regulations shall prevail.

This tariff does not expire with the calendar year, but remains in effect until superseded or withdrawn.

Issued February 13, 1905, by — Taking effect February 13, 1905.

On

Manure, Carloads,

(Minimum weight, 40,000 Pounds)

From

Scranton, Pa.,

To

Elmhurst, Pa.....at 40¢ per net ton.
Lake Ariel, " .....at 50¢ " " "

This rate must not be exceeded to an intermediate point on any like shipment.

Rubber stamped as follows:

Under this tariff when freight is to be loaded by consignor or unloaded by consignee, one dollar ($1) per car per day, or fraction thereof, for delay beyond forty-eight hours in loading or unloading will be added to the rates named herein and constitute a part of the total charges to be collected by the carrier on the property, except, however, when in conflict with Car Service Association or local regulations at shipping point or destination; in which case such Car Service Association or local regulations shall prevail.

Issued April 5, 1901. Taking effect April 5, 1901.
This tariff does not expire with the calendar year, but remains in force until revoked.

DEFENDANTS' EXHIBIT 120.

COMPUTATION OF PER CWT. COST OF TRANSPORTATION ON SHIPMENTS FROM OLEAN TO VERMONT POINTS.

(1)

Statement of actual and average weights of cars shipped from Olean to Burlington.

Year.	Number of cars.	Actual weight.	Average weight per car.
1900	247	12,323,667	49,893 lbs.
1901	241	11,718,278	48,623 "
1902	198	11,454,445	57,850 "
1903	174	12,371,411	71,100 "
1904	158	10,162,387	64,319 "
	1,018	58,030,188	57,004 "

(2)

The per cwt. equivalent of the carload rate from Norwood to these three Vermont points at an average carload weight of 57,00½ is as follows:

From— / To—	Norwood, N. Y.	
	Carload rate.	Cwt. rate
Burlington, Vt.	$23.00	4 c.
Bellows Falls, Vt.	28.00	4.9 c.
Rutland, Vt.	30.00	5.2 c.

(3)

Statement showing sum of local rates in cents per cwt. Olean to Burlington for years 1900 to 1905.

To—	Rate Olean to Rochester.	Rate Rochester to Norwood.	Rate Norwood to destination.	Total.
Burlington	2.8	9	4	15.8
Bellows Falls	2.8	9	4.9	16.7
Rutland	2.8	9	5.2	17.0

DEFENDANTS' EXHIBIT 121-A.

STATEMENT OF RESTRICTIONS ENUMERATED BY THE RED LINE EASTBOUND FAST FREIGHT BILLING BOOK IN THE APPLICATION OF BOSTON RATES TO POINTS NAMED IN MAINE, NEW HAMPSHIRE, AND VERMONT.

No. 3.—"For stations marked thus (3) deduct from the through rate, before prorating, one (1) cent per 100 lbs. or 20 cents per ton (net or gross) and show the amounts separately in the division on the line way-bill 'Terminal.'"

No. 5.—"For stations marked thus (5) Boston rates apply on oil (all kinds)."

No. 21.—"Hoosac Tunnel & Wilmington R. R. stations. All freight in any quantity may be taken at the following arbitraries, which are in addition to the Boston rate, and apply from Hoosac Tunnel, Mass."

No. 46.—"For stations marked thus (46) freight may be taken in any quantities at the following class arbitraries, governed by Official Classification (minimum charge, 25 cents), from Brunswick, Me.; but no rates to Brunswick must be quoted or applied which are lower than the class or commodity rates from Cleveland to Boston, Mass."

No. 49.—"For stations marked thus (49) freight may be taken in any quantities at the following class arbitraries governed by Official Classification (minimum charge, 25 cents), from Brunswick, Me.; but no rates to Brunswick must be quoted or applied which are lower than the class or commodity rates from Cleveland to Boston, Mass."

No. 58.—"For stations marked thus (58) freight may be taken in any quantities at the following class arbitraries governed by Official Classification (minimum charge, 25 cents), from Brunswick, Me.; but no rates to Brunswick must be quoted or applied which are lower than the class or commodity rates from Cleveland to Boston, Mass."

No. 59.—"For stations marked thus (59) Boston rates apply on *carload* freight, all kinds, also cotton and wool in any quantity. Less than carload shipments of freight (other than cotton or wool, on which Boston rates apply on any quantity) may be contracted and billed for stations on the Boston & Maine R. R. as per following instructions. Official Classification to govern. Minimum charge 25c."

Note 66.—"Boston rates will apply, except that no rates must be quoted or used which are lower than the class or commodity rates from Cleveland, Ohio, to Boston, Mass."

No. 77.—"For stations prefixed thus (77), straight Boston rate applies on the 1st, 2nd, 3rd, and 4th class freight. Apply Boston percentages, first deducting 1c. per 100 lbs. for terminal road.

"On 5th and 6th classes and commodities taking lower than 5th and 6th class rates, the through rates will be 2c. per cwt. over the Boston basis. In billing deduct 3c. per cwt. for terminal road, prorating balance on Boston percentages."

No. 80.—"For stations prefixed thus (80) straight Boston rate applies on 1st, 2nd, 3rd, and 4th class freight. Apply Boston percentages, first deducting 1c. per 100 lbs. for terminal road.

"On 5th and 6th classes and commodities taking lower than 5th and 6th class rates, the through rates will be 2c. per 100 lbs. over the

Boston basis. In billing deduct 3c. per 100 lbs. for terminal road, prorating balance on Boston percentages."

No. 83.—"Rates to Rutland Railroad points apply only via such routes as are covered by published percentages."

List of the number of stations affected by the foregoing restrictions.

NOTE.—"B" indicates that the computation was made via Burlington.
"R" " " " " " " Rutland.
"BF" " " " " " " Bellows Falls.

(1) The figures in the column headed "New York Harbor" are respectively the sum of the rate from New York Harbor by water to Burlington, Vt., 6¼c. and 2¾c. for wharfage and transfer to cars at Burlington, and the 2nd class rate out of Burlington shown in Rutland R. R. tariff I. C. C. 421, effective Dec. 10, 1900.

(2) The rates in the column headed Bradford are shown in Sup. 9 to B. R. & P. tariff I. C. C. 262, Sup. effective Nov. 14, 1899, still in effect Dec. 3, 1907, except that the rates were taken out by Sup. 12, effective Feb. 15, 1900, and restored by Sup. 13, effective March 9, 1900. Otherwise no change as to Rutland R. R. points, except that the names of five stations are added by Sup. 15, effective Jan. 8, 1901.

(3) The figures in the column headed Olean are the sum of the C. L. cost of transportation as shown on Deft. Exhibit 120, ¼c. per gallon, or 8c. per cwt. for breaking bulk and the 2nd class rate out of Burlington, Bellows Falls, or Rutland, whichever was less, as shown in Rutland R. R. tariff I. C. C. 421, effective Dec. 10, 1900.

NOTE.—The letter "B" after any of the figures shown in the statement denotes that the cost of transportation was figured via Burlington.

(1) The figures in the column headed "New York Harbor" are respectively the sum of the rate from New York Harbor by water to Burlington, 6½c., 2½c. for wharfage and transfer to cars at Burlington, and the 2nd class rate out of Burlington, as shown on page 143 of the petition.

(2) The rates shown in the column headed "Bradford" are those shown in Sup. 9 to B. R. & P. tariff I. C. C. 262, Sup. effective Nov. 14, 1899, cancelled Feby. 15, 1900, likewise cancelling through rates on all merchandise; Boston rate from Toledo C. L. to all stations on C. V. R. R., applied by Grand Trunk tariff I. C. C. A-944, effective Dec. 12, 1904.

(3) The figures in the column headed "Olean" are respectively the sum of the C. L. cost of transportation from Olean, as shown in deft's Exhibit 120, ¼c. per gallon, or 8c. per cwt. for breaking bulk at Burlington, and the so-called secret rate out of Burlington, as shown on page 143 of the petition.

IMPORTANT INSTRUCTIONS FOR THE GUIDANCE OF SHIPPERS AND AGENTS. [Page 1.]

Traffic on which the rates and instructions of this guide apply.

This billing list or guide is applicable on all-rail shipments from Western States points, also on traffic "Across Lake Michigan" from or via Milwaukee, Manitowoc, Kewaunee, Wis., and Manistique and Menominee, Mich., but does not apply on lake and rail shipments from or via Port Huron, Mich., and other Grand Trunk Railway lake ports, nor on shipments from Canadian points.

Reduced "commodity" rates not necessarily applicable.

The rates indicated in "Rates" Column are based on the ordinary current eastbound rates. When lower rates are issued on commodities, the instructions in this guide will not necessarily apply in connection with said reduced rates. In such cases agents and others interested must not undertake to transport traffic under the reduced rates until they have ascertained from the proper traffic official of the initial road that the roads interested are prepared to transport the commodity at the reduced rates.

Petroleum and its products.

Petroleum or its products, whether in tank cars or in packages, must not be taken under the instructions of this guide, but such shipments will be subject to special tariffs and local regulations of railroads interested.

High explosives.

High explosives will only be accepted subject to the special tariffs or local regulations of railroads interested.

Heavy or bulky freight via Grand Haven route.

The Grand Trunk Railway advises that freight too bulky to pass the gangways of steamers plying between Grand Haven, Muskegon, and Milwaukee has been contracted and forwarded by this route, causing much delay and additional expense.

To avoid such delay and expense, agents and connections are requested not to contract by this route machinery or other bulky freight which will not come within the following limitations as to size and weight of each piece (outside measurement):

Length	30 feet.
Width	6 feet 6 inches.
Height	7 feet 4 inches.
Weight	8,000 pounds.

Prepayment of charges on granite returned to manufacturers.

The Central Vermont and Boston & Maine Railroad Companies advise that owing to the number of shipments of granite, both wrought and unwrought, received by them, which are refused by consignees without justifiable pretext, it is deemed advisable to decline to receive such shipments from connecting lines in the future, when returned to manufacturers, unless all charges are prepaid.

"Stop-off" privileges on carload traffic at Montreal, Que., and St. Albans, Vt.

Lumber "stop off" at Burlington, Vt.

For rules governing, see National Despatch-Great Eastern Line Circular No. 8, of June 30, 1902, or subsequent issues.

Bills of lading and waybills may be made for lumber to be stopped off at Burlington for dressing; the charge therefor must be borne by the owners of the property, and so noted on waybills and receipts. The stop-over notation must be made on both the outside and inside of such waybills.

Icing stations.

The following is a list of icing stations at which shipments of perishable freight may be re-iced when forwarded by the railroads named below:

On direct line Chicago to Portland, Me., and Boston, Mass.

Elsdon (Chicago), Ill	Grand Trunk Railway.
Port Huron Tunnel, Mich	Grand Trunk Railway.
Don (Toronto), Ont	Grand Trunk Railway.
Montreal, Que	Grand Trunk Railway.

To Portland.

Island Pond, Vt	Grand Trunk Railway.

To Boston via C. V. Railway.

White River Junction, Vt	Central Vermont Ry.
Nashua, N. H	Boston & Maine R. R.

Necessity of shippers designating the stations at which they wish shipments iced.

Unless shippers have made special arrangements with the above railroad companies, it will be necessary for them to designate on each forwarding or shipping order the point at which the freight is to be iced.

ROUTING INSTRUCTIONS FOR TRAFFIC VIA CENTRAL VERMONT RAILWAY.

West of St. Johns, Que., will be found with the percentages, and waybills must show junction points accordingly.
East of St. Johns, Que., routing instructions are as follows, and the injunction points mentioned must be shown on waybills:

To points taking—	Route via—
"Montpelier" per cents	St. Johns, Que.
"Nashua", "East Boston", "Lynn" per cents	St. Johns, Que., and White River Junction, Vt.
"Springfield", "Fitchburg" per cents	St. Johns, Que., and Windsor, Vt.
"St. Johnsbury" per cents	St. Johns, Que., Montpelier and Wells River, Vt., *except to stations located on the St. J. & L. C. R. R., for which see special routing instructions below.*

REFERENCE C.

Special instructions for routing traffic for the below-mentioned points, east of St. Johns, Que.
It is essential that this routing be shown on all waybills and car labels, when the traffic is forwarded via the Central Vermont Railway.

DEFENDANTS' EXHIBIT 132.

Comparative oil and fifth-class rates from Chicago (Whiting), Toledo, Cleveland, and Pittsburg, respectively, to Ohio River gateways.

From	Chicago (Whiting).			Toledo.			Cleveland.			Pittsburg, Pa.		
To—	Distance.	Rate.		Distance.	Rate.		Distance.	Rate.		Distance.	Rate.	
		Oil.	5th class.		Oil.	5th class.		Oil.	5th class.		Oil.	5th class.
Evansville, Ind.	287	11c.	15c.	386	15c.	18c.	441	17½	18c.	542	22½c.	20½
Jeffersonville, Ind.	* 291	11	15	319	14½	16	384	15	16	439	19	18
Cincinnati, Ohio.	298	11	15	211	10	12½	263	10½	13	313	14	15

* Jeffersonville, Ind., is across Ohio River from Louisville, Ky., and takes Louisville rates less bridge tariff.

Authorities.—The rates from Chicago are named in through freight rate tariff No. 46, I. C. C. 81, effective Dec. 9, 1902.
" " " Toledo are named in L. S. & M. S. tariff, I. C. C. A-959, and C. H. D. joint freight tariff No. 2808, I. C. C. 615, effective January 4th, 1900.
" " " Cleveland, O., are named in Erie R. R. tariffs, I. C. C. A-1200, effective Jan. 1st, 1900, and I. C. C. A-1490, effective September 7th, 1901.
" " " Pittsburg, Pa., are named in Penna. Co. tariff, I. C. C. A-394, effective July 28, 1903, and P. C. C. & St. L. tariff, I. C. C. A-126, effective February 10, 1906.

Note.—The rate on oil from Chicago to Cairo, distance 365 miles, was 11c. per cwt. See Illinois Central R. R. tariff, I. C. C. A-839, effective March 25th, 1897, and in force until December 8th, 1906. This rate is not covered by C. E. Fulton's through freight rates No. 46, etc. The Official Classification, however, did not apply from Chicago to Cairo.

COMMITTEE ON UNIFORM BASIS OF RATES.

992–(895). Authorization of Chicago & Ohio River Committee's tariffs as the standard.

Authorization of Chicago & Ohio River Committee's tariffs as the standard.

It is the sense of this committee that the Chicago & Ohio River Committee's tariffs shall be considered as the standard on and west of the following described line:

Via the south and west bank of Lake Michigan to and including Benton Harbor, Mich., thence via the C. C. C. & St. L. Railway including stations on that line, via Niles, Mich., and Goshen, Ind., to Anderson, Ind., thence via the P. C. C. & St. L. Railway and including stations on that line from Anderson, Ind., via New Castle, and Richmond, Ind., to Cincinnati, Ohio.

Adopted.

Lima, Ohio	246	14½		1.18

*** Rate to north bank of river, applicable to shipments destined beyond Louisville; to Louisville proper, 11½ cents.**

† The rate of 19½ cents from Toledo to Mount Vernon, Ill., shown on page 161 of the petition, is not correct. The lowest available rate was 17 cents and is shown in Toledo, St. Louis & Western Railroad's tariff I. C. C. 206, effective February 3rd, 1903; this makes a rate per ton per mile of .83 instead of .92, as shown in the petition, and the difference in favor of Whiting 7 cents instead of 9½ cents.

Toledo, Ohio	225	14½	3½	.89
Whiting, Ind	204	a 11		.75
Lima, Ohio	246	14½		1.18

a Rate to north bank of river applicable to shipments destined beyond Louisville; to Louisville proper, 11½ cents.

b The rate of 19½ cents from Toledo to Mount Vernon is not correct. The lowest available rate was 17 cents, as shown in Toledo, St. Louis & Western Railroad's tariff I. C. C., 206, effective February 3rd, 1903; this makes a rate per ton per mile of .83 instead of .92, as shown in the table, and the difference in favor of Whiting 7 cents instead of 9½ cents.

DEFENDANTS' EXHIBIT 145.

Was withdrawn. (See p. 2360, vol. 15.)

Average rate	8½	7½		.016	.014

Analysis of the above.

Average rate on oil, in carloads, shows a reduction of 8½ % below 6th class rate, or 91½ % of 6th class, during the year 1906.

Average rate per ton per mile, in carloads, shows a reduction of 12½ % below the average rate per ton per mile on 6th class during the year 1906.

Clinton	"						

[a] Switching to or from industries on C. & N.-W., C. M. & St. P., Wis. Cent., or C. & N. P. must not be absorbed on shipments destined to or coming from East St. Louis or St. Louis, or beyond those points.

ALSO TO AND FROM THE FOLLOWING TERRITORY:

All points beyond St. Paul, Minneapolis, or Minnesota Transfer.
All points west of the Missouri River to which we have through rates, including the Pacific coast.
All points on the B. & M. River R. R.
All points on or via M., K. & T. in Missouri, Kansas, Indian Territory, or Texas.
All points south or west of East St. Louis or St. Louis on or reached via the Missouri Pacific, St. L., I. M. & S., St. L. & S. F., or Cotton Belt Line, except on shipments coming from or destined to industries located on the C. & N. W., C., M. & St. P., Wis. Cent. Co., or Nor. Pac. R. R.

NOTE 2.[a]—The trackage and switching charges paid by this company in reaching industries on the tracks of the U. S. Y. & T. Co. amount to $3.00 per car, and on the C. & I. S. L. R'y, $3.50 per car. These charges will be added to the regular freight rates on traffic coming from or destined to points not provided for above, except that live stock, fresh meats, and packing-house products will be received from or delivered to industries on the tracks of either of these companies free of switching or trackage charges.

NOTE 3.—The instructions contained herein will not modify the rules prescribed in G. F. O. 5242 for the handling of grain in Chicago.

NOTE 4.—Switching charges absorbed under these rules will be paid to connecting lines by Chicago station the same as any other advance charges, and at the end of each month Chicago station will make claim for relief, giving complete reference to billing, etc. In no case must the amount of switching be deducted from the local or line charges.

NOTE 5.—Amendments or additions to these instructions will be issued from time to time when it is found necessary to do so. In case, however, we desire to absorb switching on a single shipment not provided for by these instructions, a special notice will be issued to cover it, which will expire when the shipment is made. The freight auditor will hereafter not accept authority for the absorption of switching charges at Chicago, unless covered by this issue or subsequent amendments, or by a special notice above referred to.

THOS. MILLER,
General Freight Agent.

18	Horseshoes	4
19	Ice	50c per net ton.
20	Iron, corrugated (westbound)	4
21	Iron, merchant, viz: Bar, band, boiler, boiler braces, boiler heads, crabs, lugs (steel), manhole tops and covers, pipe flanges, rivets, hoop, plate and sheet, axles, bolts, chain, harrow or rake teeth, hay bale ties, horse or mule shoes, malleable castings, nails and spikes, nuts, pipe and couplings, plow beams, plow points and plow wings, plow wheels, sash weights, seats for agricultural implements, shafting, sled knees, sleigh shoes, thimble skeins, toe calks, washers, wire and wire rods, in straight or mixed carloads; also staples in straight carloads or in mixed carloads with wire	4
22	Iron, billets, bloom, ingots, ore, manganese, moulds, rolls, pig, spiegel, and iron, steel or wire scrap	50c per gross ton.
23	Iron, scrap	50c per gross ton.
24	Junk, min. wt. 25,000 lbs.	4
25	Lead skimmings	3
26	Malt, min. wt. 40,000 lbs. (westbound)	3
27	Melons (westbound)	5
28	Nails (estimated wt. 106 lbs. per keg)	3
29	Oil, O. R., except petroleum and its products	5
30	Paper (building, printing, wrapping or carpet, not wadded or sewed	5
31	Paints	4
32	Paper, wall, min. C. L. wt. 30,000 lbs. (eastbound)	L. C. L. 12; C. L. 5
33	Pipe and couplings, iron	4
34	Potatoes	4
35	Rags and paper stock, min. wt. 25,000 lbs.	4
36	Railway material, iron R. R. chairs, nut locks, links and pins, spikes, splices, angle bars and fastenings, bolts, frogs, car wheels and axles (old or new), drawbars, bumpers, equalizing bars, iron surface cattle guards, split switches, brake shoes, rail braces, switch stands and turntables and parts of same, in straight or mixed carloads	3
37	Rails	60c per gross ton.
38	Rail ends	60c " " "
39	Rattan, min. wt. 20,000 lbs.	8
40	Resin	4
41	Sand, clay, and gravel	50c per net ton.
	Same (eastbound applies only as proportional rate on shipments destined to points on connecting lines not covered by through rates)	40c per net ton.
42	Shavings, in bbls., min. wt. 20,000 lbs.	3
43	Slag	50c per net ton.
44	Steel plates	60c per gross ton.
45	Staves, heading, hoops and hoop poles, straight or mixed C. L.	3
46	Strawboard (eastbound)	4
47	Tar and pitch	4
48	Tin plate, min. wt. 40,000 lbs. (eastbound)	3
49	Tin scrap	50c per gross ton.
50	Wire (barbed), wire staples and hay bale ties, straight or mixed C. L. (eastbound)	3
51	Wire, plain (westbound)	50c per gross ton.
52	Wire rods	50c " " "
53	Wire, scrap	50c " " "

Index No.	Commodities, C. L. Minimum weight on carloads will be 30,000 lbs., unless otherwise specified.	Rates in cents per 100 lbs., unless otherwise noted.
54	Acids, O. R., when in tank cars min. wt. capacity of tank (westbound)	5
55	Agricultural implements, and wagons, min. wt. 24,000 lbs.	8
56	Arsenic (westbound)	6
57	Bottles, min. wt. 24,000 lbs. (eastbound)	8
58	Same, L. C. L. (eastbound)	10
59	Same, L. C. L. (when for connecting lines, where no through rates are published), eastbound	15
60	Brick, tile, sand, or clay	3½
61	Buckwheat, min. wt. 24,000 lbs.	6
62	Charcoal, min. wt. 24,000 lbs. (westbound)	6
63	Crucibles and melting pots, straight or mixed	6
64	Cullet (westbound)	6
65	Glass, all kinds (eastbound)	6
66	Same, L. C. L. (eastbound)	10
67	Same, L. C. L. (when for connecting lines where no through rates are published), eastbound	15
68	Glass bottles and fruit jars (eastbound)	8
69	Hides, green, pelts, tallow and grease, straight or mixed	8
70	Iron or steel, bar, band, boiler, hoop, axles, bed weights, boiler braces, boiler heads, boiler tubes, bolts, castings, chain, crabs, forgings, harrow or rake teeth and discs, hay-bale ties, hinges (scrap), hooks, horse or mule shoes, lugs (steel), manholes, maul heads, nails and spikes at actual weight but not less than 100 lbs. per keg when in kegs; nuts, pipes and couplings, pipe flanges, plates, plow beams, plow points and plow wings, plow wheels, rivets, rods, roofing (iron), sash weights, seats and springs for agricultural implements, shafting, sheet, common or galvanized, siding (iron), sled knees, sleigh shoes, staples, thimble skeins, toe calks, wagon or carriage skeins or springs, wagon tires, washers, wheels, wire, wire rods, straight or mixed C. L. (westbound)	6
71	Iron or steel, bridge or structural, viz: Angle beams rods, channels, columns, girders, tees, zees, rails and plates, straight or mixed C. L. (westbound)	6
72	Iron, pig, per gross ton of 2,268 lbs., min. wt. 15 gross tons (westbound)	100
73	Iron, scrap	5
74	Junk	5
75	Lead	6
76	Oil, petroleum, and its products (westbound)	6

DEFENDANTS' EXHIBIT 154—PAGE 13.

32118 13 No. 7100

ITEM No. 162.—*From Chicago, Ill., to Minonk, Ill.*

In cents per 100 lbs. Less carloads.	Rates.
Agricultural implements, axes, hardware, locks, and knobs, in packages; sash pulleys, shovels and scoops, stoves and stove furniture, tinware and stamped ware, nested, packed in boxes or barrels; wire cloth	24
Cartridges, paper and metallic (not high explosives), boxed; lamp chimneys and lantern globes, in packages; enameled ware, boxed; mechanics' tools, boxed	31½
Groceries, viz: Beans, in bags or barrels; coffee, green or roasted; crackers; canned goods, as specified in Illinois Classification; fish, pickled, salted, or smoked; jelly and preserves; apple butter, in wood; pickles, in wood; rice, sugar, syrup, and molasses; vinegar	16
Grindstones and fixtures	16
Iron articles, viz: Anvils, barbed-wire stretchers, in boxes or barrels; band and boiler iron, bar and rod iron, beams and channels, blacksmiths' cones and mandrels, bolts, links and pins, brake beams, brake shoes, butts, car couplers; castings, unfinished (not machinery or parts of machinery), in boxes or casks; chain, in casks; clevises, crowbars, drawbars, and bumpers, fence posts, fence wire, plain or barbed, hay bale ties; hoop, sheet (common), galvanized or corrugated, released; hinges (strap); horse and mule shoes, actual weight; hydrants, fire and yard, cast iron, O. R. R.; lag screws, in kegs or barrels; mauls and sledges, in boxes or barrels; nails, horse, in boxes; nails and spikes, in kegs, actual weight; nuts, bolts, rivets, and washers; picks; pipe and pipe fittings, wrought iron; railroad rails; roofing, in boxes, bundles, crates, or rolls; sash weights; service boxes, in boxes, barrels, or casks; sinks and traps (iron or steel), O. R.; splices, spikes, springs, vehicle tacks, vises and wedges, staples and hooks, in boxes, kegs, or barrels; stays and staples, toe calks, boxed; track chisels; tuyeres, iron; wagon skeins and boxes; wire fence	16
Paper, building and wrapping	16

RULES AND REGULATIONS.

MINIMUM CHARGE.

Single shipments of one or more classes will be charged for at actual weight at tariff rates, subject to a minimum charge of 25 cents for the entire consignment.

LIME.

Lime rates will also apply on cement (building, paving or roofing), lime, plaster (building), stucco, soapstone finish for plaster, in straight or mixed carloads.

LIVE STOCK.

Cattle, calves, hogs, and sheep.—Agents will bill at the minimum weights named below, subject to correction at destination to actual weight, but in no case less than the following minimums:

Minimum weights, live stock, carloads.	Cattle and calves.	Hogs and sheep, double deck cars.	Hogs, single deck cars.	Sheep, single deck cars.
Cars 31 feet and under in length, inside measurement	19,000 lbs.	19,000 lbs.	15,000 lbs.	10,000 lbs.
Cars over 31 feet but not exceeding 33 feet 9 inches in length, inside measurement	20,500 "	20,500 "	16,000 "	11,000 "
Cars over 33 feet 9 inches to and including 36 feet in length, inside measurement	22,000 "	22,000 "	17,000 "	12,000 "

HORSES AND MULES.

Rates on horses and mules, carloads, will be 110 per cent of the rates on cattle, carloads, using minimum weights shown above for the various sized cars of cattle. To illustrate: When the rate on cattle, C. L., is 14 cents per 100 lbs., the rates on horses and mules will be 15.4 cents per 100 lbs., subject to the established cattle minimums shown, and charges will be assessed and collected on the basis of the minimum weights shown for various sized cars, regardless of actual weight.

STOCK CATTLE.

Stock cattle, C. L., between points in Illinois (except to Chicago, Ill., proper), will take 75 per cent of the rates named herein on cattle and calves.

Agent at the station from which live stock is way-billed must in all cases note on billing the length of car in which stock is loaded.

TERMINAL CHARGES.

The live-stock station and stock yards of the A., T. & S. F. Ry. Co. in Chicago are located at Corwith, and the rates named herein as applicable to Chicago only apply to live stock intended for delivery at the stock yards of said company at Corwith, in said city.

Upon all live stock consigned to the Union Stock Yards in Chicago, or to industries located on the Union Stock Yards Railway or the Indiana State Line Railway (Chicago Junction Railway, Lessee), and transported and delivered to said Union Stock Yards, or to said industries located on said Union Stock Yards Railway or the Indiana State Line Railway aforesaid, an additional charge of two dollars ($2.00) per car will be added to the rates applicable to Corwith, for transporting such cars to said Union Stock Yards, or to said industries on said Union Stock Yards Railway or Indiana State Line Railway, for delivery thereat; and one dollar and a half ($1.50) per car as a terminal charge will be made in addition to the Chicago rates on shipments received from or delivered to the Northern Indiana Railroad at Hammond.

The attention of the shipper must be and is called to the fact that the transportation charge on live stock delivered at our own yards at Corwith, in Chicago, will be two dollars ($2.00) per car less than when delivered at the Union Stock Yards at Chicago, or at industries located on the Union Stock Yards Railway or the Indiana State Line Railway, and the agent should ascertain definitely at which point the shipper desires delivery to be made. The live-stock contract must then be filled out so as to show the correct destination and rate as provided by the tariff and amendments.

Care must also be taken to have the stock correctly billed, either to Corwith, in Chicago, or Union Stock Yards at Chicago, or industries located on the Union Stock Yards Railway or the Indiana State Line Railway, as designated by the shipper, and the correct rate shown in the billing.

Bills of lading covering freight to and from the Union Stock Yards, or industries located on the Union Stock Yards Railway or the Indiana State Line Railway, must provide for the above terminal charges.

In waybilling shipments destined to or coming from the Union Stock Yards, etc., the terminal charges, if any, must be shown separately in the freight columns.

Soft-lumber rates will apply on the following articles, in straight or mixed C. L.:

Basswood, beech, birch, cottonwood, cypress, elm, gum, maple, or pine lumber; also on the following articles when manufactured from the foregoing named woods:

Base boards.
Bed slats.
Blocks, corner and base.
Blocks, head and plinth.
Box lumber or shooks, including scarfed berry box material, in bundles or racks.
Carpenters' moldings.
Casing.
Combined lath and sheathing.
Fence posts.
Guttering, rough.
Lath, pine.
Lumber (including ceiling), flooring (except wood carpet), wainscoting, match blocks, and circus seats (not upholstered or with backs).
Paving blocks.
Pickets.
Piles.
Sawdust.
Shingles.
Spools (for barbed wire), K. D.
Telegraph and telephone poles.
Well tubing.
Window stools, aprons, and hoods.

Articles taking higher than soft-lumber rates.—The following articles, when loaded in straight or mixed C. L., will take 1 cent per 100 lbs. above the soft-lumber rates. *When loaded with articles taking soft-lumber rates, they will take 3 cents* over the soft-lumber rates on the actual weight of such articles, provided they are specified on the shipping tickets.

if not so specified the regular L. C. L. rating will apply, it being understood that the minimum weight governing on soft lumber will apply in each instance:

Angle beads.
Astragals.
Balusters.
Balustrade work.
* Base boards.
Blinds, inside and outside.
* Blocks, corner and base.
* Blocks, head and plinth.
* Carpenters' moldings.
* Casing.
Closet fittings.
Closet seats.
Closet tanks.
Corner beads.
Cornice brackets.
Cresting.
Door jambs.
Doors, glazed with common window glass or unglazed (if glazed, released).
Doors, panel.
Doors, screen.
Gable ornaments.
Grille work.
Interior trimmings.
Panel jambs.
Panel, wainscoting and ceiling.
Pantry fittings.
Pilasters.
Porch newels.
Porch and piazza columns.
Porch railing.
Porch work.
Portiere work.
Rosettes.
Sash, glazed with common window glass or unglazed (if glazed, released).
Scroll work.
Shelves.
Shutters, inside and outside.
Spindles.
Stair work (newels, risers, treads, railings, balusters and post ornaments), K. D.
Store fronts.
Turned work.
* Wainscoting.
Wash tub covers.
Window, door, blind, and screen frames, set up or K. D.
Windows, screen.
* Window stools, aprons, and hoods.

* Applies when manufactured from woods other than those enumerated as taking soft lumber rates.

Minimum weights.

GRAIN, C. L.

Item.	On—	In cars (length, inside measurement).	Minimum weight to apply.
		Feet.	
1	Grain, any kind, when loaded to top of lining of car	30 and under	Actual weight.
2	Ear corn, when loaded to full visible capacity	Any length	Actual weight.

3	Oats and barley	30 and under	30,000 lbs., except where less under terms Item No. 1.
4		Over 30	40,000 lbs.
5	Wheat, rye, and shelled corn	30 and under	Marked capacity of car, except where less under terms Item No. 1.
6		Over 30	Marked capacity of car.

LUMBER, C. L.

In cars 30 feet and under (inside measurement), 20,000 lbs.
Cars over 30 feet and under 34 feet (inside measurement), 24,000 lbs.
Cars 34 feet and over (inside measurement). 30,000 lbs.

HAY, C. L.

In cars 30 feet and under in length (inside measurement)..... 16,000 lbs.
In cars over 30 feet to and including 34 feet in length (inside measurement)..... 19,000 "
In cars over 34 feet in length (inside measurement)..... 20,000 "

NOTE.—When a car is loaded to its full capacity, the rule as to minimum weights will be waived, and actual weight, provided it is not less than 20,000 lbs., will be accepted.

The minimum weight on soft coal in open cars will be the marked capacity of the car, except where cars are loaded to their full visible or space carrying capacity, in which case actual weight will govern.

Minimum weight on soft coal in box or stock cars will be 40,000 lbs., except that when cars are loaded to their full space or visible capacity, and notation to that effect is made on way-bill, actual weight will obtain.

7

DEFENDANT'S EXHIBIT 154—PAGE 26.

[Page 8 of Amendment No. 9.]

MAXIMUM RATES.

Effective September 27, 1904. (Reissue.) Cancel the maximum rates between Chicago, Corwith, etc., and stations Edelstein to East Fort Madison, shown on page 11 of Tariff (Items Nos. 153 to 157 inclusive). The maximum rates to be charged between the above-named stations will be the rates shown to or from Fort Madison, Iowa, in Santa Fe System Tariff No. 5571 or reissues.

FURNISHING LIVE STOCK EQUIPMENT.

The A. T. & S. F. Ry. Co. has no cars of shorter length than 33 feet 6 inches, inside measurement, capable of transporting live stock shipments, therefore will decline to furnish live stock equipment of shorter lengths than 33 feet 6 inches. All provisions for computing charges on shipments of live stock, in carloads, heretofore authorized for the short length of obsolete equipment referred to above are hereby made void.
